Engineering in **Germany set for** further output fall

Mechanical engineering companies, western Cermany's leading export earners, believe output and employment will fall further this year before recovery atarts in 1994. Production, which fell 6 per cent in 1992, will decline by another 5 per cent, and around 80,000 jobs will be lost, it is estimated. Page 14

Three indicted over trade centre bomb Three men were indicted in connection with the bombing of New York's World Trade Centre that killed six people and injured more than 1,000. Meanwhile, the FBI evacuated its New York City headquarters because of a bomb scare. A police apokeswoman said the huilding in lower Manhattan, which includes the FBPs offices, was evacuated by the security department.

US output up 4.3%: US industrial activity continued to grow strongly last month, by 0.4 per cent, as inflation remained steady, feeding hopes of a austained economic recovery. Output

showed a 4.3 per cent gain over the past 12 months. Page 6; Lex, Page 14 Clinton 'ready to help' on N ireland:

US president Bill Clinton told Irish Republic Prime Minister Albert Reynolds (left) that the US stood "ready to help" end violence in Northern Ireland, but the best hope for peace was talks between tha Irish and British governments. Mr Clinton said his campaign

proposal to send a special US representative to Ireland remained under "serious consideration".

Aspin to have pacemaker: Les Aspin, US defence secretary, has returned to hospital, where he is expected to have a pacemaker implanted. His condition has added to the Clinton administration's problems in putting together a much reduced

Brittan warns of US trade curbs

By David Dodwell and Linnel Barber in Brussels

THE EUROPEAN Community yesterday ruled out concession in the escalating dispute with the US over government procurement practices and predicted that the Clinton administration would impose sanctions from Monday.

Sir Leon Brittan, EC commissioner for external economic relations, said he was "certain" the US would bar European compa-nies from certain federal contracts, in spite of today's meeting in Washington between President Bill Clinton and Mr Jacques Delors, president of the European

The long-planned White House

EC rules out concessions as contracts row escalates

meeting between Mr Clinton and Mr Delors has taken on sharper focus because of trade tensions between the US and EC, hut Sir Leon said only "a hig deal" between the two leaders would deflect sanctions. The prospects for

such a deal were remote, he said. Senior EC officials said the Community had drawn up retal-iatory measures, but would wait until after a meeting in Brussels between Sir Leon and Mr Mickey Kantor, US trade representative, in Brussels in 10 days' time. The Brussels talks would give

Mr Kantor a chance to explain

US trade policy in the light of recent inflammatory rhetoric and an apparent preference for unilateral action, the EC official said. Mr Kantor surprised EC and his own officials last Friday by cancelling two days of talks in Brussels on the procurement

The decision was apparently made after the EC refused to suspend article 29 of its new Utilities Directive which gives a 3 per cent price preference to European companies bidding for government contracts in telecommunications, energy and water.

Sir Leon this week sought to defuse the row by offering to aponsor jointly with the US an Independent report into the facts of the dispute. Asked yesterday if he would waive article 29 while such a study was under way. Sir Leon replied: "No way."

The EC directive came into effect at the beginning of the year. In the first 10 weeks of the directive's life, 1,000 contracts have been notified that previously would not have been open for international tender, worth about Ecu15bn (\$17.7bn), according to an EC official.

The US has indicated that it intends to bar European companies from about \$40m of federal contracts. The sum is small in comparison to the vast government procurement market, but it has taken on added significance because of parallel disputes over aviation and steel aubsidies, and the continuing impasse in the Uruguay Round of Gatt trade

Sir Leon expressed some frustration at the "muscle flexing" the US was doing at the expense of the EC, but insisted that be remained confident that "on the

blg picture, the US still says it wants to reach an agreement".
"What is actually happening at present is that the new administration is seeking to show how strong they are in a series of sectoral measures, some of which are pretty transparent - such as demanding consultations, when agreements call for consultations automatically, and cancelling talks, like Mr Kantor did 1351 weekend."

"There's the risk that actions to show how macho you are through a series of gestures and confrontations could lead to things getting out of hand."

Beijing steps up war of words with threat to ignore democratic poll result

Patten attacked over HK reforms

By Simon Holberton In Hong Kong and Tony Walker in Balling

CHINA yesterday stepped up tha war of words over the future of Hong Kong, threatening to ignore the results of democratic elections proposed by Mr Chris Pat-ten, the colony's governor, once it assumes control in 1997.

It also accused him of slamming the door on further talks. Mr Lu Ping, China's senior official for Hong Kong affairs, said that if Mr Patten pressed ahead with his democratic reforms Beijing would start a "new kitchen" in 1997 - a Chinese expression which means making a fresh

Mr Lu also added his voice to personal criticism of the governor, saying that he would be condemned by history ovar his han-

dling of the Hong Kong issue Speaking at a Beijing press conference, he left the door open, bowever, for further contacts with Britain, saying that China always stands for co-operation, and not confrontation".

In London the Foreign Office stressed that it was still offering "talks at any time". An official added: "The only sensible way forward is for the two sides to sit down and discuss without preconditions the points of differ-

ence between us. The remarks hy Mr Lu, head of China'a Hong Kong and Macao Affairs office, were greeted with relief by the Hong Kong stock market, which had been bracing itself for a more uncompromising

The Hang Seng index was some 200 points down before Mr Lu's press conference, but recovered moat of ita losses to close at

5,958.33, down 21.7 on the day. "We will construct a kitchen in accordance with the design in the Basic Law," Mr Lu said. "We bave to do this because the kitchen started by Mr Chris Patten before 1997 will not converge with the stipulations of the Basic Law after 1997." The Basic Law is a mini-constitution for Hong Kong after 1997 which was approved by China's parliament

Mr Lu said that China would have to make preparations ahead of 1997 for the cancellation of Mr Patten's proposed democratic reforms. But ha refrained from repeating economic threats made by China last year, although it seems unlikely in these circumstances that Britain will win China's agreement to complete Hong Kong's US\$175bn airport project.

or further develop the colony's erated his preparedness to hold talks with China about his proposed 1994-95 elections. But ln spite of the governor's attempts to caim growing concerns over the row with Beijing, local politi-

Yeltsin outlines steps to closer CIS integration

By John Lloyd in Moscow

PRESIDENT Borls Yeltsin laid out proposals yesterday for the closer "integration" of the memhers of the Commonwealth of Independent States, claiming that the 15-month-old organisation had so far been ineffective.

Mr Yeltsin, in a declaration read out by Mr Andrel Kozyrev, the foreign minister, described the association of former Soviet republics as amorphous and unable to fulfil the bopes invested in it".

"While not aspiring to any 'leading role', we are conscious of our responsibility to co-operate closely with all independent states," the declaration said. Mr Kozyrev continually stressed that the initiative was not designed to reassert the "hig brother" role of Russia. "I don't think any magnifying glass will belp you find any neo-imperialist designs in this," He said the declaration was pri-

marily intended to address both the burgeoning conflicts oo Russia's horders and to establish some financial discipline upon those states which remain in the rouble zone and are thus bankrolled by the Russian central bank. Mr Kozyrev said the initiative was designed to increase economic co-operation, in particular

through the creation of "modern market techniques of integration" - the setting up of multinational companies and the encouragement of investment in each other's projects. That approach had been foreshadowed by a gathering of CIS heads of state in Russia's oil region of Tyumen, where they were encouraged to invest in produc-

The declaration follows a speech last month by Mr Yeltsin asking for "understanding" from the United Nations and the international community for Russia's intention to intervene in conflicts in the former Soviet Union, and to remain the region's hegemonic power. That speech was denounced by the leadership of Ukraine. Ukraine is the most reluctant of the CIS members. with Moldova and Turkmenistan.

The initiative is unlikely to fare much better, in spite of prospective agreements between Ukraine and Russia on gas prices and tha former Soviet debt.

Yeltsin's decision was made as he held meetings of the Security Council and his Presidential Council of advisers to address the political and economic crisis, although his advisers said the declaration on the CIS and the

growth in group sales for 1993.

In Hong Kong, Mr Patten reitcians were pessimistic about an early solution.

and polyurethanes. Chemicals plants' operating rates fell below 70 per cent during February, the first time they had done so since

the early 1980s. Worldwide pre-tax profits for the fourth quarter of last year fell 17 per cent to DM469m (\$282m) on sales down 4.4 per cent at DM9.45bn. For the year, group profits fell 16 per cent to DM2.7bn on turnover down 2.8 per cent. The dividend was cut from DM13

The decline in turnover was accentuated by the strength of the D-Mark which reduced sales by 3 per cent, Mr Schneider said. Agrochemicals sales were hit by adverse weather and because farmers were using smaller quantities after last year's reforms of the Common Agricultural Policy,

he said. The group's textile operations suffered from increased competition from Asian groups, which were selling at prices at which German companies could not compete hecause of their high

"It is doubtful that these product lines can be manufactured competitively in Germany in the long term," said Mr Schneider. Imaging technologies, which include Agfa films, posted trading profits down 25 per cent at DM220m.

Speculation grows of Bundesbank rate cut

By David Waller In Düsseldorf

THE solidarity pact concluded last weekend between the German federal and state governments and the opposition ought to provide a fillip to the German economy and belp prevent a spiral of decline, Prof Reimut Jochimsen, a member of the Bundesbank policy-mak-

ing council, said yesterday. Mr Jochimsen, president of the central bank for the state of North-Rhine Westpbalia, told an investment symposium in Düsseldorf be was relieved policy-makers had et last taken important decisions as to how the country should proceed.

Consensus had been renewed despite a "confrontation of interests" wblcb posed "unprecedented challenges" to the German democratic sys-

His remarks will fuel specu-

will cut its official short-term interest rates after the council meeting today. Mr Theo Waigel, Germany's finance minister, said this week the prospect for rate cuts had improved since the pact was concluded. Mr Jochimssn would not

comment in detail on today's meeting. He qualified his favourabla assessment of the pact by saying the agreement left many important details unresolved. He said the pact took "the path of least resistance", meaning higher taxation and no substantial cuts in state spending. He said it was easier to agree

on maintaining expenditure and new sources of revenue

Summing np the Bundes-bank's position on interest rates, he said the council found itself walking a tightrope between pressure to ease monetary policy and the need to

safeguard the value of the

He said the scals of Germany's economic downturn combined with international exchange rate pressures called for interest rates to be cut as soon and as much as possible. But the risks to price stability had yet to be dispelled, he

His views are more favourable to a rate cut than those of Mr Otmar Issing, another member of the Bundesbank's policy-making directorate. Mr Issing said on Tuesday that monetary devalopments remained the main basis for decisions on interest rates.

Despite inflation running at 4.2 per cent in February, many economists hope the Bundes-bank will today cut et least 0.25 percentage points off the Lombard and discount rates, now 9 and 8 per cent. Deutsche Bank, Page 15

Heavier pensions burden looms over taxpayers

By Quentin Peel in Bonn

GERMAN taxpayers are likely to face a new increase of at least 8 per cent in their pensions contributions next year, putting them top of the league of hig industrialised states for direct payments to the public

The warning on a probable Bundesbank published a new survey, showing that France and Germany are now equally the highest-taxed countries in the Group of Seven industrialised states. The latest agreement on a solidarity pact to pay for German unification, with the re-introduction of a 7.5 pcr cent surcharge on income tax from January 1 1995, will push the country further out in front.

The Bundesbank report warns that the tax and social insurance burden on both individuals and employers in Germany stood at 43.7 per cent of insurance bureau for white-col-gross domestic product in 1992, lar workers, who said the cur-

German recycling group gets green light to expand

By Ariane Gentliard in Bonn

THE organisation at the centre of Germany's controversial national recycling system was yesterday given approval to expand its activities from the household sector to industry.

The Federal Cartel Office in Berlin said Duales System Deutschland, which runs the Grüne Punkt (green dot) sys-tem that collects for recycling 80 per cent of consumer packaging in Germany, can collect ndustrial packaging in the

Consumers pay higher prices for the products bearing the green dot. The money then

finances the activities of DSD which collects the packaging.

The move had been fiercely attacked by independent waste collectors who claim that the cost-advantageous nationwide system prevented competition. Following the investigation by the Federal Cartel Office,

DSD has offered to compensate independent waste collectors for the higher costs they

With this new system, small waste collectors will no longer be at a disadvantage and need not fear that they are being pushed away from the market," Mr Jürgen Kiecker, spokesman for the Cartel Office, said.

DSD was set up by 600 enter-prises as a response to a law which said that industry must snsure the collecting and recycling of the packaging they produce.

Today, DSD collects nearly all recyclable household waste and has been asked by tha Länder to extend its operations to collecting industrial packaging.

EC seeks liability code for environmental damage

By David Gardner in Brussels

THE European Commission yesterday started a new drive to establish an enforceable code of civil liability for damage to the environment.

It adopted a green paper which highlights mechanisms which would ensure environ-

mental damage is repaired, even in cases where precise legal blame for pollution is difficult to establish. The Commission is inviting

written submissions on its "communication" to the Council of Ministers (of the 12) by October, after which it will hold public hearings before framing any legislation.

The Commission aim is to

reinforce the principle that the "polluter pays" - with the prospect of substantial financial damages acting as e disin-centive to pollute - yet ensure that the costs will be manageable for industry.

The paper underlines that

the most prevalent system of "fault-based liabllity" requiring proven negligence of a liable party - is far from adequate. A causal link is diffi-cult to establish; redress may

INDEPENDENT experts were sent into the Hoechst chemical group's plant outside Frankfurt yesterday following claims that highly-toxic dioxins were released in an explosion there on Monday, writes Christopher Parkes.

Scientists from the Fresenius Institute collected samples for analysis at the request of the regional environment ministry, after Greenpeace members

be unfairly sought against the richest target under the most advantageous national legal

The plethora of differing legal epproaches among EC memher states, moreover, threatens to fracture the single market; greater or lesser risk of liability for pollution under different regimes could come to constitute a distorting comparative advantage.

The Commission would like to complement fault-based lia-hility with so-called "strict" liability, where no fault need be established.

Officials say they now want to remedy a situation where

Greenpeace had suggested that dioxins would have been released in the explosion and fire which killed one worker and burned PVC cladding on

blockaded part of the works

on Tuesday. Results of the

analysis will be published,

the ministry said.

part of the building involved. Hoechst said temperatures in the fire seemed not to have been high enough to release any dioxins.

much environmental risk will be impossible to insure against, and also avoid the pitfalls of the US Superfund for environmental damage, which they say has encouraged a liti-

gation industry. Mr Ioannis Paleokrassas, EC environment commissioner. would not be drawn on whether he would seek eventually to legislate at EC level, or create a framework for roughly analogous liability norms. "We want a compareble set of instruments in all member states," he said, but "at this moment the Commission is not looking at anything; it is open-

to stay in Srebrenica until aid reaches the town.

The EC is to contribute \$1.2m in food parceis to be airdropped into Bosnia by the US air force, Mr Manuel Marin, EC development and aid commissioner, announced yesterday. Devid Gardner reports from Brussels.

> The move follows pressure hy Mr Hans van den Broek, EC external political relations commissioner, to develop a joint approach to the conflict in former Yugoslavia between the Community, the US and

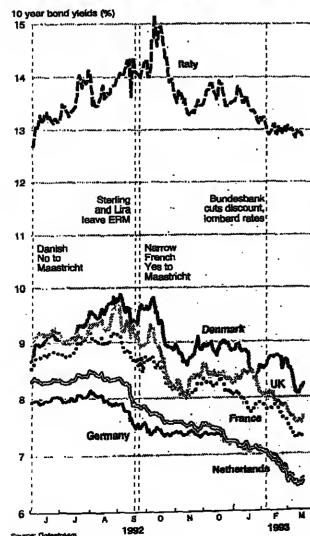

The EC has also been stung hy the high media profile accorded the US air drops, given that the Community has provided nearly three-fifths of the relief aid to ex Yugoslavia, and the overwhelming majority of the ground troops and officials who deliver this aid by land under near-impossible conditions.

How long term EC interest rates have stopped converging

both producers and traders 'Franc fort' set to survive French poll

But EMS key rests with Bundesbank, not with new government, writes David Marsh

OR ALL the currency markets' oft-repeated forecasts of a fresh assault on the franc, France's elections on Sunday are not likely to set fire to the tinder of the European Monetary System.
Yet after the exchange rate flare-ups

of the last six months, the EMS remains in a state of potential self-combustion, according to many European econo-

And the key to the question whether it will eventually go np in flames appears to rest with the German Bundesbank, whose policy-making council meets today to deliberate its next interest rate moves.

The right-wing French opposition par ties likely to form the next government in Paris are widely expected to main-tain the franc fort policy of the Socialist

"The French people do not like devaluations," says one top French official. He says France wants to bring both long-term and short-term interest rates down to German levels - an objective which should be secured once the future Paris government makes clear it will stick to the franc's present parity against the D-Mark.

In particular, the 3.5 percentage point risk premium between short-term German and French rates should fall substantially once the exchange markets stop speculating on a franc devaluation.

France also has strong political reasons for keeping within the EMS at present rates, the official says. If the franc left the exchange rate mechanism and floated, as Britain and Italy did in September, "this would mean the end of the EMS, of the Maastricht treaty, of

the single market and the Treaty of Rome itself", he says. Over the medium term, France hopes to emulate the Netherlands, which has succeeded in bringing both short and long term interest rates below German

levels during the past few months. Interest rates in many EC countries stopped converging with D-Mark rates after last summer after uncertainties intensified about the future stability of

European exchange rates. But the Dutch central bank - thanks to a stern no-devaluation policy since 1983 - has managed to convince the markets that the guilder is at least as

inflation is just over 2 per cent - has had a debilitating effect on the French Mr Charpin says he is not excluding a revival of currency tensions, either in

cost of credit - at a time when French

the autumn or next year, as the new government's difficulties in dealing with the French recession become According to Mr Heiner Flassbeck,

chief economist of the Berlin-based DIW economic research institute, these problems could intensify unless the Bundesbank accelerates the interest rate cuts

'If the franc left the ERM it would mean the end of the EMS, Maastricht, the single market and the Treaty of Rome'

hard as the D-Mark. "It can be done, but it takes time," says a Dutch monetary

Mr Jean Michel Charpin, chief economist at Banque Nationale de Paris, says he is "certain" that France's new prime minister will keep the franc's parity unchanged. If exchange market confidence returns, France will reap a twofold bonus. It will profit both from further expected reductions in the basic level of German interest rates, and from a fall in the franc's interest rate differential, he says.

One month interest rates in France are around 11.7 per cent against 8.3 per cent in Germany. Big French banks, under government orders, have kept their base rates unchanged at 10 per cent for several months. But the high

Mr Flassbeck in recent months has strongly criticised the slow pace of the Bundesbank's monetary relaxation. He believes that, at most, the Bundesbank will announce today merely e "small step" towards further easing. However, unless the Bundesbank by

the end of the year reduces short-term rates to around 4 to 5 per cent - compared with the present discount and Lombard retes of 8 and 9 per cent respectively, "the EMS will not survive", Mr Flassbeck says.

Mr Jean-Francois Mercier, European economist at Salomon Bros in London, believes the weekend "solidarity pact" between the German government and Lander has lessened the likelihood of speedy Bundesbank rate reductions. By agreeing tax increases only for 1995, and ruling out deep spending cuts, Chancellor Halmnt Kohl has sought to lower the danger that the German cession will last into 1994.

But the likelihood of a slight improve-ment in shorter term economic pros-pects has exacerhated the risks of higher debts and deficits in the longer This will increase the risk that Ger-

many itself will not be able to meet the fiscal targets set as conditions for countries' participation in economic and monetary union (Emu) by the end of the century, Mr Mercier says.

If Mr Kohl had switched resolutely to a tighter fiscal policy, this would have paved the way for a looser Bundesbank

ever, he describes the deal as "more spending, more taxes, more deficits". "It doesn't help at all - either France or the Maastricht process." An even more gloomy assessment comes from Mr Brendan Brown, chief

monetary policy, Mr Mercier says. How-

economist at Mitsubishi Finance in London, a long-time sceptic about France's ability to keep its currency pegged to the D-Mark.

Mr Brown believes the inadequacy of the "solidarity pact" deal will prolong

the French recession since the Bundesbank will be more reluctant to ease The pain would be worthwhila if

France's "gold at the end of the rainbow" - the aim, through Emu, of replacing the D-Mark by a European currency - remained alive, Mr Brown says. But, if France's goal of Emn becomes, for political and economic reasons, increasingly remote, the sceptical Mr Brown asks: "How long will France act as a monetary satellite of Germany?"

Kohl hits snag on property claims draft law

By Judy Dempsey in Barlin

DIVISIONS in Germany's ruling coalition yesterday forced Chancellor Helmut Kohl to withdraw temporarily a draft law on financial compen-sation for former property owners in east Germany.

its withdrawal follows continuing differences in the coalltion about who should be allowed to claim back property in eastern Germany, and ways to finance a compensation fund. There are 1.5m-2m outstanding property righta claims in east Germany.

The Christian Social Union, the Bavarian aister party of the Chancellor's Christian Democratic Union, wants those whose land was expropriated by the Soviet forces in eastern Germany between 1945 and 1949 to be given the right to

seek restitution.
But a 1990 agraement
between the two Germanys and four allied powers said these claimants - many of whom lost large landholdings abould have the right only to limited compensation.

The bill seeks to raise a maxlmum of DM12bn (\$7.2hn) to finance compensation claims for property confiscated by the Nazis between 1935 and 1945 and by the former East German state between 1949 and 1990, Individual claims could not exceed DM950,000, a significant Increase from the DM300,000 proposed last December.

The draft law proposes that compensation pay-outs he based on 1935 land valuations, rather than current property prices. Claimants, however, say this is unjust.

The sense of injustice has been fuelled by the way in which the Finance Ministry bopes to raise the DM12bn compensation fund.

For instance, an individual who successfully claimed back a factory confiscated by either the Nazis or the communists must pay a property tax. This will be based on the 1935 land valuation, which is then multi-

plied by 10. After five years the claimant must pay a third of that sum to the Finance Ministry. If the claimant cannot pay, the property would be sold.

A Finance Ministry official aid yesterday: "I really do believe that the lawyers will say the bill la unfair, if not immoral, because claimants have to pay for something which was stolen from them in the first place. But I don't know if they will be able to prove it is unconstitutional."

Ministry officials expect the hill wilt stay more or less intact despite opposition from the CSU and east German poli-It is due to go back to the

fresh discord among left

By David Buchan in Paris

MR Micbel Rocard yesterday sowed further dissension in bis Socialist party, which faces electoral defeat in Sunday's general election, by repeating his open criticism of President François Mitterrand.

In an interview in Le Figaro newspaper yesterday, Mr Roc-ard, considered the party's likely standard-bearer in the 1995 preaidential election. toned down eariler remarks that Socialists were generally being victimised by an elector-ate which had "personal scores to settle" with Mr Mitterrand.

Popular sentiment against the president was "without doubt unjust", and Socialists had to accept some of the blame for it, he said. A recent poll showed 62 per cent of vot-ers disapproved of Mr Mitterrand's performance, and only

24 per cent approved.
However, Mr Rocard went on
to criticise Mr Mitterrand for failing, following his 1988 presidential election victory, to reach out properly to parties to the left and cantre of the Socialists. The president bad chosen to deal "with individoals and nnt with political forces". This was why, Mr Rocard sald, he bimself had recently called for a "big bang" recomposition of the left after this month's election.

The criticism, four days before the first round of parliamentary voting, provoked emharrassment and anger among Socialists. Mrs Martine Aubry, labour minister, accused Mr Rocard of political cowardice. "To blame others,

whether within or outside one's party, ahows a lack of courage and is especially worrisome for the rebuilding of the left," she sald. In a reminder that Mr Rocard was prime min-ister from 1988 to 1991, she said: "it's a collective failure."

Mr Michel Sapin, finance minister and a Rocard protégé, said his mentor "could have spared us such unnecessary lit-tle comments". Mr Charles Pasqua, a bard-line Gaullist, lauded Mr Mitterrand for at least having had the courage during the campaign to "climb to the bridge of the slnking Socialist ship and to tie himself to its mast, in the old navy tradition"

The Rocard-Mitterrand rift

reflects long-standing personal rancour, but may just be a foretaste of internal Socialist recrimination. It overshadowed the government'a last pre-election cahinet meeting. That gathering produced a proposal to use privatisation proceeds to fund state pensions, calls for the EC to raise fish prices to help distressed French fishermen and demands that Brussels desist from deregulation of European utility monopolies.

Oplnion polls show that

Rocard sows The Lang show is hard act to follow

French Socialists have made the arts a success story, writes Alice Rawsthorn

AY after day hundreds of people queue paliently, and not so patiently, on the square outside the Georges Pompidou Centre in Paris waiting to buy tickets for the Matisse

The Matisse show has been billed as a highlight of the European arts year. It is also an appropriately grandlose final fling for France's Socialist government. which, after a decade of lavish support for the arts, faces crushing defeat in the parliamentary elections, for which the first round is held this weekend.

Despite the general disenchantment with the Socialists, the arts is one area where they are still deemed to be successful, thanks partly to the personal standing of Mr Jack Lang, the charis-matic minister of arts and culture who consistently tops the polls as France's most popular elected politician.

Few political acts are genuinely Impossible to follow but that of Mr Lang, 53, is probably one of them. He is a flamboyant figure with apparently indefatigable energy and a taste for snappy designer suits, who has dominated the French arts scene since the Socialists first took power in 1981. Libération, the bible of French culture buffs, even calls the 1980s l'époch Lang, the Lang era.

The conservatives now face the unenviable task of finding a way of following Mr Lang after the elections.

Prench culture has had a new lease of life in l'époch Lang, when the propor-tion of the state hudget allocated to the arts has doubled from 0.5 per cent in 1981 to 1 per cent, or FFr13bn (\$2.3bn), in 1993. Mr Lang has also pulled off the rare feat of developing popular and innovative policies. He has done so by blending alements of conventional Socialist cultural dirigisme, such as state subsidies and industrial restructuring, with new themes, notably corporate sponsorship.

Mr Lang has even plundered some ldeas from the conservatives. The Grands Projets, the monumental modern architecture schemes including IM Pei'a glass pyramid in the Louvre museum and Jean Noovel's Arab cultural centre, are his most visible legacy. But they trace their roots to the 1970s review of public sector building com-

Jack Lang, flamboyant and indefatigable, has long dominated the arts scene

missioned by the conservative President Valery Giscard d'Estaing.

Mr Lang's record is far from flawless. French television is in a fragile financial state, which culminated in last year's collapse of La Cinq, the entertainment statioo. The Paris opera strug-gles from crisis to crisis despite an annual budget of FFr800m (two-thirds of which comes from the state) and the

opening three years ago of the glitter-ing FFr3bn-Bastille opera house. The Lang regime, long criticised by the right, is now under fire from his old supporters on the left. The latest film from Eric Rohmer, The Tree, The Mayor and The Mediatheque, is a scathing satire of a Socialist mayor who secures a generous grant from the Arts Ministry to build a media complex in his tiny

village. Le Canard Enchainé, the satirical magazine, recently published a leaked story about Mr Lang's plans to produce a film about his own achieve-

But the electorate seems willing to overlook Mr Lang's shortcomings, as illustrated by his success in the opinion polls. This has left the conservative coalition of the RPR and UDF in a difficult position. Mr Lang, the epitome of the sybaritic gauche caviar who have thrived under President Mitterrand, is exactly the sort of Socialist the conservatives most loathe. Moreover an extravagant Socialist arts minister is an easy campaign target.

the defensive in the election campaign. This is partly because of Mr Lang's popularity and partly because of an internal split. The UDF favours an ascetic approach to cultural spending: the RPR, whose leader, Mr Jacques Chirac, comes close to rivalling Mr Lang with his munificent cultural budgets as mayor of Paris, is more indulgent.

All that the conservatives have produced in terms of policy is a pledge to erase what they call the "cultural inequalities" of Mr Lang's policies by fostering cultural activity in the provinces and giving more power to local authorities to launch their own arts ini-

This sounds suspiciously similar to both the Socialists' owo arts manifesto and to the policies pursued by the last conservative government between 1986 and 1988, when, despite constant debates over whether to scrap various Lang programmes, the right did little to reverse his policies.

The conservatives are also searching for a suitable successor. Mr Alain Carignon, mayor of Grenoble, and Mr Jacques Tubon, secretary geoeral of the RPR, have been mooted as candidates as has Mr Bernard-Henri Levy, the populist philosopher whose girlfriend, Ms Arielle Dombasle, stars in the new Robmer film.

Mr Lang himself bas always maintained that the true test of his influence will be whether his reforms survive his departure from his opulent offices at the Palais Royal in Paris. He will soon

Turkey is offered ceasefire by Kurds

By John Murray Brown

TURKEY'S Kurdish rebels declared a unilateral ceasefire yesterday, promising to end bostilities for 25 days if Turk-ish government forces agreed to hold to their positions.

The offer was greeted by Kurdish deputies in Turkey's parliament as an opportunity for a breakthrough in the eight-year insurgency which has claimed more than 5,000 lives. However, the proposal delivered by Mr Abdullah Ocalan, leader of the rebel Kurdish Workers party (PKK), is likely to be met with considerable official scepticism after recent government successes against PKK bases in Turkey's Kurdish-speaking south-east. State television made no mention of the offer.

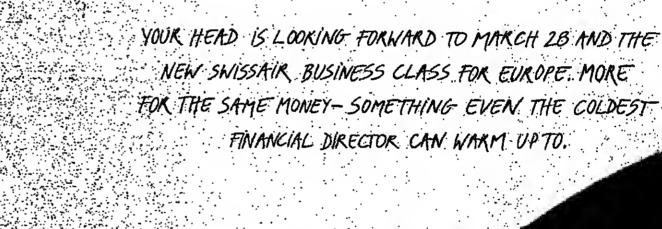

Mr Ocalan, known as Apo. made the offer from his headquarters in Lebanon, undertaking to suspend actions from March 20 to April 15, as a goodwill gesture to coincide with

the Nevrouz or Kurdish new year celebrations on March 21, This week Mr Suleyman Demirel, Turkey's prime minister, called for nationwide vigilance to avoid last year's "nightmare", when more than 90 people were killed as the government used armoured vehicles to reassert control in towns along the border with Iraql and Syria. The govern-ment blamed the PKK for exploiting the festivities to pro-

Since then, the PKK bas been under intense diplomatic and military pressure, with reports that Syria bas withdrawn its support. Iran, too, is distancing itself from the rebels. The move follows a concerted diplomatic initiative from Ankara.

Turkey bas also won tacit backing from the Kurds of Iraq, underlined last October during a sweep hy Turkish commandos when PKK units were forced from the border where they had attacked Turk-

voke a separatist insurrection.

Greece forecasts growth of 2%

By Kerin Hope in Athens

THE Greek economy ministry forecasts that growth this year will be stimulated by a sharp rise in investment, with gross domestic product increasing hy 2 per cent.

According to the ministry'a economic overview for 1993, overait investment witt increase by 7.2 per cent, led by a 10.9 per cent rise in the public sector, which will benefit from generous European Community transfers for tnfrastructure spending.

Private investment is expec-

Hong Kong greets Patten with a very Asian smile

Simon Holberton samples views on UK row with China

Kong affairs, was laying down the law about Hong Kong in Beijing yesterday afternooo, Mr Chris Patten, the colony's governor, was out and ebout indulging in whet be likes to call "a little retail ther-

In the streets of Hong Kong's central business district and the neighbouring Western district of Hong Kong island Mr Patten was greeted by hun-dreds of Hong Kong citizens. "Hello, how are you?" he called out. They cheered,

laughed and smiled But the Asian smile is a deceptive thing. To many ordinary Hong Koog citizens the davelopments of the past few days are perplexing and trou-bling. Happy as they were to see their governor, many have found his behaviour toward China baffling at best, and unwise at worst.

Reaction to Mr Patten's decision last Fridey to publish his legislation for more democracy in Hong Kong may have been more than a little conditioned by China's adverse reaction. But then it is Hong Kong which will have to live with its northern neighbour in four year's time.

As the owner of a trading firm in Western said yesterday:

S Mr Lu Ping, China's top official on Hong Kong people a cheqoa that will

His view was echoed by a businessman who had earlier stopped on Hollywood Road, in Central, to catch a glimpse of the governor. "Tha British have been sleeping for more than 100 years. Why democracy now? The row is hurting Hong Kong, but what does he have to lose? He will leave."

n Queen's Road Central Mr Patten found himself accosted by a group of democrats holding a banner proclaiming "Hear the voice of Hong Kong democracy" and chanting: "Submit the bill to the Legislative Council; Resume Sino-British Talks; Hear the voice of Hong Kong.

Their chanting, however, summed up the central dilemma for British policy makers and Chinese ones too. Hong Kong wants a number of mutually exclusive things. It wants more democracy, but it wants Britain and Chins to work it out together; ln its almost deferential way it wants to be heard hy both, and it wants a quiet life.

A lot of middle-class people in Hong Kong have decided that China will not listen and that the colony is not a place

emigrated, mostly to the US, soon thereafter.
Canada and Australia, up from The betting in

60,000 in 1991. The row is also sapping the optimism of many who thought they had made their peace with China and 1997. The finance director of a large Chinese company, aged in his mid-40s, explained the reaction of

many of his friends.

"Over the past couple of years we had all decided to stay. China was moving in the right direction; the Basic Law [the mini-constitution, published in 1990 by Beljing, for Hong Kong after it reverts to Chinese sovsreignty] wasn't perfect but it was OK. Now, with the way China has reacted to Patten, a lot of my friends are saying they can't take four more years of this. They would rather take their families elsewhere and live a

A Hong Kong Chinese law-yer, who had emigrated to Canada but was thinking of return-ing to live in Hong Kong said: "Maybe Patten has done us all a favour. He has made China show its true face."

quiet life."

The tone and substance of Mr Lu's remarks in Beijing yesterday make it unlikely that Britain and China will be able to discuss the arrangements for Hong Kong's 1995 elections. That being so, Mr Patten is where they can enjoy a quiet likely to table his legislation life. Last year 66,000 of them before LegCo's Easter recess or

The betting in Hong Kong's political circles last night was

that LegCo will do its best to give China what Beijing falled to extract from the British in negotiations, in short make the legislation less democratic than Mr Patten has proposed. The majority in LegCo for Mr Patten is getting slimmer and the group which wants to has-ten slowly to more democracy is getting larger.

Britain is prepared to accept LegCo's verdict, but how China would respond is unclear. Beijing has always said it will not accept a "made in LegCo" compromise to its dispute with Britain. It has maintained that LegCo is simply an "advisory body" of little consequence and that the 1995 polls are a matter for the current and future sovereign

S African budget tries to 'face facts'

By Patti Waldmeir and Philip Gawith in Cape Town

MR DEREK KEYS, the South African finance minister. yes-terday presented a tough budget aimed at restoring fiscal discipline while boosting economic growth.

Presenting his first budget, Mr Keys sharply cut the corporate tax rate, from 48 to 40 per cent, in an attempt to promote investment and spur growth after four years of recession. He clawed back part of the concession by imposing a 15 per cent tax on distributed profits. However, the net effect will

be sharply to cut the effective tax rete for most companies, a key element of the economic restructuring plan published hy Mr Keys last week. Compa-nies which reinvest s large pro-portion of profits will enjoy a substantial tax incentive. Business leaders welcomed

the attempt by Mr Keys, former chairman of the mining house Gencor, to halance tha need for fiscal discipline with the imperative of promoting growth. Government current spending is to be cut substantially in real terms - another important element of the restructuring - with the spending increase held to 6.5 per cent against projected inflation of 10 per cent. Defence spending is to fall hy some 14 per cent in real terms, its fourth successive sbarp annual decline.

Total spending will rise to R114hn, an increase of S.8 per cent on 1992-93, with revenue rising 16.5 per cent to R&90n. leaving a deficit equivalent to 6.8 per cent of gross domestic product. This remains high, hut represents a substantial drop from last year's 8.6 per cent deficit.

Consumers will suffer under the budget, which was delivered against a difficult political background as the transition to democracy fuels popular demands. Value added tax was increased from 10 to 14 per cent, a move which drew immediate criticism from the African National Congress, despite the fact that certain basic foodstuffs were zero-rated in an sttempt to mitigate lts impact on the poor. Petrol prices rose 10 per cent.

The hudget made a further attempt to help poor hlacks hy raising the level of state pensions for Africans to the same level as white pensions, an per cent. Many black families. especially in rural areas, rely almost entirely on state pen-

sions for income.

Mr Keys said the budget was an honest attempt to face facts and produce a vision for

the future." Dr Conrad Strauss, chairman of the Standard Bank group, commended the company tax initiative as "very pyschologi-cally important" and the curb

placed on state spending. Retallers. however, expressed concern. Mr Raymond Ackerman, chairman of Pick 'n Pay, the country's largest supermerket group, said the consumer would be "hit between the eyes, husiness confidence damaged and eco-nomic recovery delayed.

Seoul interest rate move delayed

South Korea's government is delaying plans to deregulate most interest rates until the second half of the year, writes John Burton in Seoul. Mr Hong Jae hyong, finance minister, said deregulation could increase interest rates and further slow economic growth.

North Korea's sabre in danger of becoming blunt

John Burton reports on Pyongyang's fear of losing its military advantage as Seoul increases defence spending

HE North Korean guards at the truce village of Panmunjom are wearing steel helmets rather than their normal military caps. The country has sealed its bor-ders to foreign visitors, while a dusk-to-dawn blackout has been declared for the capital Pyongyang. Even as North Korea goes on a

"semi-war" footing in response to military exercises in South Korea, the sabre it is rattling is large but in danger of becoming blunt. Although North Korea outnum-hers South Korea in troops and

weapons, its advantage is being eroded as more and better weapons are acquired by the South, which has doubled defence spending since 1986 as its economy rapidly expands.

The military balance between the

two Koreas has reached the point where neither side could gain a decisive victory on its own, although South Korea has the advantage of being able to call on the support of the US military if war should ever

HOW KOREAN FORCES North South Korea Korea

1.32m 633,000 Armed forces Other armoured Multiple rocket launchers Mortars Patrol craft Source: WSS Military Balance 1992-93

North Korea is helieved to he developing a nuclear weapon as a relatively cheap alternative to

counter the South's growing military Less publicised have been claims that North Korea is also developing an extensive arsenal of biological and chemical weapons, which Seoul the medium-range Scud missile. believes Pyongyang wants to use as a strategic bargaining chip in negotiations with the South.

North Korea has the fourth largest armed forces in the world, with 1.3m meo under arms, according to the International Institute for Strategic Studies. With a population of 22m, this makes North Korea the most militarised country in the world. The South Korean military is almost half its size with 633,000 soldiers ont of a population

North Korea also enjoys a clear quantitative advantage in weaponry against the South, with a two-to-one ratio in tanks, artillery, and combat aircraft and the exclusive possession of attack submarines, the third largest fleet in Asia.

North Korea has built up an extensive arms industry in the past 20 years. It can produce most of its armoured equipment, naval surface vessels and submarines, while it has developed an indigenous version of

Weapons have become one of North Korea's main exports, particularly Scuds to Syria and Iran, although it is estimated that Pyong-yang suffers an overall arms trade deficit. But its greatest weakness lies in its combat aircraft and other sophisticated military equipment. Two-thirds of its jet fighters date from the Korean War era and it depended on the former Soviet Union for the supply of high-perfor-

mance fighters. But relations have cooled between Pyongyang and Moscow in the post-Cold War period. Russian President Borls Yeltsin announced last November that Moscow would halt arms shipments to North Korea, shutting off the supply of advanced MiG-29 fighters that Pyongyang was just beginning to acquire.

North Korea's pursuit of a self-suflicient defence structure has pisced an enormous hurden on the economy. As much as 30 per cent of gross national product is devoted to

defence against 5 per cent in South much warning.

Although the US has based its mil-

Growing economic problems, including difficulties in importing oil due to a lack of hard currency, are also believed to be affecting North Korea'smilitary readiness. The US estimates that training

time for North Korean pilots is decreasing because of the fuel shortage. There are also eyewitness reports that North Korea is using soldiers and military vehicles for civil construction projects due to economic problems.

A lack of hard curreocy will severely curb the purchase of military equipment and even spare parts from abroad, although North Korea might be able to get some supplies from the Middle East in exchange for Scud missiles.

Nonetheless, North Korea remains a serious threat to the South. The US estimates that 65 per cent of North Korean forces are stationed along the demilitarised zone (DMZ) and could launch an attack without

ltary planning on the premise that North Korea can support a war using its own resources for up to three months, independent analysts believe that Pyongyang could face difficulties much earlier due to its inefficient industrial base and poor transport infrastructure.

North Korea would probably fol-low the strategy it used in 1950, when it last attacked South Korea, by initially aiming to capture Seoul, just 35 miles from the DMZ, according to the US Defense Department. But in most other respects, cir-

cumstances have changed greatly since 1950. North Korea then was tempted to invade because the South was suffering from domestic political turmoil, its army was weak and inexperienced, and the US had no troops in the country. Moreover, North Korea has the support of the Soviet Union and China. None of those conditions exist today. See Editorial Comment

IAEA meets on N Korea

EFFORTS TO persuade North Korea to allow further nuclear inspections will be stepped up today at a special board meet-ing of the International Atomic Frances Atomic Energy Agency in Vteuna, writes David White, Defence Correspondent.

The meeting of the agency's 35 governors follows North

Korea's announcement last week of withdrawal from the nuclear non-proliferation treaty and tension over the Team Spirit US-South Korean military exercises.

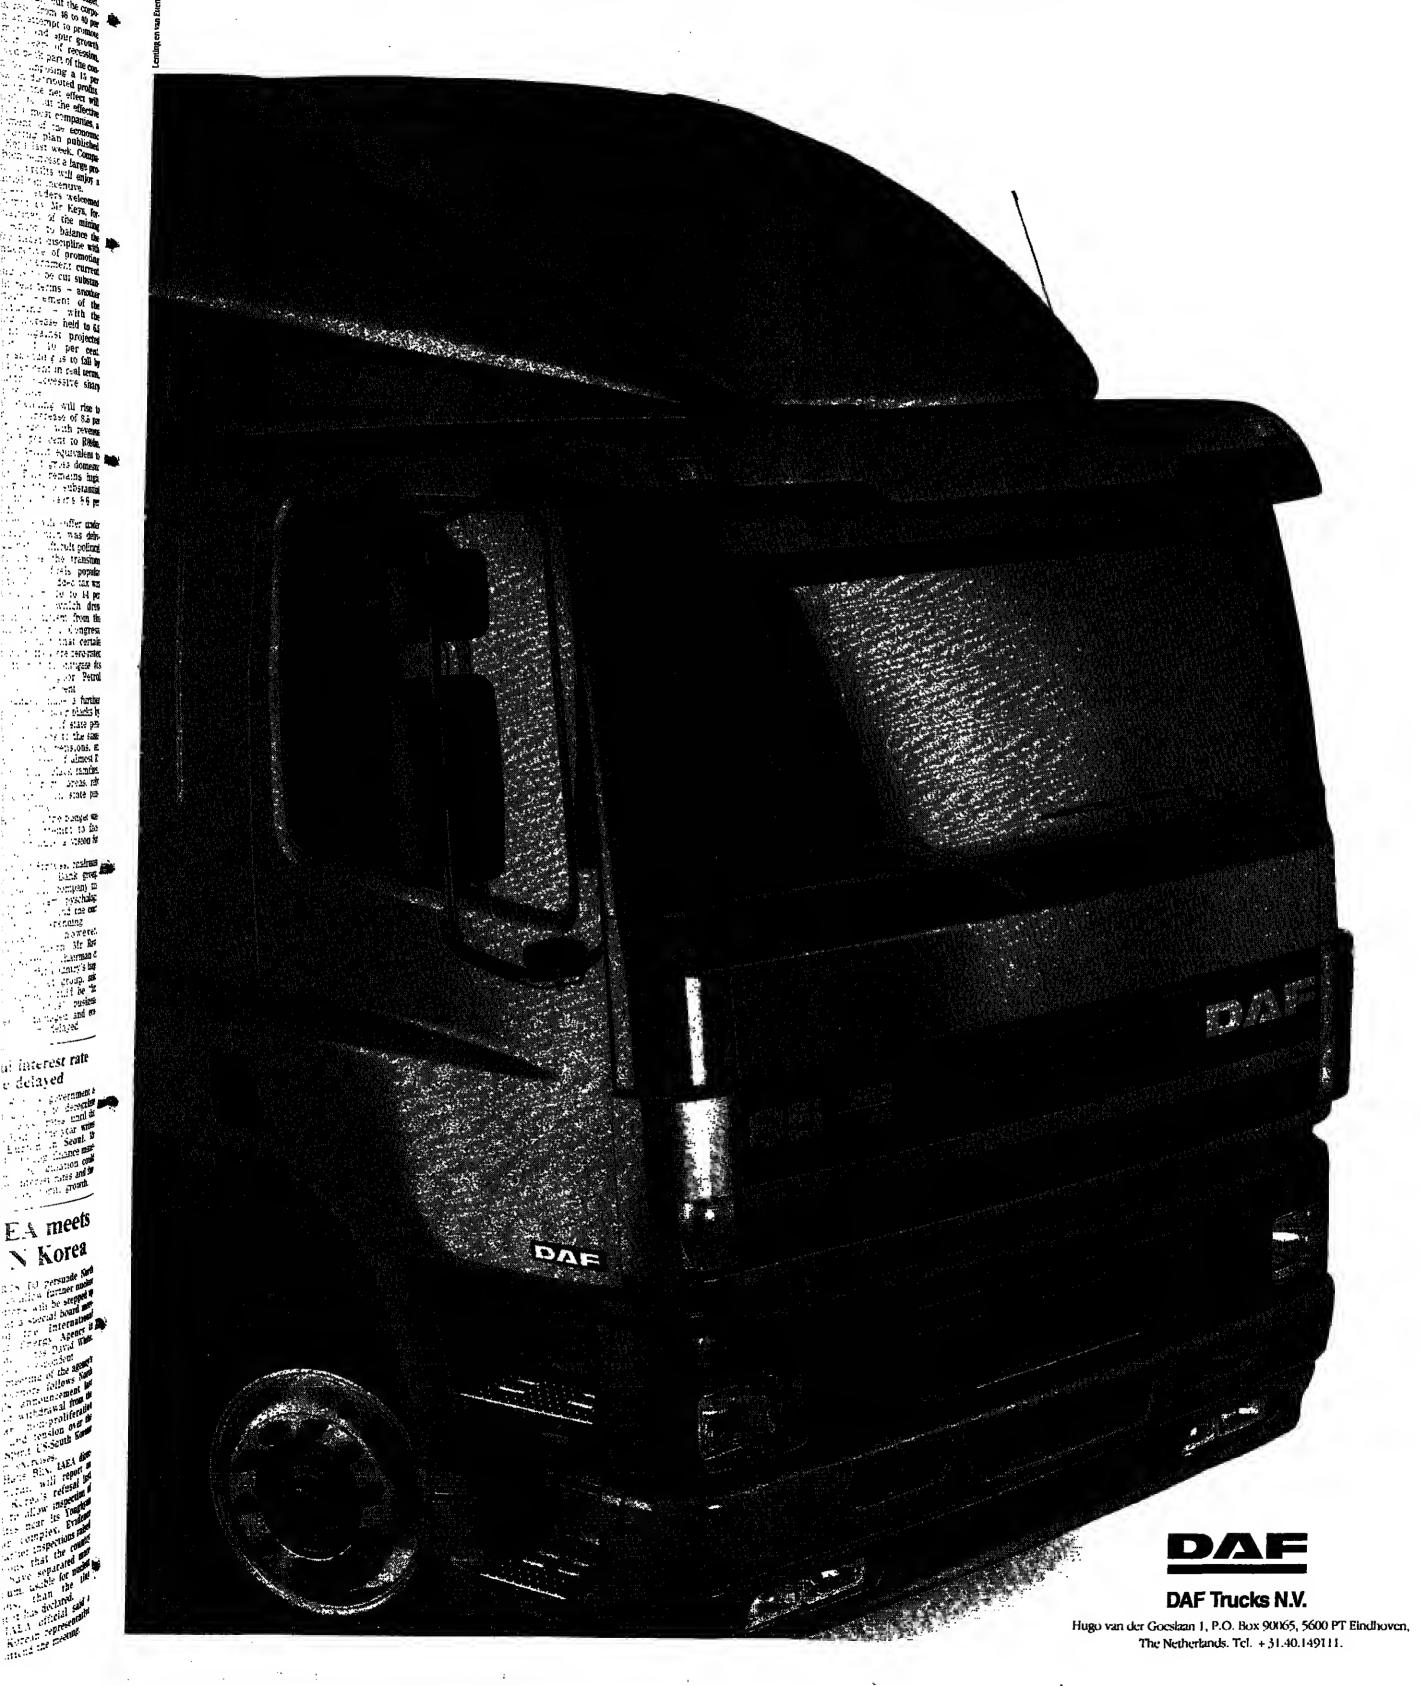

Mr Hans Blix, IAEA director-general, will report on North Korea's refusal last month to allow inspection of two sites near its Yongbyon nnclear complex. Evidence from earlier inspections raised suspicions that the country might have separated more plutonium, usable for nuclear weapons, than the tiny amount it has declared.

An IAEA official said a North Korean representative might attend the meeting. FINANCIAL TIMES THURSDAY MARCH 18 1993

THE NEW DAF IS LIKE ITS TRUCKS

DAF Trucks N.V. is the new enterprise which has taken over the development, production and marketing of medium-heavy and heavy trucks from the former DAF company. It is a strong business with a **solid financial foundation**, an efficient organisation and an ultra-modern product line. DAF Trucks is backed by a **wealth of experience**: 65 years of development and production. Clear insight into transport and logistics. And a commitment to both businessmen and drivers. The new DAF is like its trucks: sound, efficient and modern. **Top-class products** worth every penny of their

market. Never has the international trade press been so unanimously enthusiastic as it is about the new **DAF 65**, **DAF 75** and **DAF 85** series. The performance of the flagship - the **DAF 95** series - still sets the trend in the transport field. DAF Trucks ensures that a complete range of services is offered, geared to customers' needs: maintenance, repair, spare parts supply and, both nationally and internationally, a unique **24-hour service system**. A certainty that applies to all existing DAF vehicles.

US industrial production up by 4.3%

US INDUSTRIAL activity continued to grow at a strong pace last month as inflation remained steady, feeding hopes of a sustained economic

The US Federal Reserve Board said industrial production rose by 0.4 per cent in February, the fifth month in succession in which it has increased. Output showed a 4.3 per cent gain over the past 12 months, the Fed reported.

Despite a dip in output of motor vehicles, production of consumer goods rose 0.6 per cent in the month to a level 5.3 per cent higher than a year ago, while a 0.3 per cent monthly gain left production of business equipment 8.2 per cent up over the past 13

Excluding motor vehicles and parts, output of consumer goods rose 0.8 per cent in February and output of husiness equipment 0.5 per cent.

Factories and plants operated at 79.9 per cent of capacity in Fehruary, the highest rate for 18 months, the Fed said.

At the same time, the Commerce Department said the consumer price index climbed by 0.3 per cent in February. taking the year-on-year infla-tion rate a notch lower to 3.2

Excluding volatile energy

ing this core rate of inflation higher to 3.6 per cent year-onyear and prompting some concern about a revival of inflationary pressures.

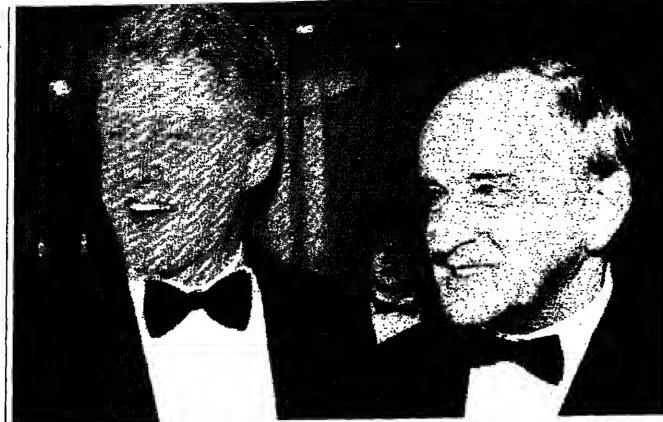

But economists said much of the rise was attributable to a predictable increase after seasonal adjustment in clothes prices, caused by retailers starting their sales much ear-lier than usual and having little room left to offer further discounts, as they would usu-ally do in February.

We believe overall material costs remain moderate. Overall, we expect inflation to average just 2.8 per cent in 1993 compared to 3.0 per cent in 1992," said Wall Street broker-

age company Merrill Lynch.

The twin towers of the World Trade Centre, shut hy a bomh that destroyed communications and safety systems, will start to reopen today ahead of schedule, officials announced yesterday, Reuter reports from New York.

New York state Governor Mario Cuomo, who has an office in the huilding, will today be the first tenant to return. Others will return tomorrow, the Port Authority of New York and New Jersey, which manages the complex, said. The Anthority had previously set an April 1 target for reopening the towers. The bomb blast in a car park on Fehruary 26 killed six people.

President Bill Clinton with Irish premier Albert Reynolds in Washington

Clinton 'serious' on Ulster mission

By Jurek Martin

PRESIDENT Bill Clinton yesterday said he was still giving "serious consideration" to sending either a special US envoy or a fact-finding mission to help end the sectarian violence in Northern Ireland. But he declared that "the most significant thing I should be doing now is to encourage the resumption of the dialogue

between the Irish and the British governments".

St Patrick's Day meeting in the White House with Mr Albert Reynolds, the Irish prime minister. Mr Reynolds applauded Mr Clinton's determination to contribute to a solution in Ulster, adding that the US "has the potential to be uniquely

But Mr Reynolds ducked questions about whether he would support either of the two initiatives under consideration. The UK government is opposed to the despatch of an envoy but had indicated a willingness to accept a fact-finding mission, depending on its terms of reference. Mr Clinton stressed that "I don't think the US can make

peace in Northern Ireland and I don't think that the unionists and the nationalists and anybody else would expect that". He added, without elaboration, that he still supported the MacBride principles intended to ensure that discrimination not practised in any foreign

investments in the province. Mr Clinton also announced the nomination of Mrs Jean Kennedy Smith, sister to the three

Kennedy brothers, as the next US ambassador to Dublin.

Such modest US political pressure as there was on Mr Clinton to intervene in Ulster has, if anything, abated since the visit of Mr John Major, the British prime minister, last month. Yesterday a ritual St Patrick's Day motion condemning violations of human rights in Ulster and urging Mr Clinton to send an envoy was introduced into the House for the record by Congressman Hamil-ton Fish, New York Republi-can, but it was not debated.

Salvador amnesty for war criminals

By Damian Fraser

EL SALVADOR'S congress is set to amnesty all those named hy a special United Nations commission as responsible for war crimes and other human rights abuses during the country's decade-long civil war. The commission said the vast majority of abuses were committed by the army, or death

An ally of the right-wing Arena party is expected to introduce the legislation today. Arena and its allies coutrol the congress. Opposition parties are link-ing support for the amnesty to implementation of the main

UN recommendations, such as dismissal of the Snpreme Court, and removal of military officers responsible for abuses. In Washington, Congressman Robert Torricelli, chairman of the sub-committee on the western hemisphera, accused the Reagan adminis-tration of lying about the role of the Salvadoran army in the atrocities, and he would consider whether Reagan officials

government received \$6hn (£4.2bn) in US aid in the 1980s. The UN Commission catalogued numerous crimes committed by the army, including that there was substantial proof that General Emilio Ponce, the defence minister who resigned on Friday, and other senior officers planned the murder of six Jesuit

cuts would have to be debated in a later hudget reconciliation bill, when support might start to coalesce behind individual spending programmes now pencilled in for cuts. The House is expected to

get resolution that would cut the deficit hy a total of \$510bn debate one or two substitute budget resolutions offered by over the next five years through a combination of the Republican minority, as spending cnts and tax well as an alternative proposed by the congressional Black Caucus, which would make There is a snostantial majority within the caucus to deeper cuts in defence to pay enact the package," said Mr Thomas Foley, the for increased spending in areas such as education. Speaker of the House of Repre-

The first Republican substitute, backed by Congressman John Kasich, the senior minority member of the Budget committee, would lower spending hy \$429bn over five years, cutting out all the spending increases planned by President Clinton, as well as his proposals for tax increases.

A second Republican substitute, backed by Congressmen Gerald Solomon and Steve Gunderson, would cut spending, keep some of Mr Clinton's tax increases on the wealthy. hut eliminate the proposed energy tax.

It remained unclear yesterday morning, however, just how many smendments the powerful Rules committee would allow to be brought up.

Brazil still has no budget for 1993

By Christina Lamh,

THREE months after it should have been voted by Congress, Brazil has no hudget for 1993. Six months into office, the government of President Itamar Franco has still not filled thousands of administration jobs.

The delays are the fault of congressmen who, with their eyes oo next year's elections, are demanding government jobs for supporters and money for projects in their areas as reward for their support for President Fernando Collor and for voting through government legislation.

Brazil's highly fragmented party system means that each bill must be negotiated with 19

This year, the hudget commission received a record 75,000 requests for the \$9hn which Congress controls of the government hndget. On Sun-day, Mr Messias Gois, the com-mission's president, fled in tears from negotiations after being attacked by the proponents of 5,000 amendments excluded from the commission's proposal.

It seems to matter little what the projects are for. The latest budget proposal awards more money to Bahia than to Amazonia for combating malaria. yet the disease is almost unknown in the first and endemic in the latter. It reduces to a third the government provision of resources for land reform - one of Brazil's higgest problems. The most popular requests are bridges and roads, hecause of the potential commissions and electoral appeal.

Some deputies are even

directors of engineering com-panies, Mr Paes Landim, a deputy who suggested using the army for road construction, had his amendment shot down, he believes "because the army

don't pay commission".

Complaining that Brazil was ending up with schools where it needs sewerage and hridges where it needs hospitals, Mr Paulo Bernardo, the Workers' Party representative on the commission, said: "This is becoming a complete marketplace." Mr Gois told the Brazilian press that he had been deputies to accede to their requests.

Finally this week, a compro-mise was reached by the com-mission, but it must still pass through Congress. Waiting impatiently is Ms Yeda Cruslus, the planning minister, unable to plan without the

Little better is the process under way to fill jobs in ministries, government agencies and state companies. Mr Franco's wide congressional support means 18 parties, further divided into regional blocs, jos-

tling for positions.

A group of deputies from Minas Gerais state have set up a system whereby they award points for federal jobs in their state such as running state companies. Points are then awarded to the deputies according to the level of support they have given to Mr Franco. All then have the right to spend their points.

None of this is very inspiring

for Brazilians, who vote next month in a referendum on whether to maintain a presidentilal system or return to a parliamentary system and even a monarchy.

Clinton envoy to step up pressure on Haiti leaders from Mr Clinton or by Mr Aris-

PRESIDENT Bill Clinton is increasing the pressure on Haiti by sending an envoy to tell the army leaders, who took power in a coup 18 months ago, that his patience with them is

The president fears a flood of Haitlans seaking asylum unless the political crisis in Haitlis resolved and Mr Jean-Bertrand Aristide, the president who was anotherway and dent who was overthrown and sent into exile by the army, returns to office.

Mr Clinton's decision was announced after a meeting on Tuesday with Mr Aristide. But the US president refused to announce a deadline for his return to office.

Diplomats in Port-au-Prince. Haiti's capital, yesterday said the military leaders, and tha small but affluent elite which backs them, were unlikely to be moved either by a message

tide's moderation of his conditions for a return to office. The intervention by Mr Clinton is the strongest statement yet by a US president in sup-port of efforts to end the politi-

The president fears a flood of Haitians

seeking asylum cal crisis in the Caribbean

state of 7m people. Earlier efforts to reinstall Mr Aristide, including an eco-nomic blockade of Haiti, have failed, and Mr Aristide has uestioned the willingness of the US and other countries to press the coup leaders out of

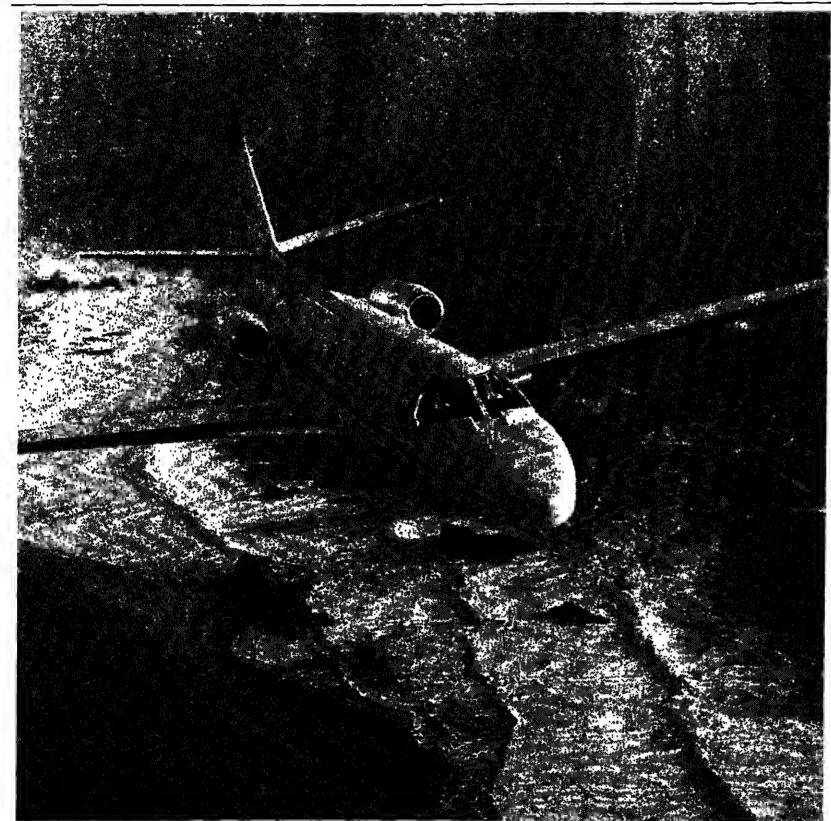

Envoys in Port-au-Prince say, however, that the country's rulers have established

sufficient economic supply lines to allow them to continue defying efforts to have Mr Aristide returned. They expect lit-tle change after the visit by Mr

Clinton's envoy.

But Mr Clinton is backing his initiative with support for a proposed \$1bn (£700m) develop-ment fund for Haitl from international financial institutions, to be spread over five years after the elected government is restored. This promise of sig-nificant aid for the economi-cally distressed country could hring increased popular pressure on the military rulers, who have traditionally reacted ruthlessly and violently to dis-

The renewed pressure against the army leaders also coincides with the return to the country this week of Mr Dante Caputo, a former foreign minister of Argentina and now a special UN envoy who has been trying to broker a resolution of the political crisis

At the top of the best-seller list for three straight years.

For three years running, the Citation V has not only outsold every other business jet, it has outsold every business turboprop

as well. Usually by a 4-to-1 margin. Why? Because the Citation V does so many things so well

It cruises at nearly 500 mph - over 100 mph faster than the comparably sized turboprop. Yet it can take off and land on runways shorter than the turbo prop, or any other business jet, can use.

The all-new interior is more com-

fortable and appealing than ever. This exceptionally quiet cabin is the longest in its category, and provides spacious

double-club seating for eight passengers. Yet the Citation V costs less to operate than the King Air 350. We guarantee it. No other comparably priced business iet offers this combination of perform-

ance, comfort, reliability and economy.

Neither does any turboprop. After three years at the top of the world's best-seller list, why does the

Citation V still receive rave reviews? Open one up and see for yourself. For more information, call

The state of the s

de ence to par

over market share targets

in Tokyo

JAPAN will vigorously resist any pressure to accept further market share targets nr any other numerical measure of market openness, a senior offi-cial at the Ministry of Interna-tional Trade and Industry said

Mr Sozahuro Okamatsu, director general of Miti's international trade policy bureau. said Japan was not in a position to accept proposals from the US to grant a specific market share for a product because Japan was "not a etate-planned

Mr Okamatsu's remarks come as the US and Japan prepare for government-level talks in Hawaii to assess the progress made hy the US-Japan semiconductor arrangement, which the US Industry has interpreted as a commitment to raise the foreign market share of the Japanese chip market to 20 per cent by the

end nf 1992. Calls have also been growing in the US to adopt specific mar-ket share targets to measure progress made in opening foreign markets, particularly in

The US advisory committee on trade policy and negotia-tions, a trade advisory panel chaired by Mr James D Robinson, outgoing chairman of American Express, has submitted a recommendation to President Bill Clinton calling for the use of quantitative indicators which would estimate the dol-

informal trade barriers. The US insistence on a 20 per cent market share in chips reflects its long-held frustra-tion in trying to npen the Japanese market as well as the belief that a clear, measurable target is necessary to achieve

Japan says it has never accepted that it is committed to granting a 20 per cent for-eign share of its semiconductor market and is keen to head off any attempt to introduce fur-ther such targets.

"We are a market-oriented economy so we cannot promise any market share to be taken by foreign products," Mr Oka-matsu stressed.

"The EC is also taking a keen interest in our bilateral talks with the US. If Japan promised market share in specific sectors to tha US, the EC will also want the same thing. We cannot agree to it," he said. Japan faces calls from the US for greater access tn its paper, car car-parts and con-

struction markets. Lack of progress in an agreement made by the five largest Japanese car manufacturers to make efforts to buy \$19bn (£13.3bn) of US car parts and import 20,700 US cars was critlcised on Tuesday by Hnuse Majority Leader Richard

The US and Japan are also conducting this week a review of a hilateral construction market access accord which Washington claims Japan has not complied with so far.

Tokyo digs in US and Japan square up over chip deal

Whether it is a deal is itself in question, write Louise Kehoe and Michiyo Nakamoto

Y S and Japanese trade officials and industry executives meet In Hawaii on Sunday to review progress on semiconductor trade. Tensions are high on both

The talks could be a watershed in a dispute that has tarnished US-Japan trade relations for the past decade. They are the first formal meetings between US and Japanese trade officials since President Bill Clinton took

At issue is foreign access to the \$20bn Japanese market for these crucial components - sometimes known as "chips" - in modern electronic circuits. After long and hested negotia-tions, the US and Japan drew up a bilateral "arrangement" on semicon-ductor trade in 1986. With no substantive changes on the market access issue, the pact was renewed for five years in 1991, giving Japan more time to achieve increased imports.

A deadline was set for the end of 1992, by which time the Japanese government agreed that "the expectation of the US semiconductor industry that the foreign market share will grow to more than 20 per cent of the Japanese market" should be achieved. Japan "considers that this can be realised," the agreement stated

The market share data for the final parter of 1992 are due to be released in the next two days. They will set the tone for the trade talks.

Already, industry and envernment officials in both countries bave

Ron Brown: 'Prepared to act' acknowledged that it is unlikely that the 20 per cent "expectation" will be met. In the third quarter of 1992 the foreign market share reached 15.9 per cent, its highest level since the signing of the 1986 agreement, when it stood at 8 per cent.

Another increase of one or two per centage points is expected in the fourth-quarter data. It might even be higher, some suggest, because the size of the Japanese market declined last year as sales of consumer electronics products slowed

However, Mr Mickey Kantor, the US trade representative, said last week

Chip portions Foreign market share in Japan as defined by the 1991 US-Japan Semiconductor Agreement (%)

that he would regard anything less than 20 per cent market share as "serious, a commitment not kept". "And we would begin our discussions from that point. A deal is a deal," he said.

1986 87 88 89 90 91 92

Japanese government and industry officials argue that they have kept their side of the bargain. The Electronics Industry Association of Japan (EIAJ) notes that since 1986 foreign market share has doubled and that sales of foreign-made semiconductors in Japan more than tripled to over

\$3bn in 1991. There has also been a significant

increase in the establishment of long-term relationships between US chip suppliers and Japanese customers and in the number of "design-ins" when US chips are designed into

prototype Japanese products.
"We believe that in view of the increase in imports and the number of alliances and design-ins, the US-Japan semiconductor co-operation effort has got to be one of the most successful trade agreements the US has," says Mr Koji Matsui, deputy director of the industrial electronics division of the ministry of trade and industry (Miti).

There is rising resentment in Japan over what is seen as abuse by the US of the market share issue. The US industry has used market data to distort the true meaning of the trade agreement, Japanese industry officials contend.

The 1991 agreement clearly states that "the twn governments agree that [the 20 per cent expectation] constitutes neither a guarantee, a ceiling nor a floor nn the foreign market share", the Japanese point nut. US officials maintain, however, that

market share numbers provide a measure of progress that has been invaluable in maintaining pressure on Japan to keep up its efforts to increase market access. The Clinton administration plans to include similar "temporary quantitative indicators" in future trade pacts.

At the talks in Hawaii, the US is expected to propose a market share target beyond 1992. "We are not going away until that number is achieved," says Mr Andrew Procassini, president of the Semiconductor Industry Association, the US industry trade group. "Our goal is to achieve a minimum of 20 per cent of the Japanese market on an nngoing basis.'

The Japanese, however, will strongly resist any new market share goals, says Mr Stan Anderson, Washington lobbylst for the EIAJ. "It would be very, very difficult for the Japanese side to ever accept another numerical goal of any kiod because the SIA bas misused the clear language of the arrangement so often."

"The Japanese delegation will go to Hawaii with the objective of trying to convince the US that it remains com-

mitted to implementing all aspects of the agreement." Mr Anderson says. "We are going to Hawaii in hear what the number is," responds Mr Procassini, "to see what response the US government will bave and, if asked, to discuss it with the US government. We are only concerned about a measure of openness of the Japanese market, and that is 20 per

cent market share."
It is clear that the US semiconductor industry has the sympathies of the Clinton administration. "We must be prepared to act," Mr Ron Brown, the commerce secretary told a meeting of the SIA in Washington last month. "We must see to it that agreements are kept, even if it takes hard-oosed head-knocking on our part.

Gatt talks | S Korean on China

By Frances Williams

CHINA'S attempt to rejoin the General Agreement on Tariffs and Trade made little headway during three days of talks with trading partners ending yester-day. More talks are scheduled for the end of May but early

"There's no great enthusi-asm to work rapidly" towards Chinese membership, said one European official. Beijing appeared to have hardened its opposition to a special safeguards clause in its membership terms which would protect trading partners from

sudden import surges. Strong safeguards provisions are seen as essential by the US, the European Community and other industrialised countries which fear a flood of cheap imports once trade barriers come down. Even without Gatt membership, China is expected to enter the ranks of the world's top 10 trading nations this year.

Supported by some third world countries, Beiling is pressing for standard membersbip terms as a developing country. However, trading partners argue that, despite substantial liberalisation, China's economy is not fully compatible with Gatt'e marketbased fair trade rules and requires apecial treatment, not least because of its size.

Gatt, left in 1950 after the Communists took power in Beijing.

relief over mark time | chip duties

By John Burton in Seoul

SOUTH Korean semiconductor makers yesterday expressed: rettef that dumping duties imposed by the US on their memory chips are far lower than expected.

The industry, one of South Korea's biggest exporters, said the duties, averaging 3.19 per impact on sales of dynamic random access memory (D-Ram) chips in the US, their biggest foreign market.

The US Commerce Depart ment on Tuesday drastically lowered preliminary dumping daties imposed last October on Korea's three main semiconductor compaules for unfair pricing of D-Ram chips.

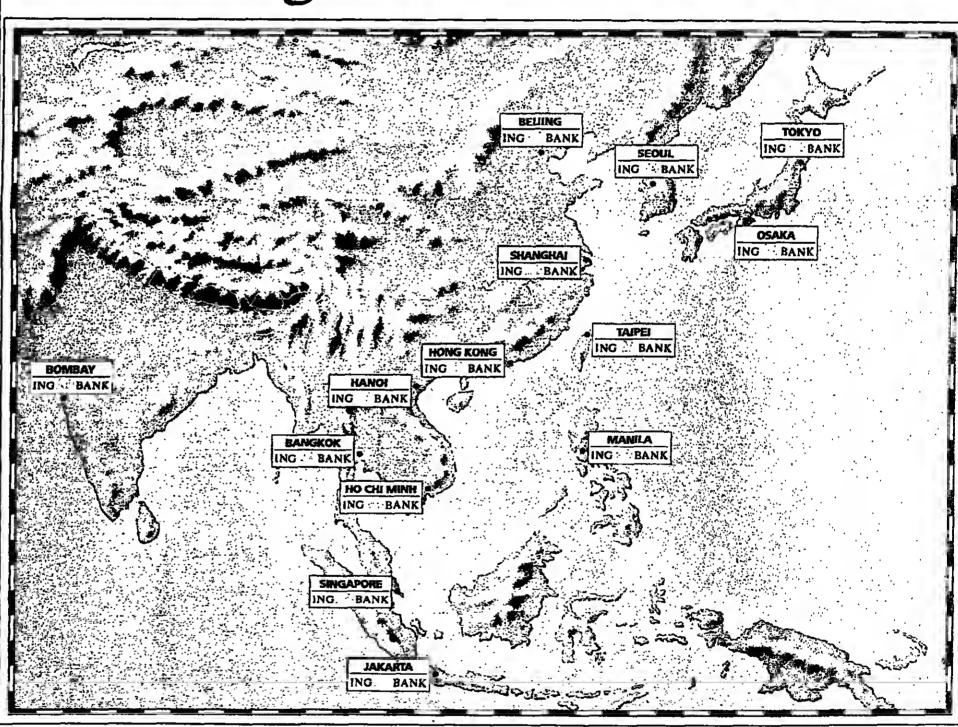

The duty for Samsung Electronics, South Korea's biggest semiconductor company, was cut from 87.4 per cent to 0.74 per cent, while that for Goldstar Electron fell from 52.41 per cent to 4.97 per cent. However, Hyandai Electron

ics faces a higher penalty of 7.19 per cent (5.99 per cent). Exports to the US totalled \$854m (£601m) last year and the Korean producers had expected penalties of at least 10 per cent. They and their US computer industry customers argued high dumping dnties would drive up semiconductor prices and harm ailing US

computer makers.

Semiconductor prices in the US have already risen 20 per cent since the preliminary duties against the Korean chip

Mexico City in big water deals

Latin America Editor

TWO British and two French water companies, working with Mexican partners, have wnn contracts worth more than 21bn over the next 10 years to improve water and sewerage services in Mexico City.

The contracts, described as among the biggest of their kind in the world, are part of an attempt to expend and upgrade the capital's water and waste water system and to improve the service to about 9m people.

The Mexican government is relying increasingly on private sector enterprises to carry out work previous done by the

North-West Water and its Mexican joint venture partner, the construction group Grupo Gutsa, won a contract valued at \$400m over 10 years to provide services for five of the 18 municipalities, representing almost a third of the city. Severn-Trent and its partner

lasa won a contract valued at \$350m in four municipalities in the central and north-eastern areas of the capital.

The contract won by Génér ale des Baux, in a joint venture with the construction group ICA and bankers Banamex covered three municipalities and is expected to yield turn-over of FFr500m (£63m) a year after the first two years. according to the company.

Budget likely to prompt calls for dividend shake-up

By Maggie Urry and Roland Rudd

COMPANIES operating in the UK are likely to find themselves under pressure from shareholders to reassess their dividend policies following changes to advance corporation tax (ACT) announced in Tuesday's budget, according to tax experts at accountants

Mr Andrew Jones, senior tax partner at Ernst & Young, warned: "Companies will have to pay bigger dividends to keep

their share prices up"

among the most significant Profits from say France and dividends paid out of UK profannouncements of Mr Norman Lamont's budget speech to parliament and could have implications for companies' decisions on where and how they raise new finance.

ACT is paid by companies on dividends and can then be offset against UK corporation tax. However, many companies do not pay sufficient UK corporation tax to offset fully the ACT, meaning that they end up paying more tax.

A US company, for example, might have operations in a number of European countries,

Germany would be channelled through the UK companies, which would remit dividends to the US parent. These dividends would attract ACT, which might then not be offsetabls, leaving the company with a high tax burden. Such com-

panies were being tempted to move offices out of the UK. Under the changes in the budget, designed to establish a special tax regime for multinational companies from the 1994-95 tax year, shareholders which do not pay tax, such as

Dividends paid from overseas earnings, under the proposed foreign income dividend scheme, will not carry any tax credit. Thus such shareholders will be significantly worse off unless dividends are increased. in theory, since a company is

owned hy its shareholders it should not matter that a benefit is shifted from investors to companies. However, this will cut little ice with investors. On the positive side, if companies' tax hills are reduced hy

them scope to pay more in divi-dends. Mr Jones said: "If the rate of dividends rises to compensate investors, the only help companies get is in shifting the burden of cost from the tax line to the divideod line of

the profit and loss account". Tax experts at Ernst & Young also claim the Inland Revenue is likely to increase its tax take through ACT as a result of the changes.

Companies were yesterday looking at the implications of the ACT proposals. Mr Colin Hope, chairman and chief executive of T&N, the motor comshareholders pressing for higher dividends.

Mr Derek Bonham, chief executive of Hanson, the Anglo-US conglomerete, believed Hanson's tax charge could fall by as much as £35m. But he said, "I think it is too early to say whether that means we will pay additional dividends.

Mr Peter Clappison, finance director of BBA, the component maker for the automotive and aviation industry, said he would be taking soundings

group, agreed that "there could be a problem from tax-exempt they will be pressing for higher they will be pressing for higher dividends. We will make up our minds as to what we do after we hear back from them."

The ACT changes could also affect the timing of dividend payments in the short term. The shift from a 25 to 20 per cent rate of ACT will hit higher rate tax-payers, who will be required to make up the difference between the ACT rate and 40 per cent income tax. Mr Jones suggested that

expected in choice of company car THE composition of UK car

sales is expected to change foilowing the chancellor's announcement of a simplified structure for company car benefit tax, Britain's volume car makers said yesterday. Company car users are likely private companies with higherto seek voluntary "downsizing rate tax payers as shareholders of the vehicles to lower their may pay substantial dividends individual tax bills, according to Mr Tony Brigden, director of fleet sales for UK market leader Ford: "But this trend

was in progress anyway through a general desire for smaller cars and environmen tal factors. More important was that by removing the current tax regime's combination of engine capacity and price bands. manufacturers can plan without having to take account of false restrictions, and product planning can be driven wholly

'Downsizing'

by market forces". From 1994-95, company car tax will be based wholly on a percentage of cars' retail list prices plus "extras". Car manufacturers, however, indicated that they expected little negative effect on sales volumes following the tax, to be introduced next year.

Companies operating at the lower end of the luxury and specialist sports car sectors, auch as Jaguar and TVR, are likely to welcome the new However, structure. Rolls-Royce and Aston Martin. both selling cars in the £100,000-plus category, stand to be badly affected by the fact that there is no ceiling oo the new tax scheme.

The user of a "perk" Rolls-Royce Silver Spur costing £115,000, and covering fewer than 2,500 husiness miles, will pay tax of £16,100 for the private benefit of the car under the new scheme. This is based on paying tax at the top marginal rate on 35 per cent of the retail list price of the car. Under the existing system entering its final year, the charge will be only £6,024.

The changes to ACT were Institutions study UK tax reforms

THE chancellor's hudget sent institutional investors scrambling yesterday for copies of the Inland Revenue bulletins spelling out the fine print of corporate tax changes

The bulletins clarify whether professional investors need to re-think the way they have structured their portfolios, whether equity weightings should be pared or increased or whether overseas holdings look more attractive.

Fund managers at Legal and General Asset Management, one of the largest UK life insurers, concluded there was little io the hudget to suggest restructuring was necessary. Among key issues for them is the effect on investment decisions of lowering the percentage of advance corporation tax payable on corporate dividends that pension funds can reclaim. From April 5, pension funds will only be able to reclaim 20 per cent of ACT paid on UK corporate divi-

dends, down from 25 per ceot. The budget also exempted non-domestic profits from ACT, a long-term bone of contention among companies with export-driven earnings or overseas operations. The resulting cut in tax charges could well be passed on to shareholders in

Court rejects Touche Ross legal action

A 17-month bid by Tonche Ross, administrators of Polly Peck International, to sue the Central Bank of Turkish Cyprus for £45m has been rejected by the Conrt of

Appeal.
The claim was part of the administrators' attempt to recover between £400m and 2500m allegedly misappropriated from the collapsed fruit and electronics group. Touche Ross had claimed that the bank had knowingly assisted Mr Asil Nadir, the Polly Peck chairman, in committing an alleged frand or received the £45m knowing it was being paid in breach of Mr Nadir's fiduciary duty to PPL

Touche Ross had been given permission by the High Court bank in Northern Cyprus, out-side the jurisdiction of the UK courts. But by a 2-1 majority, three appeal court judges ruled that the case against the bank was not strong enough to justify allowing the writ to be served in a foreign country. Touche Boss said it would be seeking leave to appeal.

Fire service strike threat

A national strike by Britain's 49,000 firemen was threatened yesterdey if the government refuses to fund a pay award calculated under a pay formula instituted in 1979.

The warning came from Fire Brigades Union leaders after a meeting with Mr Kenneth Clarke, home secretary, who insisted that no exceptions could be made to the 1.5 per cent public sector pay limit introduced by the government last November.

Big pollution fines urged

Magistrates are taking environmental pollution more seri-ously than in the past hnt fines need to be tougher, the

During 1992 the inspectorate prosecuted 18 companies, which were fined a total of £103,405, it announced in its fifth annual report. The inspectorate is starting to implement the law's framework of Integrated Pollution Control for industry. But companies and environmentalists have criticised the measures for being too unwieldy and the inspectorate for heing too

Strategy plea on aerospace

A strong plea for a "national strategy" for the aerospace industry was made by Mr Dick Evans, chief executive of Brit-

He told the Commons trade and industry committee aero-space was one of the few activities in which Britain was still a world leader. It was clear that France, and more recently Ger-many, had developed strategic plans for their aerospace sectors. "Unless we address the issue of investment in a much more specific way we are in danger of losing the ground, or part of the ground, that we are currently occupying," Evans said.

Fraud at BP denied

British Petroleum was not defrauded by middlemen acting for engineering companies bidding for lucrative North Sea contracts because it ultimately received the best value for money, Sonthwark Crown Court has been told. The prosecution was mis-

guided in suggesting that BP was a victim of fraud because confidential information had been leaked regarding the tendering processes for 11 con-tracts, Mr Paul Purnell QC, for Mr Josef Szrajber, said. BP witnesses had agreed that in all hut one case, the oil com-pany had got the best value contracts.

Mr Szrajber and Mr Paolo Sorelli, another intermediary, deny seven charges of conspiring to defraud BP hy using confidential information. The trial continues today.

Confidence in north grows

The first quarterly economic survey by a north of England chamber of commerce this year shows a marked increase in

business confidence, further expansion of companies into export markets and a small

increase in capital investment. Sheffield chamber's survey of 315 companies also suggests there is a reduction slowdown in labour-shedding. A quarter of companies cut their workforce in the first quarter, but only 12 per cent say they will do so between April and June.

Overseas trips more popular

The British took a record num ber of foreign holidays and fewer in the UK last year, despite the recession and a campaign by the English Tour-ist Board to promote local seaside resorts. The number of foreign holidays of four nights or more taken by UK reside rose 9 per cent to 21.75m.

aspire to in the future.

hred marketing organisation has

barely begun. Until recently, the

overriding priorities were to reor-ganise the spirits division, following the acquisition of the Distillers

Company in 1986 and to gain con-

trol of international distribution.
Attention started to focus less

than three years ago on hrand

development, which Greener

regards as the key to Guinness's

long-term future. Since then, more

than 50 senior marketing executives

ohnnie Walker Scotch whisky

is Guinness's most valuable

Johnnie Walker's recent development not only exemplifies the Guinness group's shrewd marketing approach; it demonstrates how a good consumer brand can be revived and then extended with a range of complementary products. When Guinness's spirits subsidiary United Distillers

acquired the brands in the 1986

takeover of DCL, the old Distillers'

company, they were showing signs of neglect. DCL's marketing focus

Guinness believes brand development is the key to its future, writes Guy de Jonquières

Blending genius and magic

have been hired from heavyweight consumer products companies including Procter & Gamble, Mars

and Unilever.
The challenge now, Greener says, is to unite the company around a basic core of shared beliefs, rooted in a clear appreciation of the distinctive skills which the drinks business requires.

"If you look at P&G or similar companies, one of their great strengths is a system, a way of doing things which has proven suc- what works. So forget your fancy

cessful over a long period. We are ldeas for marketing soap flakes, starting - underlined - to get chocolate hiscuits, fragrances, or together a group of people who are beginning to understand what it

Injecting so much new blood all et once is, he admits, a mixed blessing. "While bringing all these guys in has been necessary and marvel-lous as a stimulus, at some stage the process has to slow down a bit. You've got to consolidate and say, that's great, but around here this is

So what does work for Guinness?

The starting point, says Greener, is that all Scotch tastes much the

"We have massive amounts of research which show that people can't tell the difference between one Scotch and another. Though they swear total allegiance to one product and would never dream of drinking Brand X, in hlind tastings

A very spirited affair

had become blurred in a drive for volume sales. Many of its whisky brands competed against each other. Positioning was confused. Red Label, the world's best-selling Scotch, was supported in Europe by seven different advertising campaigns, each delivering e different message.

Guinness restored order. Key brands were repackaged and repositioned to cover different sectors of each geographical market. New advertising campaigns presented a consistent image of high quality and matching lifestyles. Prices reflected the up-market move. The distilling company Johnnie

Walker is named after the Kihnarnock shopkeeper who founded the distillery in 1820. Johnnie Walker Red Label and Black Label, a deluxe blend of whiskies up to 12-years-old, were launched in 1909. In 1932, the brand was extended with the launch of Swing, a hlend containing 17-year-old malts.

Guinness's brand building has been based round Red Label, which was positioned as the leading international premium brand and given a significant slice of the advertising budget. It is now among the three leading brands in 16 of the world's top 20 markets. Priced at about £10 a bottle, it has

sales of 6.5m cases a year. Black Label, with annual sales of 3m cases, provides the first step for aspirational consumers. It is also rewarding for Guinness. Selling one bottle of Black Label instead of two bottles of Red Label gives the company 24 per cent more profit. In some growth markets, such as Thailand, Black Label is the dominant member of the Johnnie Walker family.

Swing has found niches in the US, Asia/Pacific, Africa and Sooth America. During the past six years,

Guinness has used the Johnnie Walker brand to fill more high-priced and profitable gaps what they select."

The only real point of differentiation is image. In the spirits business, says Greener, it is cultivated only incidentally through advertising. The really vital brand-building is done in the "on-trade" — the clubs, hars, cafés and pubs where what people drink is often a signal about who they think they are. "Unless you've got that on-trade franchise, it's difficult to build anything else."

The second rule is to keep telling the same story. "You're talking about the presentation of a product, the outlets where you'll find it, pricing, advertising, promotions every single point of communication between an individual and that hrand. The whole marketing mix has to come together to hit the target in a particular way."

The central challenge Greener has set for Guinness is to develop a coherent, company-wide, set of brand values and identities which is also flexible enough to be adapted to local conditions in each of the 180 countries in which its spirits are

"If you think of the number of contact points and the number of times the message has to be relayed to individuals around the world, it is an enormous process - the time, the money involved and, above all, the consistency of the message There is no quick fix, no magic wand I can weve. The key words really are consistency of messa over a very long period of time."

In 1987, it launched Johnnie Walker Oldest, since renamed Blne Label, in the duty-free market. It is now available through a few UK outlets at about £120 a bottle. Gold Label, a 15-year-old blend priced at about £80, was produced exclusively for the Japanese market in early 1990. It was followed the same year by Johnnie Walker Premier, blended with 25-year-old malts. In Taiwan, it sells for £400 a bottle. Last year, top-of-the-range Johnnie Walker Honour, a hlend of 40-year-old malts, was introduced in Taiwan at £525 a bottle.

in international markets.

Guinness is now test marketing a whisky-based liqueur under the Johnnie Walker brand name in

Philip Rawstorne

The direct seller's party piece By Gillian Tett

If you want to sell sex toys or Summers, who had previously Tupperware tubs in a recession, how do you go about it? Throw a party, according to a growing number of small clothing and hardware firms.

In recent years party plan selling - as the original Tupperware sales format is known - has been expanding along with other forms home-based marketing.

Turnover in the direct-selling sector now amounts to more than £769m, and is growing at 10 per cent a year, according to a recent report by the Direct Selling Association. Some of the most successful firms are notching up annual growth rates of more than 50 per

The Ann Summers group, for example, which first made its name with sex shops, has seen its sales of lingerie and marital "novelties" almost double in the last two years to £43m, primarily

through party-plan selling.

The more mundane household item Betterware group - which, after the cosmetics giant Avon, is now the second-largest direct sell-ing company in the UK - has recorded a rise in its turnover from £2m to £65m.

Direct sellers themselves attrihute this growth to their aggressive marketing techniques - at a time of low consumer confidence personal contact and word-of-mouth recommendation is, they say, more effective than

advertising.
"If people are told that times are had, that they shouldn't spend money, then they don't like going shopping. But the demand is definitely still there if you take it to them," claims Deon Meick, manag-ing director of Tupperware UK, the original pioneers of the suburban hard sell.

But another factor seems to be the attraction of part-time sales work at a time of high unemploy-ment. In spite of the changes in female employment that have occured since Tupperware parties were first launched in the 1950s, the majority of the 45,000 direct selling agents in the UK are still women. Ninety three per cent of these are part time, and increasingly they schedule the sales work for the evenings.

"It's a good job," says "Phil" a London-based saleswomen for Ann

organised Tupperware parties. Her commission from the sales - 79 per cent of direct selling companies work on a commission basis is around £1,000 a month.

"In a recession people might not want to go out and buy a vacuum cleaner - but they do want to have fun," she adds.

In the case of Ann Summers this fun factor pays dividends. To break down inhibitions, each sales party starts with games, continues with demonstrations and then finishes with women placing their orders in carefully sealed, anonymous envelopes.

At a typical Thursday evening party in Orpington, Kent, most of the 15 female guests arrived claiming that they were only there "for a laugh" – but then left after spending a total of £235.

Although most direct sellers recognise that their sales forces may contract if jobs growth in the economy resumes, they insist that their turnover will continue to rise in a recovery.

Nevertheless, as James May, director of the British Retailers Consortium, points out, the sector still remains tiny compared with the retail market, accounting for less than '4 per cent of total consumer sales

According to the Direct Selling Association, however, retailers have recently shown increased interest in direct selling. But attempts to fuse the two sectors face a fundamental problem sales staff may be less motivated to market their goods if they can be easily purchased from a nearby corner shop.

In an effort to prevent retailers from "poaching" their ideas, direct-selling companies are now attempting to step up product innovation. Tupperware, for example, recently launched a new range of childcare products. But as direct-sales companies them-selves acknowledge, ultimately their main weapon remains their low overheads, flexible sales force and, above all, the personal cus-

tomer contact.
"It works because we pay attention to the customer," says Richard Berry, director of the Direct Selling Association. "In that respect maybe the retailers could learn from us."

CONTRACTS & TENDERS

INTERNATIONAL PREQUALIFICATION **NOTICE SUMMARY** EDITAL N 857-9-453-93

PETRÓLEO BRASILEIRO S.A. - PETROBRÁS intende to install, over a period of 540 days, 3 (three) MTBE (Mothyl Tentary Butyl Ether) units and invites interested companies to participate in the international prequalification process, which will precede the bidding for supply, on a turnkey basis, of the above referred upits and their connections with the existing facilities, in accordance with the following conditions:

1 (one) unit of 95,000 tons/year at Paulinia Refinery - REPLAN (Paulinia, state of São Paulo); I (one) unit of 65,000 tons/year at Henrique Laje Relinery -

REVAP (São Jose dos Campos, state of São Paulo);

(one) unit of 60,000 tons/year at Duque de Caxias Refinery -REDUC (Duque de Caxias, state of Rio de Janeiro); Prospective bidders shall submit a full financing proposal during the bidding phase for the installation of the units and their connections with the existing facilities;

Participants: Brazilian or forcien companies, or joint ventures made up of two or more companies; Technology: Proposals based on a technology owned by

PETROBRAS or by the bidder itself may be submitted. Interested companies/joint ventures may purchase the Prequalification Documents by presenting a Banco do Brasil S.A. deposit slip for sum in enuzziros corresponding to US\$1,000.00 (one thousand American dollars), credited to PETROBRAS ADM. CENTRAL, current account number 377.100-8, Central Office (Agencia Centro) - Rio de Janeiro, Brazil (code 0001-9), or consult the documents at no expense at the following address:

> PETROLEO BRASILEIRO S.A. - PETROBRAS SERVICO DE ENGENHARIA – SEGEN RODOVIA WASHINGTON LUIZ, K.M. 113.7 DUQUE DE CAXIAS - RI - BRAZIL PHONE: (021) 773-2929 OR (021) 773-2668 FAX: (021) 262-9133 OR (021) 776-1290 REF: PREQUALIFICATION NOTICE N 857-9-453-93 AUR: PREQUALIFACATION COMMITTEE COORDINATOR

The bank deposit slip must make reference to Prequalification Notice number 857-9-453-93. Deadline for solicitation of the Prequalification Documents: March 30,

Upon submission of the back deposit slip, in order to receive the Prequatification Documents, bidders shall inform their company's full name, address and fax number.

rugs to bring down high blood pressure are one of the great successes of pharmaceutical research. Over the past decade the industry has given doctors dozens of new drugs to treat bypertension - the medical name for the condition by several different mechanisms. Their sales are worth more than \$10bn (£7bn) a year, three times as much as the total market for cancer

"The treatment of hypertensioo is very good now and the side effects are minor," says Desmond Julian, medical director of the British Heart Foundation, and because there is a range of drugs, you can normally find one to suit any particular patieot."

In industrialised countries, 15 to 20 per cent of the adult population has high blood pressure. Julian says patients with mild or moderate bypertension should not be put on drugs straightaway; their doctors should urge them to make changes in diet and lifestyle.

But for the 5 per cent of people with severe hypertension, drugs are usually required to bring blood pressure down to a safe level.

Clinical trials have shown that the greatest benefit of hypertension treatment is a 40 per cent reduction in the risk of suffering a stroke, which is caused by the rupture of blood vessels in the brain. The effects on other forms of cardiovas cular disease are less clear-cut; indeed there is still no statistical proof that lowering blood pressure cuts the risk of a fatal heart attack.

The four main categories of antihypertensive drug, in order of increasing novelty and price, are: Diuretics, which reduce the volume of blood by increasing the flow of urine from the body. A secondary effect is to open up small arteries by removing sodium. Most diuretics

Competition is fierce not only between the different classes of medicine but also within each class

are cheap off-pateot drugs.

Beta-blockers, which slow down the heart beat, particularly during exercise and emotional stress, ICTs Tenormin, the first blockbuster antl-hypertensive, recently lost its patent protection.

 Calcinm channel blockers, which relax the blood vessels by blocking the flow of calcium ions into the surrounding muscles. Patents are also expiring on the first group of calcium blockers Introduced in the mid 1970s such as

• ACE inhibitors, which block parison of heart attack treatments

High blood pressure treatments are working so well that scientists are looking beyond traditional cures, writes Clive Cookson in a series on drug discoveries

Ups and downs of hypertension

angiotensin coovertiog enzyme (ACE). This prevents the formation of angiotensin II, a potent constrictor of blood vessels. The pioneering ACE inhibitor, Bristol-Myers Squihh's Capoten launched in 1981, has receotly been overtaken by Merck's Vasotec, now the world's best-selling heart drug.

Faced with such a wide selection of drugs, how does a doctor find the best one for each patient? According to Julian: "for the majority of people it's a matter of trial and error. It's quite arhitrary which

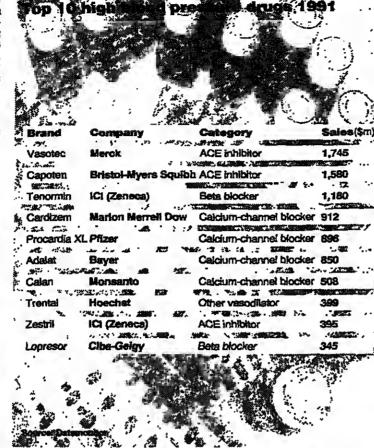

drug you start out with".

The treatment of hypertension varies considerably from country to country. In the cost-conscious UK, normal practice is to start the patient on a cheap diuretic or betablocker and, if the response is unsatisfactory, move to a more expensive drug. in the US, a doctor is more likely to prescribe a calcium blocker or ACE inhibitor as firstline therapy

In an attempt to gather more information about the long-term effect of different therapies, two large-scale clinical comparisons are planned: one in Europe to be organised by Peter Sever of St Mary's Hospital, London, on behalf of the British Hypertension Society; and one in the US, sponsored by the National Heart, Blood and Lung Institute.

Each trial will cost at least £35m and will involve 30,000 people with high blood pressure who will be treated for five years with either a diuretic, an ACE inhibitor or a calcium channel blocker. The results should show ifthe premium prices charged for the new drugs are justified by superior performance, not only in lowering blood pressure but in reducing deaths from heart attacks and other cardiovascular

The trials may confound expectations and show that diuretics give as many benefits as ACE inhibitors and calcium blockers, in the same way as the recent Isis-3 mega-com-

undermined sales of the expensive new clot-busters tPA and Eminase by showing that cheap old streptokinase was just as effective.

Until comparative clinical data become available, sales of competing hypertensinn drugs will depend, above all, on the marketing skills of their manufacturers. There is flerce competition not only between the different classes of medicine but also within each class.

Indeed, the ACE inhibitor sector is the best example today of "me too" development in the pharmaceutical industry. Tom McKillop,

technical director of Zeneca Pharmaceuticals (soon to be soun off from ICD, says ACE inhibitors are a very unusual sector of the drugs market because there is strong competition between several pateoted products. This is exerting a downward pressure on prices, similar to that introduced by geoeric (off-patent) drugs in more mature sectors.

"The ultimate anti-hypertensive has not yet been found," says Claes Wilhelmsson, research director of Astra, Sweden's largest pharmaceutical company, "But we have stopped all our research on traditional hypertension drugs."

There are so many products on the market that bring down blood pressure safely and effectively that no company is trying to produce new ones, says Jürgen Reden, research director of Germany's Hoechst. "We are looking now for drugs that do something more than reducing blood pressure - for example producing a protective effect on the cardiac muscle and avoiding chronic cardiovascular dis-

ease."

ACE inhibitors show some beneficial side-effects, beyond controlling hypertension. They seem to have some protective effect on kidney function and to improve the general condition of blood vessels.

Companies with cardiovascular research programmes are therefore exploring ways to intervene elsewhere in the metabolic pathways that control blood pressure and beart function, such as the reninangiotensin system and the kallikrein-kinin system. For example, Jürgen Drews, research director of Switzerland's Roche, says his company is investigating a new class of renin inhibitors which would act at the very beginning of the process that leads to high blood pressure.

The overall aim of such research, according to Reden, is "all-round protection of the heart, by keeping the blood vessel walls clean and in good condition".

High blood pressure results from the interplay of multiple genetic and environmental factors. A research finding of great long-term aignificance was announced last October; an academic team from France and the US, headed by Jean-Marc Lalouel of the University of Utah, identified the first human gene linked to hypertension. Variations in the angiotensinoger

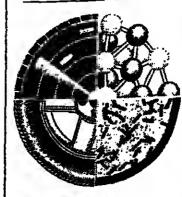

me were found to be related to hypertension in families in Paris and Salt Lake City. It is believed to affect blood pressure by controlling the retention of salt in the body. Scientists say at least four other

genes - and perhaps as many as 20 are likely to be involved in hypertension. As more are identified, it should be possible to develop genetic tests to identify people at risk - and perhaps eventually to think of correcting the genetic defects through gene therapy. However, as Sever points out,

high blood pressure is undonbtedly a disease of western civilisation, "Although the genetic link is an extremely important and interesting floding, remember that the environment you live in also controls your blood pressure," be says. "No one living in the African desert ever suffers from hypertension."

The series continues next month with a look at treatments for hay fever and other allergies.

Worth Watching · Della Bradshaw

Stamping out computer theft

Stealing personal computers is growth husiness. In 1992 an estimated £60m-worth of PCs were stolen in Britain, not to mention the portable machines that were left on buses and aircraft.

To help ensure that machines which are recovered are returned to their rightful owners, Firstick, of Steyning, West Sussex, has devised a software package that gives each PC a unique serial number which is registered on a central databa

The software is loaded into each Dos-based PC from a floppy disc. Every time the machine is subsequently switched on the serial number is displayed, together with the Firstlok database phone number where details of the owner can be found. The software also incorporates password access control device. Firstlok: UK, 0903 879568.

Information on the fast track

Companies which shift large amounts of voice, data and video traffic between offices are now offered a more efficient way of sending the information - ATM (asynchronous transfer mode).

Whereas in the past large amounts of data had to be sent in parcels of pre-determined size, ATM enables data to be sent in the most effective way. So, video-conferencing could be allocated a pre-determined chunk of capacity on the line for the period the service was needed and then the other voice and data calls slotted in as needed.

Netcomm, of Basildon, has aunched its DV2 ATM switch to allocate capacity on these large etworks. The device will be sold in the US by Netcomm's partner, General Datacomm. Neicomm: UK. 0268 534228.

· PictureTel, of Boston. Massachnsetts, has launched a low-cost, colnur, videoconferencing terminal which can be wheeled from office to office and plugged in at any socket which offers ISDN business phone services. The units cost £15,600 each, and more sophisticated functions can he added at extra cost. Picture Tel: US, 508 762 5000; UK, 0753 673000.

Making a live connection

Debt collectors, telemarketing agencies and the public utilities have at least one thing in common: they need to contact lists of consumers by telephone. be it to nag them, persuade them or even to warn them.

It is most frustrating when the number dialled is engaged, goes unanswered or is answered by an answering machine. But technology is now available to weed out these calls. Only when the system detects a live voice will it connect the call to the caller's headset. At the same time details of the person called name, address and so on appear on the operator's

pouter screen. To help companies exploit the technology CMG, the IT management gronp, has launched Predics (predictive dialling consultancy service). Indepen analysts believe predictive dialling can increase productivity hy several hundred per cent. CMG: UK, 071 976 0066.

Word for word in Japan

Japanese commuters could soon find a new way of buying their railway tickets. Gone will be the man behind the counter and the pash hutton ticket machine, In their place will be a computer which recognises spoken requests.

This is just one scenario envisaged by NEC for its voice recognition system which will be marketed in Japan this year. The machine can be programmed to recognise 1,000 words which are relevant to each particular application.

The machine uses a technique developed at NEC's media research laboratory in Kawasaki, called demi-syllable speech recognition. Each syllable is dissected and analysed. NEC: Japan, 03 3798 6520.

TATION

NABUCCO IN BREGENZ with the FINANCIAL TIMES

Saturday 24th July - Tuesday 27th July 1993

"...... counts high among the most thrilling and dazzling pieces of lyric-theatre spectacle of my entire opera-going experience". So wrote Max Loppert in the FT after his first visit to the open air opera festival in Bregenz to see David Pountney's Flying Dutchman.

Now, the Financial Times invites you to come with us in July to this small Austrian town on the shores of Lake Constance, to see Pountney's new production of Nabucco, performed on the famous floating stage. We have also reserved seats indoors the previous evening for Jonathan Miller's production of the less well known, and perhaps under-rated, Fedora, by Umberto Giordano.

We have arranged with Swissair to fly FT readers from any airport served by the airline direct to Zurich. There, hire cars will be available for you to enjoy the short drive over the border, and for your use throughout your stay. Rooms in two hotels nearby have been booked for the duration of our suggested four day itinerary, though arrangements can be adjusted to fit in with your plans, and required departure airport.

These performances, for which we have reserved only a limited number of excellent grade seats, are already sold out. Demand for this FT Invitation, which will include a number of unique features, is likely to be high, so to receive further details of this first Financial Times opera invitation please complete the coupon BOW.

Saturday 24th July Depart Heathrow with Swissair at 1.50pm. Arrive Zurich at 4.25 pm. Drive to Bregenz. Sunday 25th July

Evening performance of 'Fedora' performed at the Festpislhaus, conductor Pabio Luisi. Monday 26th July

Evening performance of 'Nabucco' performed on the Floating Stage, conductor Ulf Schirmer. Tuesday 27th July Depart Zurich with Swissair at 5.40 pm. Arrive Heathrow at 6.25 pm.

Pension Austria £595. Single room supplement £15.

Hotel Tranhe £635. Prices are per person sharing a twin room with shower and we, on a bed and breakfast basis. Scheduled air travel by Swissair

from Heathrow, opera tickets for both performances, and a Group A Hertz car for three days. Alternative flights (dates or departure airport) can be quoted on

request. All elements of this invitation are subject to availability. This tour is organised on behalf of the Financial Times by J.M.B. Travel Consultants Limited, specialists in opera tours.

Addresses supplied by readers in response to this invitation will be retained by the Financial Times, which is registered under the Data Protection Act 1984. To: Nizel Pullman, Financial Times, Number One Southwark Bridge, London SE1 9HL. Tel: 0905 425628. Fax: 071-873 3078. Please send me full details of the FT Invitation to Bregenz

PEOPLE

Brian Walsh moves from GKN to TI

TI Group chairman Sir Christopher Lewinton has put the finishing touches to his new generation of managers with the hiring of Brian Walsh. GKN's finance director, to replace TI's own Michael Garner, who has been in the joh for 14 years and wants a change. Garner, 55, already a member of the Accounting Standards Board, will play a larger role within that organi-

"Michael pointed out to me that he had served seven years in two administrations and that he wanted to make a change, but within Ti if possible. This gave me the opportunity to bring in a younger man,

three operating divisions, who are all in their late 40s or early 50s." Lewinton said yesterdsy. The most recent recruit was Tony Edwards, formerly of Lucas, to bead the Dowty divi-As well as being the right age. Ti also believes he under-

fitting in with the heads of the

stands the marketing business - very important to the Lewinton culture - having worked at two consumer goods companies. At Singer he was vice-president and director of finance and business planning between 1980 and 1982 and he then moved to General Foods. initially as assistant corporate controller and treasurer, and subsequently as finance director of the US grocery business. These five years in the US were also important in his selection, says Lewinton, who explains that 40 per cent of TI's business is in America. City analysts, meanwhile.

give Walsh high marks for his near six year spell at GKN, where he identified earlier than some of his peers the onset of recession and initiated tough cost-cutting measures. Meanwhile, TI is looking for-

ward to Garner, who remains an executive director, involving himself in a range of accounting issues of direct relevance to TI such as ACT, and the introduction of FRS3. "One

of the problems of this country is that everyone stands in their separate corners - industry, government, the treasury complains Lewinton. Under his stewardship, Mark Radcliffe was seconded from TI to set up the National Manufacturing Council at the CBL

ASB chairman David Tweedie adds that with only two full-time members out of the nine board representatives, his operation is under-resourced in contrast, for instance, to the American counterpart FASB which has seven full-time members. He sees Garner developing the contacts with industry for which he himself has insufficient time.

Non-executive directors

WH Smith

Michael Orr (above left), former head of investment banking at Merrill Lynch Europe, and Martin Taylor (right), chief sxecutive and chairman-designate of Courtaulds Textiles, have joined the board of WH Smith, bringing the number of non-executive directors to eight. Stanley Honeyman, a chartered surveyor, retired last October.

Taylor, 40, who has forged a reputation as one of the better managers of his geoeration, says the attraction for him is to get closer to the wsy a retailer thinks". A former journslist with the Financial Times, he says that at the moment he knows "about as much (about the sector) as the FT retailing correspondent".

He adds that WH Smith presents an unusual opportunity in so far as there is "no possible conflict of interest". Courtaulds would be suppliers to or in direct competition with the bulk of major retailing compa-

Orr, 55, was a senior director of SG Warburg before becoming finance director of Grand Metropolitan in 1981. In 1987. he left for Merrill Lynch, where he stayed for three years. He is now collecting an assortment of oon-executive

positions - he is chairman of Molins and on the board of Granada, Marston, Thompson & Evershed and Sketchley. WH Smith was last week rel-

egated from the FT-SE 100 index, its share price hit by heavy losses at its DIY joint venture Do-It-All as well as by coocerns, nafounded in the event, that the hudget would contain an announcement about VAT being extended to published matter.

Amstrad

Michael Beckett, the boardroom troubleshooter whose charges have included Tace and Ultramar, has been appointed as a non-executive director at Amstrad.

However Beckett, who once described himself as a very independent" non-executive director, insists that his role at Amstrad will not be one of company doctor. I happen to think Amstrad is

one of the great success stories in Britain," he says, "I am very much taken with Alan Sugar's attitude to the future; I think the company can do great

Beckett is Amstrad's second non-executive appointment. Last month the consumer electronics company appointed Jeoff Samson, a former senior GEC executive, following Alan Sugar's promise during his unsuccessful share buy-back attempt io December to appoint two non-executive directors to the board.

Yesterday Amstrad said the board has decided to pass responsibility for the selection of a possible third non-executive to Beckett and Samson. Beckett, aged 56, is an ex-

managing director of Consolidated Gold Fields. He was a non-executive at RHM nntil last year and is deputy chairman at Watts, Blake, Bearne, and chairman designate at Horace Clarkson,

Yorkshire Food

Yorkshire Food Group, the

Bradford-based food processor which was successfully floated this month, has enhanced its already strong Yorkshire iden-tity by appointing as a nonexecutive director Sir Marcus Fox, the Conservative MP for Shipley who chairs the backbench 1922 committee. Mike Firth, 46, the com-

pany'a forceful chairman, says he was eight years old when he heard the future Tory MP being praised by his father, who worked with him on Dewsbury council. He says of Sir Marcus: "He's a great Yorkshireman, who is obviously well connected as chairman of the 1922. That's obviously useful, as food can be a bit of a political football."

But the chairman says the main reason for appointing the blunt speaking Sir Marcus was to help to guide the board, which has ambitious expansion plans: "If you want putting in line, you want people who can

Yorkshire Food expanded through buying from Berisford International businesses which process dried fruit and nuts. Its shares started trading at 110p on March 9, valuing the group at £37.5m, and have since risen

Sir Marcus, 65, last month became a non-executive director of illingworth Morris, the wool and fibre processors.

Birkdale's triumvirate shrinks

In May 1992 the UK advertising world was set ahazz by news that Richard Humphreys was joining the Birkdale Group, a tiny collec-tinn of advertising, PR and other marketing agencies with a £3m market capitalisation. Humphreys had just left Saatchi and Saatchi Worldwide where he was president and chief executive; the contrast spoke for itself.

Now it seems that Humphreys is feeling the constraints of Birkdale, for it has announced that he is stepping down as chief executive. Humphreys will stay as an execu-tive director but is also joining "a consortium of investors which plans to acquire a substantial holding in a US-based international advertising group", an ambitious-sounding project not too dissimilar from the type of thing he gave as his reasons for joining Birkdale in the first place.

At the same time, Simeon Galpert, one-time treasurer with WPP, is leaving his post as Birkdale's finance director to "pursue other interests".

Of the triumvirate who hoped to make a substantial acquisition and put Birkdale back on the map, only Neil McClure is staying - as chief executive once more.

McClure is putting a brave face on the proceedings; but it is hardly reassuring for shareholders to see the departure of two of the would-be architects of the group's planned resur-

SOUNDS AND SILENTS

am twenty minutes into Hoffa, the David Mamet-scripted hiocpic about the controversial - American union leader who "vanished" mysteriously in 1975, and already my mind feels like Jack Nicholson's make-up. Wodgea of mental putty seem to prevent the air getting to my brain-cells. When I move my head, it is weighed down hy the world's stresses. And I seem to be hearing voices from another epoch: the monotone snap-crackleplatitudes of Warner Brothers biopictures of the 1930s and '40s.

After JFK and Malcolm X here is another attempt by American filmmakers to process recent history into a Virtual Reality helmet. You put it on and it feels as snug as the fece-puffing prosthesis sported by Mr Nicholson. And you are right there, insists the film, as the young Hoffa pummels America's grumbling pre-war truckers into the close-knit Teamsters Union, You feel the terror of Armand Assante's hot hreath and Italian accent as our fund-seeking hero beds down with the Mafia. You are there with the TV cameras watching Hoffa row with Attorney General Robert Kennedy, played with cowlick and stammering nasal twang by Kevin Anderson. And you watch the growing friendship between Hoffa/Nic-holson and co-star Danny DeVito, who directs the film as well as playing his fictional best friend, Sancho Panza to the American

Make that Jiminy Cricket to his Pinocchio, For history, if not screenwriter Mamet, claims that Hoffa, who famously disappeared in 1975 and is now presumed to be part of the New Jersey Turnpike (courtesy of Cosa Nostra Building And Interment Services), was not above lying, bribing, conniving and embezzling. But instead of his nose getting longer, his chutzpah did. His hatred of the Kennedys exceeded even Malcolm X's. He bullied where he could not persuade. He put his hand in the till of Organised Crime. Finally, when America could stand no more, he was shoved in fail. Several years later he was freed by Nixon - it takes one to pardon one - and after a few years of impotent railing at the usurpation of his union by ex-comrades he vanished

labour leader's Don Quixote.

The real Hoffa was last seen at a roadside diner outside Detroit. This allows Mamet and DeVito to sculp their best scenes from Hitchcockian surmise. These open, close and punctuate the movie: Nicholson and

Like all the best concepts "Towards

the Millennium" is proving to be

simple in principle, endlessly fasci-

nating in its working out. As this

rolling festival sweeps through the

20th century, sampling a decade at

a time, it cuts across the intertwin-

ing lines of development that make

up the texture of music history. If

anything was designed to belie the

outmoded view of musical evolution

ss a strictly linear process, in which

X leads to Y and then on to Z, It is

this strictly chronological perspec-tive, which throws up all kinds of

historical juxteoositions and short

Royal Festival Hall, conducted by

Simon Rattle with the London Sin-

fonietta and its Voices and Chorus,

Monday's programme at the

cious chap in diner; final flurry of guns, blood and Mafia removal van. The rest of the film, alas, consists

of large, congealed chunks of flash-back. As in Chaplin, the use of a retrospective framing device does not so much "shape" the story as chill and distance it. Hoffo becomes a two-and-a-quarter-hour trip through Memory Mausoleum, Dou-bly removed by the "frame" of the movie screen and the "frame" of the I-remember roadside scenes, the long narrative tableaux become dull with historical ineluctability and dubious reverence.

Even when Mamet la frank enough to admit that Hoffa could be nasty when crossed - hlowing up a warehouse, sending n set of unidentified severed genitalia to a newspaper editor - the film never quite escapes its woofly piety. For one thing, the screenwriter never concedes that if Hoffa sold his soul it might have been (as many believe) to line his own pockets as much as his union's. For another the violence, verbal and actual, is delivered by Jack Nicholson, a man who exudes charisma even while standing still with a lstex-paralysed face

reciting make-my-day threats. The film is a soaphox masquerading as a cinema experience. Worst of all are the would be epic scenes of They-versus-Us confrontation in streets or factory yards. Here, just

as the soundtrack's initial splats and crunches are slowly drowned by uplifting music, the particular brutalities of moh violence are engulfed by the Inspirational-generic. Note the way the camera cranes celestially upward to turn a fracas into a heroic fresco.

So the cinema of holy revisionism marches on, building its gallery of saints and martyrs. No doubt the next blockhusting bio-pic will be about that warm reformer, union organiser and family man Al Capone. He dld after all create wealth, establish a fraternity of hardworking entrepreneurs and help supply a needy nation with previously inaccessible beverages. Jack Nicholson and David Mamet, strap on your hagiographic harnesses again . . .

If you look in a mirror five times and say "Candyman", claims the film of that title, e tall man with a hook for a hand will materialise and disembowel you. I have just tried this in my bathroom, urged on hy intellectual curiosity, and it failed to work. Should one ask for one's money back?

One should perhaps ask for it back anyway. Clive Barker wrote the original story, The Forbidden, from which writer-director Bernard Rose (Paperhouse, Chicago Joe And The Showgirl) has fashioned this screamer that fails to scream. First

reason: the film runs out of plot after half an hour, by which time we know all we will know - certainly all we will want to know about the ghostly gentleman with the limited repertoire of sadism and the background as a murder victim who fell foul of a lynch-moh back in 1890. Not to mention the Ph.D-writing heroine (Virginia Madsen) and her limited range of spooked expres-

Reason two: no one has any reason for doing the things they do. Why did the murderers of the original Candyman, a hlack artist who made a white girl pregnant, use such an odd combination of brutalitles? (Hand-lopping followed by hon-ey-beea). Why does Candyman return to terrorise a Chicago slum tenement? Why does Miss Madsen want to write a life-endangering Ph.D? Why do girl and ghoul end up trussling with each other inside a giant bonfire? (Answer to this one: the Guy Fawkes climax to the English story has been transferred to America and lost all meaning). A shame after the creepy first

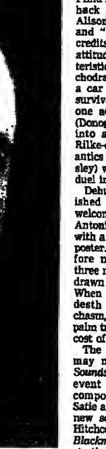

half-hour. Here the director rries out his celestial camera angles. turning Chicago into a hird's-eye maze, and the dialogue's Gothic nihilism still has novelty value ("What's blood for if not for spilling?"). But as with many horror films, once the explanations and elaborations begin, fear jumps up, asks for its hat and vanishes to another huntlog-ground.

I find I wrote two short notes on the hack of my press hand-out for Alison MacLean's Crush: "Rilke" and "Bubbling mud-pools behind credits." Weird scenery and poetic attitudinising are the chief characteristics of this New Zealand psychodrama. It begins with a bang a car crash, leaving one healthy survivor (Marcia Cay Harden) and one acon-to-be-embittered cripple (Donogh Rees) - and then spirals into a tale of jealousy, revenge, Rilke-quoting and the go-hetween antics of a young girl (Caitlin Bossley) who engineers the final death duel in lovely, scenic Rotorua.

Debut features from undernour-

ished movie cultures are always welcome. But this one resembles an Antonioni movie hit over the head with a rolled-up New Zealand travel poster. Nothing convinces us, therefore nothing moves us. And the three main characters are skeletally drawn and schematically scripted. When one of them plunged to her desth down a waterfall-rihboned chasm, I found myself admiring the palm trees and wondering about the cost of return flights to Auckland.

The week's best film experience may not be in a cinema at all. Sounds And Silents is a three-day event celebrating the art of film composing from early music by Satie and Saint-Saëns to an exciting new score hy Jonathan Lloyd for Hitchcock's reissued silent classic Blackmail. Queen Elizabeth Hall, starting tonight with Blackmail; get husy if you want tickets.

A latex-paralysed Jack Nicholson plays Hoffa

Concert/Andrew Clements Towards the Millennium

brought together a clutch of folktinged works from the 1920s - Bar-tók's Village Scenes, Janáček's Rikadla, Villa-Lobos' third Choros, Vaughan Williams's Flos Campi, Stravinsky's Les Noces. Far from proving that in the Twenties the forces of modernism suddenly dived for the comforting cover of the folk tradition the concert showed how different strands of music could moved together almost arbitrarily, only to diverge again almost immediately. As a showcase of styles and of

vocal and instrumental virtuosity It was a great success too, carefully graded to begin with the faithful replications of the Bartok, played and sung with wonderful pungency hy the Sinfonietta forces, and to move neatly into the Janacek nursery rhymes, even though their discontinuity was not aided by Rattle's decision to respect the composer's wishes and to read the texts of each rhyme before it was delivered. The Vaughan Williams appeared as the culmination of this progressive distancing of musical invention from

source material. The folksy background to Flos Campi comes to seem increasingly remote and almost spurious, though the raptur-ous eloquence of Paul Silverthorne's solo viola and the sheer sensuousness of many of the textures was never in doubt.

After that Les Noces was honestly hrscing, fresh and startlingly original. Almost any work of the 1920s (Wozzeck excepted) would be hard to set against Stravinsky's masterpiece; in this context its ability to make the folk material uniquely its own seemed quite extraordinary. Rattle concentrated throughout on precision and textural clarity: a little more freedom, more hedonism. was needed to make the performance comprehensively definitive.

excitemant encountering little-known classic; and there is an extra buzz when it has been re-translated by Anthony Burgess. Though the playwright, Alexander Crihoyedov (1795-1829), is hardly a household name, Gore ot Uma (or Woe for Wit) is his best-known play; Burgess has re-named it after its protagonist. Chatsky, and has given it a Wildean subtitle: The Importance of Being Stupid. Everything about it is interesting, and I am glad to have made its acquaintance. But I find its performance flawed and was often irritated by the intrusive cleverness of Burgess's translation.

here is a particular

Chatsky, returning from years of travel and surveying petty Russian society, has much about him of Pushkin's Eugene Onegin -Byronic glamour, polish, disdain, He is a doomed Romantic in his liberal ideals, his devotion to literature, and his love for Sophie. Doomed, because petty Russian society cannot be doing with such loftiness, and because Sophie has committed herself in his absence to the perfidious Molchalin (an amhltious creep who, behind hack, pursues her maid Liza). Funnily, then bitterly, the play depicts the particularly Russian (poshbust) hrand of philistinism that would later earn the attention of authors from Gogol lo Nabokov. What the textbooks praise as "the

naturalism and pithiness of Griboyedov's dialogue" is sometimes present in Burgess's version - as when Chatsky, reproaching Sophie. says "But the past doesn't die. Alive in me, I thought it was alive in you." Or when a minor character hleakly remarks to nohody in particular "I'm getting bored with this same old pantomime, acting the happy husband."

But when Chatsky talks of someone's "dehilitous intellection" and says "His hrain Is just an etiolated gruh in an inedible apple." though we chortle, he becomes as remote from us as from everyone else onstage. And then there is Burgess's clever-clogs use of rhyming pentameters. When a word like "Fractions" suddenly looms out for no good reason, you know you have to wait till, at the end of the next line, you get clobhered by "Actions." Sophie says "ish" (very 20th-century Brit) so that "dish" can come chiming in. Behind this kind of flashy parlance, Chatsky and 19th-century Russia grow dim.

Colin Firth, dressed as if he had stepped straight out of Gericault, is a pale, sardonic, unaffected Chatsky, and he circumnavigates the rhymes to marvellously natural effect. All he lacks is the heroic hlaze of Romantic isolation. But

Colin Firth and Jemma Redgrave

Theatre/Alastair Macaulay

Flawed 'Chatsky'

when he describes Sophie as having many of his consonants are muzzy.) "no sense of humour," I did not recognise Jemma Redgrave. Her Sophie, played with numerous tiny actorly effects of the eyes and voice. is awfully reasonable. She has no cruelty, no perfidy. Just a nice girl in a tricky situation, she is so fake-earnest that even her beauty becomes dull.

As her father Famusov, the play's most hlatant phillstine and hypocrite, Dinsdale Landen gives a performance exactly in tune with Burgess's translation; robust, rosy, ranting, roaring, rasping. He rattles off three sentences in a single breath, then draws ont a single syllable to extortionate lengths. His eyes gleam, he is all provincial force and energy. Here is busy Character

Jane Freeman, Rosalind Knight, and Murray Melvin give less ohtrusive performances that do more to hring this petty, snohhish world to life.

11

In short, several different acting styles are st work here, and the director, Jonathan Kent, has not fused them into a single convincing stage world. Tim Hatley's several sets, claustrophobic and surreal. exaggerate the blzarrerie of Griboyedov's satire. This production has turned Woe for Wit into Chatsky without making it live as a play.

At the Almeida Theatre until April 24; then on a 6-week National Tour.

Sherlock Holmes: The Musical

provided motive and opportunity and Jeremy Brett to play the tweedy sleuth. Now, Holmes has become a singing detective in Leslie Bricusse's Sherlock Holmes: The Musical at the Bristol Old Vic.

The scene opens at the Reichenbach Falls. Holmes surfaces again near Victoria. But with Moriarty dead, Holmes is bored to distraction in retirement. However, the King Charles spaniel thefts from the Duchesses Monmouth, Richmond, Argyl and Tyneside signal Moriarty's survival. But this Moriarty is 1890s New Woman Ms Bella Moriarty, with whom Hoimes promptly falls in love. His cormones corrode his judgment, and he finds himself framed for murder. The barge-footed Lestrade of the Yard arrests him, and even the woolly Dr Watson threatens to doubt.

Bricusse has done much better work than this, most recently songs for the films Home Alone and Hook. Holmes lacks sophistication. The

In 1887, Dr Arthur Conan Doyle key is the absence of the dog that (1859-1930) wrote the first of 56 did not bark (in "Silver Blaze"); the surprise.

"Sberlock Holmes" stories. This musical misses the complexities of However, the show does have Doyle's forensic style, and never for Ellie Norwood, Basil Rathbone hits on a musical style to convey the dry wit of Doyle's stories

> The dialogue keeps up some acquaintance with traditional Sherlockiana, as in "This is a three-pipe problem" and "the little things are infinitely the most important." But the setting needs to change. Around Baker Street, a jolly cockney chorus is trapped in Moru Poppins chimherley-sweep vision of London: "It's a bleedin' garden of Eden" they sing, before the rhyming slang number, "Apples 'n' Pears."

The aones are never complex enough, content to describe rather than move the action forward. Stephen Sondheim's 19th-century crime musical, Sweeney Todd fills the songs themselves with suspense: "The demon harber of Fleet ... pause ... Street." But here, as the show eases into its songs, lulling strings and a high wistful oboe signal an emotional number. while a jolly plucked bass and wire hrushes mean a singalong character

However, the show does have some spikey, atmospheric recitative signalling Moriarty's return, and a fine complaint from the Landlady at 221B, Mrs Hudson, with - for 1893 London - the anachronistic "A Lousy Life". Other highlights are "Men Like You" sung by Bella at Holmes, and a reminiscence number called "Halcyon Days" sung hy Or Watson and his old pal Boffy in the police morgue.

Robert Powell as an imperious Holmes strikes a superior tone with Roy Barraclough's excellent Watson, all slow wits and campaign memories. Alongside them, Louise English as Bella Moriarty and Sarah Hay as Mrs Hudson add scope and denth. The ensemble scenes are sharply choreographed by Tudor Davies, and Boh Tomson's direction keeps the action flowing through Mick Bearwish's versatile London

Andrew St George

Bristol Old Vic until April 10

resolutely imbued with counter-cycllcal character. Just as cartloads of Italian BOOK politicians and REVIEW businessmen

heing arrested on suspicion of involvement in corruption scandals, along comes a lengthy study examining and, io maoy cases, upholding Italy's credentials as a paradigm of democratic soclety.

The author, a professor of government at Harvard, aided by two Italian academic collaborators, investigates the success of Italian regional institutions since reforms introducing deceotralisation were implemented in the early 1970s.

This scholarly volume -proclaimed on the back cover "beautifully and Incidly writteo" - suffers from some remarkable drawbacks, not least its use of the most richiy ponderous form of American academic argot.

If the author constantly repeats some basic themes. often iovolving phrases of exemplary opacity such as "norms of reciprocity" and vertical and clientistic natworks", this may reflect his own doubts about whether readers are penetrating the

The book draws its authority from extensive field-work over 20 years - "thousands of interviews with politicians, community leaders and ordinary citizens". Curionsly, none is quoted by name, although the book is peppered with long extracts from the work of US political scientists.

Putnam makes occasional delicate reference to "patrooclient relationships", but ducks the question of corruption as a source of inefficiency in economics and government.

Yet the book reaches three conclusions of significance, both within and beyond Italy. First, regions with the most flourishing economies tend to have the best-run, most responsive and most stable regional governments.

Second, this combination of public-sector effectiveness and positive economic performance is most evident in regions (particularly in north and northMAKING DEMOCRACY WORK Civic Traditions in

Modern Italy By Robert D Putnam Princeton University Press, S24,95. 258 pages

central Italy) with the longest Putnam traces back to the 12th century evidence for his contention that "civics helps to explain economics, rather than the reverse".

Third, Italian regional

reform, far from stabilising the country's cohestveness, is undermining it. Regiocal reform, writes Putnam. appears to be exacerbating. rather than mitigating, the disparities between north and south". He treats only sketchily the implications of the recent rise of the northern "leagues" campaigning for regional self-determination in areas such as Lombardy or Veneto. But the reforms, combined with public outrage over corruption, are creating pres-sures which could lead to a break-up of the Italian state.

Putnam's conclusions are both exciting and depressing. Exciting because, if the key to improving prosperity lies less in encouraging individualism, and more in promoting civic public-spiritedness, theo gov ernments everywhere might turn to the Italian model as a source of inspiration. Depressing, because the book postulates a form of fatalism determining which regions will fare

well, and which will do badly. In the US, this book will support the thesis that the self-help doctrines of Reaganomics was ultimately detrimental to the nation's economic fate. "History suggests that both states and markets oper ate more efficiently in civic settings," Putnam writes. This e might have emanated

directly from Hope, Arkansas. In Europe, Putnam's findings support the new-found emphasis of the European Community on "subsidiarity" - bringing government decisionmaking as close as possible to

Yet the book also shows that simply increasing financial transfers to less well-off regions often has little effect in

reducing regional imbalances. At the end of the last century, "civic" northarn Italy was more geared towards agriculture than the south, and had a smaller percentage of its workers in manufacturing. But by 1911 the north boasted incomes 50 per cent higher than the south. By the mid-1980s, for all the funds poured into the Mezzogioroo, the

north-south income gap had widened to 80 per cent. Betwean 1970 and 1988. snpremely civic Emilia-Romagna jumped from 45th to 17th place in a list of 80 EC regions ranked by gross domestic prod-uct per bead. Calabria in the south - the least clvic region stayed in last place.

By providing evidence that Italian regions inherit their institutional performances from centuries of civic traditions, Putnam has provided a thesis with disturbing implica-tions, not only for Italy. As one unnamed regional president in an "uncivic" region said to him: "This is a counsel of despair! You're telling me that nothing I can do will improve

our prospects for success." If this is a melancholy thought for Calabria, it is still more dispiriting for parts of the former Soviet Union and eastern Europe burdened by traditions of autocratic goveroment pre-dating communism. Cooversely, Putnam provides

hope for now-liberated countries where efforts to overcome the legacy of communism are helped by previous centuries of clvic-minded pluralism - for instance, in Bohemia or the Baltic states. A sign of the longevity of pre-communist political and cultural traditions has already been seen in the former Yugoslavia, as well as, less disastrously, in the break-up of Czechoslovakia.

This week, tha Italian prime minister has spoken of the risk that his country could split between north and south. In Italy's current political confusion, the regions' diverse traditions of civic responsibility, and the evident failure of a large part of the political elite to live up to them, are aggravating fissiparous tendencles. It is to be hoped that these pressures will not force Italy to

David Marsh | turely celebrated.

ECONOMIC VIEWPOINT

The wedge and gap in Budget

By Samuel Brittan

The output shortfall is the more worrying of the two. The chancellor seemed to assume in his Budget speech that any resumption of growth would make inroads on nnemployment and that it was all a question of delays and lagging indicators. Not so.

do not want to spoil the

party; but it is time some-one pointed out that the UK chancellor has announced what is to all

intents and purposes a one per-

centage point increase in the

rate of income tax to come into effect in a year. He was able to

escape the uproar that a

straightforward announcement

would have caused by taking

advantage of the strange con-

vention under which one part

of income tax is given the

tion"

shaped.

There are two key concepts. The first is the output gap. This is an estimate of tha degree to which increases in demand can readily be absorbed by producers without increasing inflation. (In its modern form it is not a pure physical measure. There could still be millions unemployed after the gap has been reduced to zero.) The size of the output gap has been estimated by the Bank of England to be in a very wide range between 21/2

per cent and 7 per cent of GDP. The second important concept is the growth of productive potential. If actual output is growing faster than this, the output gap narrows and unemployment eventually drops. If output is growing more slowly, unemployment will increase This will be so even if the chancellor is proclaiming "recovery". The process will then only be alleviated by wasteful methods such as premature scrapping of equipment or forced or voluntary retirement of workers from the

labour force. The growth of productive potential is estimated by the Treasury at 21/2 per cent a year; but it could well be higher owing to the resilience of productivity increases. If unemployment is to be reduced ontput will have to grow at least as fast as this, Otherwise we remain in a growth depression.

Yet according to the Treasury's projections it is not until 1994-95 that non-North Sea output even starts to grow fast enough to make inroads into the output gap. Moreover, even if we take the lowest end of the Bank of England range for that output gap, it is not quite filled even by 1997-98, at least one year after the next

DTI's significant

overseas trade

From Mr Richard Needham MP Sir, I was interested to read the article about the Austra-

lian Trade Commission ("Trad-

ing with purpose", March 4),

which asked the question:

on tha other hand, leaves the

PSBR at 214 per cent of GDP, well within Maastricht guide-

Here the PSBR falls only slightly, despite the projected tax increases and remains in 1997-98 at 5% per cent of GDP. This is about the same as in the last year of the Callaghan

government. What are the policy implications? Would we need ferocious cuts in spending and tax increases to reduce the Budget deficit to a sustainable rate? Or, on the contrary, would the deficit have to be allowed to run or even increase to stimulate spending in a slack economy? I would be interested in the views of informed readers. so long as they are typed, and they do not expect an individ-

It is symptomatic of the lack of progress of macroeconomics that a response anywhere between these opposites can be justified by qualified practitioners. Simply doing horrifying algebra on the explosion of debt interest is inadequate. For such sums normally assume that output is unaffected by the deficit or measures taken to curb or increase it.

In fact, the Budget is not just a replica of that of households and companies. On the contrary, it is reasonable for the public sector to spend more at time when the private sector is hesitant to spend.

Of course, it would not make sense to pay out larger and larger sums of debt servicing at high interest rates to the people whose money the government has borrowed. If the long-term climate turns out to be deflationary rather than inflationary, it would be best 10 use fiscal policy as a shock absorber, and then concentrate on reducing interest rates.

Such a course would be diffi-cult for Britain alone because of exchange rate implications. Some have said that the UK is in no position to take a lead in international economic policy, after the humiliation of its departure from the ERM. The present state of world ecooomic leaders is such that anyone with ideas could take a

It would however halp if the British government did more to dispel the widespread Continental view that its main recovery strategy is competitive devaluation - a view ! spend so much time trying to dispel on Continental visits. But to do so would involve saying more about sterling than the purely historical frightened sentences which appear in the Red Book. Nor is British influence helped by Norman Lamont's seizure of every opportunity to beat the patriotic tin drum for his backbenchers.

Budget whittles away at pensions and penalises with ACT changes

From Mr Robin Ellison. Sir, It is intriguing that Norman Lamont, the chancelior, has cancelled the statutory retail prices index increase in the amount of pensionable earnings for the next financial

year. It stays at £75,000.
It seems to be government policy that the relief will be whittled away by inflation over time, rather as the mortgage interest tax relief figure has been. It is all very odd; by the turn of the century not only will fewer promised pension benefits be protected by any form of funded security, but only tha lower-paid will have

any interest in pension funds. It reflects a conflict of policy between the Treasury (determined to abolish the perceived tax breaks of pension schemes) and the Department of Social Security which, like its col-leagues throughout Europe, for demographic reasons is anxious to encourage the funded private sector to assume the burden of the provision of retirement income in order to relieve the public sector. Since a receot Institute for Fiscal Studies study indicated that the tax breaks were in reality rather modest, shouldn't the DSS try to argue its corner a little more strongly?

Otherwise, maybe the Goode Otherwise, maybe the Goode Inquiry into pansions law should now call a halt to its deliberations, and save some public money. Without trying to sound hyperbolic, if the policy is continued then by the end of the decade there are

unlikely to be that many pension funds around to need increased protection. Ellison Westhorp, 52 Carter Lane. London EC4V 5EA

Sir, What the chancellor did not say in his Budget speech, but should have done, was: "Some of our multinational companies have a problem with surplus advance corporation tax. I propose to help them at the expense of the share-holders of all UK companies by reducing the latter's gross dividends by 6.25 per cent. In addition to helping those multinational companies, I shall benefit by some £1.2hn per

One hopes that the need to help the Treasury and the multinational companies conceroed will be appreciated by:
1) those who do not use up
their personal allowances and who will face a 20 per cent-plus fall in their tax rebates on divi-

dends; 2) higher rate taxpayers whose higher rate tax on their net dividends will rise by 25 per cent; and

3) employers whose pension funds will require larger contributions to compensate for the reduction in their gross UK dividend income of 6.25 per Jenny Nelder,

Feebonse advalen

Feebonse adv

His first bet is that the Treaeury's complicated collection of changes in taxation will convince the markets, the Conservative party, and the public that the goverument has regained the equilib-rium it lost on Black Wednesday. It is too soon to call this bet. The markets remained remarkably steady yesterday, in spite of the realisation that Mr Lamont's medium-term strategy for reducing the budget deficit is, to say the least, unambitious.

All talk of a balanced budget

has been thrown overboard. Next year's public sector borrowing requirement will rise to £50.1bn. If requirement will rise to £50.10h. If Tuesday's forecasts are correct— a big "if"— the proportion of gross national product consumed by public spending will fall to 44 per cent by 1996— exactly where it stood in 1979. Yesterday's relative calm in the markets may suggest that there is a willingness to give the government the benefit of the doubt. The explanation may, however, be more mundane: an expected cut in German interest rates today.

Mr Lamont's second bet is thet accelarating economic growth will lead to comfortable increases in real earnings in time for an election in 1996 or 1997. Extra cash in pockets would wash away the blt- to pinch themselves to believe it.

ter taste of the extension of value-added tax to domestic fuels, along with the pain of the other salami silces of additional taxation announced on Tuesday. But the chancellor cannot have it both ways. Too low an earnings increase would not win the votes; too high would rekindle inflation and keep unemployment rising. The chancellor's third flirtation

is with Lady Luck. The Conservatives presumably base their hopes for a fifth election victory on the cynical helief that votera will quickly forget that a campaign fought in April 1992 on the promise of no increase in taxes was followed by a Budget in March 1993 that put on more new taxa-tion than Labour's Mr John Smith dared think of. This is a danger-ous assumption. Political memories are usually mercifully short, even though some bad experiences enter the tribal consciousness of the nation, as Labour found to its cost after 1978-79.

ination, becoming a prime item on television news and a subject for If there is discontent in Britain talk shows. oes the UK Budget signal the end of a European-

wide carbon and energy

Simple formula for friction

US drug companies are joining battle against healthcare reform plans, write Paul Abrahams and Alan Friedman

1992, costs - including prices charged hy hospitals, doctors, laboratories, equipment makers and drug companies - incressed et more than double the rate of inflation. Health expenditure as a proportion of GDP rose from 7 per cent in 1965 to 12 per cent in 1990. It is. now \$800bn a year.

"However you measure it, health-care costs are killing America. US society just cannot afford to keep spending this much on health. Medical inflation is out of control and it is not even delivering better health.

Just look at the US's poor infant
mortality rate," ssys Mr Curtis Thorne, head of pharmacy at Cigma, which manages healthcare programmes for US companies.

For politicians looking for a solntion, the pharmaceuticals industry has proved an easy target. Between 1980 and 1992 drug prices increased by 128 per cent - nearly six times the rate of inflation, according to the Bureau of Labour Statistica. Prescription medicines are far more expensive in the US than elsewhere: on average, a drug costing \$1 in

America costs 67 cents in Canada and 60 cents in Europe.

The industry's high profitability - conspicuous during the recess-ionary early 1990s - has also made it vulnerable to complaints. Senator David Pryor, a Democrat from Arkansas and a leading critic of the industry, says: "Drug companies have been making returns on sales three times greater than the average for the Fortune 500 companies, and twice the return on equity. Whatever measure of profitability yoo take, pharmaceuticals compa nies come ont on top."

Mr Boh Cawthorn, chairman and

chief srecutive of Rhone-Poulenc Rorer, the Franco-American drug company, admits: "The pharmacen ticals industry has become the whipping boy of politicians because its price rises and profits have been so visible."

Drug groups have argued they are not to hisme for the healthcare spending crisis. Only 7 per cent of US healthcare spending is on medicines, they maintain. "Cutting the drug sector's profits

The UK Budget adds obstacles to an EC carbon tax, say Bronwen Maddox and David Gardner

would not have that much of impact. If you cut all the industry's profits and cut all its research that would only reduce healthcare spending at most by 3 per cent." says Mr Cawthorn. "That would not solve the problem for government, patients or the employers that pay

for insurance." The industry also says It needs high prices to fund the research and development of new medicines. The drug companies say that society needs e viable and innovative industry if it is to find a response to Aids, cancer. Alzheimer's and other

Snch arguments have not impressed politicians who have been emboldened by public support for sggreselve measures. Some members of Congress are taking advantage of the drug sector's poor public image to launch attacks both inside Congress and in the media. Indeed, the drug sector looks like replacing the chemical or oil sectors

as the industry held in least esteem hy the public, saye Mr Henry Wendt, chairman of SmithKline Beecham, the Anglo-Americao

The sector's poor image stems partly from its bungled response to pressure for price cuts. Last year, 10 leading pharmaceuticals groups, including Merck and Pfizer of the US, Glaxo and ICI of the UK, and Roche of Switzerland, pledged they would in future not increase prices hy more than the rate of inflation on average.

Few consumers and politicians nnticed the wnrds "nn average". Inevitably, the prices of some drugs rose faster than the rate of inflation, even the if the groups' average prices were within the set limit Moreover, prices offered to hulk huyers of drugs such as Medco, e company that specialises in selling cheaply to company healthcare plans, are often at a discount. That means there is an increasingly uneven price burden for consumers. Many older Americans, whose insurance fails to cover the cost of medicines, have been left shouldering large price rises. Senator Pryor claims the drug groups broke their promises and should not be trusted

"The announcements were ambig-uous," saye Mr Wendt at Smith-Kline Beecham. He says his group's price increases were limited to 1.6 per cent last year.

The industry has reacted too alowly to concerns about pricing. Senior executives have not shown sufficient leadership. We are at the 11th hour and the 59th minute," says Mr Weodt. He believes it may be too late for the industry to head off the administration's reforms.

he exact nature of the measures being considered by the new administration remain unclear. "Nobody, probably not even Mrs Clinton's task force, yet knows what will be proposed on May 1," says Mr Cawthorn at Rhone-Poulenc Rorer.

The industry, shocked by the reientless attacks by Democretic politicians and fscing reform measures from the White Hoose, is launching a last ditch attempt to protect itself.

This mooth, Mr Wendt issued e rallying call for the sector to negotiate a new social contract between the pharmaceuticals industry and society. "We must show our customers thet medicines are good value," he said. He called for the industry to engage in price restraint and to invest in studies that not only showed that drugs were safe and effective, but that they were cost-effective as well.

But there is little time to get this message across. Almost daily assaults hy congressmen have started to take their toll, while a fresh attack by Mrs Clinton is unlikely to leave the industry

A jobless Budget

MR NORMAN Lamont's offering, for all his borrowing of the opposition's slogans, cannot honestly be described as a Budget for jobs. How could it be, with unemploy-ment expected to pass the 3m mark in today's February figures, and to carry on rising throughout this year and probably 1994 too? The pertinent question is whether the combination of Mr Lamont's macroeconomic helmsmanship and his Budget innovations willtogether deliver lower unemployment than would otherwise be the

It may seem masochistic to lament an omission of detail from Mr Lamont's performance. But the discussion of the likely course and labour market trends, both in his speech and the Treasury's Red Book, is inadequate. The developments in pay, productivity and the exchange rate that are needed if unemployment is to fall fast are either too obscure, or too painful, for the Treasury's economists to

analyse. Yet the implicit message is clear enough: massive unemployment is here to stay. The Treasury's pessimistic growth projections imply unemployment above 3m throughout this parliament. This will be so unless there is a further fall in the real cost of lahour, either through a further sterling depreciation or a sustained period in which real wages grow more slowly than underlying productivity. But to mention the former would court disaster in the marplay well politically with voters years. So must the supply.

who are to be punished by higher taxes in the next two years.

be a government with a "grip" on

the economy, but voters will have

High real wage growth, at the expense of permanently higher unemployment, appears to be deeply ingrained in Britain. But it is difficult to understand why the chancellor felt it necessary to compound the problem hy a 1 percentage point increase in National Insurance employee contributions effectively a tax on lower-paid

Yet the government also deserves modest praise. Its package of training and employment schemes for the unemployed is an imaginative step in the right direc-

Particularly encouraging are the our pilot Workstart schemes which will enable the long-term unemployed to transfer their welfare benefits as a subsidy to a private-sector employer. This is more desirable way of getting the unemployed back to work than poorly paid, temporary public or voluntary sector jobs.

Regrettably, the whole employ ment package is much too small. Extra spending of £125m, creating space for only 100,000 additional participants, looks puny alongside long-term unemployment of more than Im. The government should plan for a significant increase in the 1,000 initial Workstart places, if the trials are successful. The additional places should perhaps be targeted at the 200,000 people aged between 18 and 24 out of work for over a year. The demand for the government's new schemes kets, while the latter would not . will be rising for a number of

Paler shade of green ably yes. The tax proposals, in their autumn. But given that a commuably yes. The tax proposals, in their autumn. But given that a commucommitted itself to stabilising cartowards fuels with a high carbon sive to changes in fuel price —

tax? The answer is probconsiderable obstacles. The chancelissue Tuesday's comments by Mr lor's comments may well have com-Norman Lamont caused a sharp reaction in Brussels. Mr Ioannis The Budget, which included the imposition of VAT on domestic fuel Paleokrassas, the environment commissioner, insisted that negotiaand higher petrol and higher petrol tions towards the energy and car-bon tax would continue. "I don't see and car licence taxes, made more claims to greenness than any of its why we should withdrsw the predecessors - even though the [energy tax] proposal." However, he claims were immediately disputed welcomed the new green taxes "as long as they are in the right direc-

The chancellor argued that these tion - and these ones seem to be in measures would help reduce carbon the right direction." The Budget has put the UK in an dioxide. emissions and combat global warming. Bnt while he odd position: ahead of many Comagreed that "there may be a case for further co-ordinated international munity members on measures to restrain carbon emissions, but resisaction on global warming", he added: "I remain unpersuaded of tant, it appears, to the Commission's proposals that could force the need for a new Buropean Comothers to follow suit. Concerns munity tax. Tax policy should con-tinue to be decided here in this about the UK's stance are likely to surface next Tuesday when energy House - not in Brussels."

The swipe at Brussels' influence and environment ministers meet at a special "jumbo" council.

is hardly unfamiliar, and the UK government's resistance to the pro-posed EC energy-carbon tax began to eurface as long ago as last

bon dioxide emissions at 1990 levels hy the year 2000 on condition that its main trading partners take similar steps. However, a recent internal Commission report showed that, without a tax, EC emissions were set to miss that target by a minimum of 4 percentage points.

The original BC plan was to

impose a combined carbon-energy tax, starting at \$3 per barrel of oil or oil-equivalent and amounting to \$10 by the end of the decade. Fuels would be taxed more heavily the higher their carbon content - coal has more than gas, nuclear has almost none.

Discussions on the plan were given new vitality by the new US energy taxes announced by ths Clinton administration. But consensus between the Community members remains difficult, according to

Mr Paleokrassas. That joint council, a rare occur-The carbon part of the tax plan rence, is a sign of new efforts to has proved the most controversial. resuscitate the proposals, which have made little progress since the France - heavily committed to nuclear power - wants the carbon-

element. The UK wants a smaller carbon element, a position likely to be strengthened by the current review of the coal industry Which is likely to preserve some uneconomic pits. As Mr Robert Jones, chairman of the UK parliamentary select committee on the environment argued, it hardly makes sense to subsidise a fuel industry and at the same time introduce a financial incentive to switch away from that fuel.

The energy part of the tax has also come under attack from poorer countries: Spain in particular argues that the richer countries which emit most carbon dioxide. and have most resources to spend on energy-saving technology, should be set higher reduction tar-

Bnvironmentalists and economists have also challenged the proposed tax's environmental effectiveness, particularly on transport, the fastest growing sector of carbon dioxide emissions in both the UK and Europe overall.

in its original form, the EC esti-mates the tax would have raised the price of petroi by only 6 per cent and diesel by only 10 per cent. transport economists were sceptical yesterday that even the Budget's extensive package of extra costs for UK motorists would have much impact on traffic levels.

One of the most effective deterrents, they argue, is poor roads and traffic jams, but the UK, as well as much of Burope, is embarking on a heavy road-building programme. On that argument, even if an EC tax were weighted more heavily towards transport, as recent councils have begun to explore, the environmental benefit could still be neg-

These tensions suggest that if non posals for an EC tax survive, it may well be in a looser form - an aggregation of each country's measures some perhaps taken for fiscal rather than environmental reasons. Next week's council will help show whether the UK chancellor's comments have been truly obstructive, or whether they are a sign that discussions are already moving towards a modified tax.

Handle with care

THE BOARD of governors of the International Atomic Bnergy Agency meets in emergency session in Vlenna today to decide what to do about North Korea. That country has refused access to two liquid waste facilities, identified by satellite reconnaissance. whose existence suggests a capacity for reprocessing plutonium on a larger scale than it had admitted

to possessing.
Maanwhila North Korea has announced its withdrawal from the nuclear non-proliferation treaty (NPT) - an unprecedented etep, which however cannot legally have immediate sffect. Under the treaty, three months' notice must be given to all other parties and to the UN Security Council, and must include a statement of the extraordinary events" the withdrawing state regards as having "jeopardised its aupreme interests".

The Security Council could in theory order North Korea to remain an NPT signatory and to comply with the IARA's request, and impose sanctions if it fails to do so. The question is whether sanctions aimed at further isolating a state which has already so isolated itself would actually be effective in altering Its behaviour. The track record of economic sanctions without military action is not impressive.

Military action is what North Korea claims to be afraid of. It has already put itself on a "semi-war" fcoting, in response to the joint US-South Korean military exercise, "Team Spirit", which it also

justifying its withdrawal from the NPT. There is in fact nothing very extraordinary about it - such exercises have been held regularly since 1976 - hnt North Korea apparently regards it as a breach of an agreement reached with the south in 1991, under which it agreed to accept IAEA inspections of its nuclear facilities in return for the withdrawal of US nuclear weapons, and nuclear-capable ehips and aircraft, from South Korea. The US has withdrawn them; but some of the ships and aircraft taking part in Team Spirit are, or were, nuclear-capable. How likely it is that North

Korea is building a nuclear weapon, and how far if so it might have got with it, are questions on which experts disagree. Only full inspection by the IAEA can settle the matter. If North Korea has a lot to hide it is hard to see why it agreed to IAEA inspections in the first place; but many aspects of that state's behaviour defy conventional ideas of reason.

What is clear is that neither South Korea nor any of North Korea's other naighbours have any desire for military escalation. in 1991 and early 1992 conciliatory gestures by the US and South Korea produced the beginnings of a thaw. It may be that by staging Team Spirit the US and Sonth Korean militaries have inadvertently upset their own governments' diplomatic strategy. If so the Security Council, before it decides to assume the worst and embark on the stony road of sanctions, should be looking for ways cites as the "extraordinary event" to get that strategy back on track.

Behind the

There's often, if not usually, more interest in what a company chooses not to say when publicly announ-cing the appointment of a new non-executive director than in the facts it takes pains to maks known. · Take for instance Malcolm

facade

Parkinson, at 45 the first Pro-Ned-sponsored recruit to the board of builders' merchants James Latham. "A marketing specialist" who has "forged a distinguished career", purrs the stock exchange announcement, going on to recount how he huilt up the do-it-yoursalf chain B & Q, then moved on to belp defeat Dixon's unwelcome bid for Woolworth Holdings before becoming chief executive of the

same. End of official story. But surely all that was more than five years ago. Is not this the same Parkinson who quit Woolworths in November 1987 for a £150,000a year joh as a director of Benlox, the tiny engineering group which he and merchant banker Peter Rarl used to attempt a ludicrously

ambitious takeover of Storehouse? After Benlox's £2bn bid flopped, Parkinson launched the Retail Corporation, with £10m by way of backing, which aimed to set up a nationwide chain of garden centres. That tumbled into

receivership a year ago. So what might be the moral? Don't listen to professional

publicists, for one thing. And keep announcements of non-executive board appointments as brief as possible - name, age and current occupation are all that's required.

To the cleaners

■ When Moroccan hank-tallers refused to accept the dirty and dog-eared foreign currency cold cheaply to citizens of Rabat by a money-changer from Mali, the recipients angrily took them back. He promptly offered them a cut-price "magic cleaning lotion". The laundering proved his undoing, however. The notes turned out to be counterfeits, and he's now all washed up in prison.

Glitch doctor

Yet another rumpus has been stirred up by France's maverick minister of health and humanitarian affairs Bernard Kouchner. The controversy that has surrounded him ever since he entered politics is still clouding his plans to depart after this month's elections.

The latest gaffe by the doctor who founded the dashing Médécins Sans Frontières team of flying medics in the 1970s comes on top of his affront to the politically correct in publicly remarking that he'd occupy himself by "thinking, writing and looking at women". To fill the rest of his time he intended not only to set up a new

humanitarian foundation, but to

OBSERVER

'I look in the flames and I keep seeing Norman Lamont'

take an academic post. Alas, the one he'd found - the honorary professorship of humanitarian medicine at the Cochin university hospital in Paris - has hit trouble. The glitch is that it would have been specially created for him. which has so outraged conservatives in medical quarters that even the intrepid Kouchner has bowed by renouncing the post.

Rolling road

■ Paul Keating's newly re-elected Australian government has decided to give a rough ride not only to royalty, but to visiting VIPs of all kinds. It is selling the fleet of plush

cars used to chauffeur them, on grounds that they are inadequately attack-proof as well as too costly to maintain, and buying armoured Fords and Holdens instead.

The unwanted wheels include seven Rolls-Royces - three black 1958 Silver Wraiths, two black 1965 Phantom Vs and, fittingly, two "royal claret" 1964 Silver Cloud IIIs - besides two 1954 Land Rovers in mere ordinary claret although specially built for conveying crowned heads. Offers direct to the Australian government, please.

Party pledge

"Abstaining" could take on a new meaning in Poland's parl-iament with the forming of a brand new party. Shocked by the 16 seats woo in 1991 by the ale-loving alliance of the Big Beer and Little Beer parties, a tectotal group has set up the Party of Sober People. Adversaries say that, given the

Poles' habits, its main problem will be deciding which telephone kiosk to use as a venue for its party conferences.

Over-proud

■ While national rivalry has been a potent force for good and ill, it is perhaps less well understood as a force for deliberately inflating a firm's accounts. National pride is, however, the only explanation building products group Expamet International can offer for the behaviour of managers at what

used to be its Netherlands ductmaking subsidiary. Brema Air. They were recently discovered to have inflated profit figures because, it seems, the Dutchmen simply couldn't bear to be seen to lag behind the group's UK husinesses. However, Expamet is not taking the local managers to court, since none of the miscreants

Indeed, Expamet boss Alex Orr, who understands the intensity of international rivalries from ths days when he ran the mile for Scotland - tells me that far from profiting, they even put £500,000 of their own money into the company during the audit, although they took it out afterwards.

made a penny from their misdeeds.

Watershed

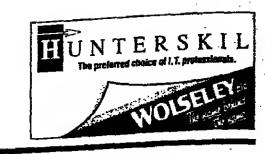

■ Is water polo dangerous? The risks clearly aren't confined to the one immortalised by Tony Curtis when, impersonating an aquasporting millionaire in Some like it Hot, he answered the question with: "I should say so. Why, the last time I played, I had three ponies drown right under me."

The Red Stars water polo team from Yugoslavia bave just been left high and dry in South Africa because, in the opposite of a case of the biter bit, the Pretoria government has endorsed the UN sanctions against their country. They did manage one game on

Monday, but the rest of their programme has gone down

FINANCIAL TIMES

Wary Delors to meet Clinton

Lionel Barber on talks between two powerful men from humble stock

MR Jacques Delors. European Commission president, has takeo a gamble in pressing for a meeting with President Bill Clinton in Washington today.

The Frenchman's feelings about America have always been amhiguous, a mixture of envy and sdmiration. With the new administration pressing Europeans to reduce aviation and steel subsidies, and to modify Buy European laws on government procurement, some of Mr Delors' fears appear to be coming

If the US carries out its threat to block Enropean companies from certain federal contracts next Monday, it will look like a calculated snub.

In Brussels yesterday, EC offi-cials remained unsure whether Mr Delors, 67, intended to show the charm which at times wrongfooted Mrs Margaret Thatcher, the former UK prime minister, or whether be might repeat his recent remark about Mr Clinton's "need to preen in front of the mirror to make sure that his

muscles are still firm". The White House meeting was loog planned, although st one stage a disgruntled Mr Delors was told he could have only 15 minutes, according to one EC

industrial policy to a mistrust of the free-market deregulation of

More tentatively, EC officials mention common bumble roots: Mr Delors rose from peasant stock to become mayor of the Parisian auburb of Clichy and finance minister in the first Mitterrand government, while Mr Clinton's eacape from Hope, Arkansas, is already the stuff of American folklore.

Yet differences remain. Despite his intellectual prowess, Mr Delors remains instinctively sus-picious of the US. His behaviour in the Gatt trade talks is characteristic. Even if charges that he is a eurrogate of a protectionist French government are wide of the mark, he still explodes at what he sees as the US tendency to bully, notably on farm trade. Last October, at the height of the Gatt negotiations, Mr Delors did a passable imitation of the late Charles De Gaulle when he declared: "If Europe is to become adult, it must be able to say No

to Big Brother.' It is fashionable to speak of him as a spent force at the Euro-pean Commission, where his mandate runs out next year. But "General" Jacques believes there may be life after Brussels, and is quietly plotting a re-entry into French politics, where some think he is the likeliest man of the left to beat a right-winger in a presidential election in 1995.

Mayor to be next US ambassador to Vatican

By Jurek Martin

THE CITY of Boston was astonished on Tuesday night when its mayor of 10 years, Mr Raymond Flynn, announced he was to be the next US ambassador to the Vatican.

There had been no hint in the days before St Patrick's Day that the popular Mr Flynn - Boston-Irish, liberal, Catholic and an opponent of abortion - would be so honoured or was thinking of leaving his urban charge in the middle of his third term.

Most local speculation had centred on who was to become the next ambassador to Dublin, a nomination long expected to mark the visit to the White House yesterday of Mr Albert Reynolds, Ireland's prime

President Bill Clinton confirmed most rumours hy announcing that he had chosen Mrs Jean Kennedy Smith, sister of Senator Edward Kennedy from Massachusetts and his two slain brothers.

Another woman with impeccable political credentials, but no formal career in politics, is widely expected to get the plum embassy in Paris. This is Mrs Pamela Harriman, English-born widow of the US statesman Mr Averell Harriman, former wife of Mr Randolph Churchill, and mother of Mr Winston Churchill, a Conservative member of the

UK parliament. Mrs Harriman is a great Washington and international socialite, long a prominent Democratic party fundraiser and an early supporter of Mr Clinton. She speaks French finently and is widely reckoned to possess a political acumen comparable to

her considerable charm. The Paris embassy, like that in London, is normally reserved for political patronage, and Mrs Harriman was rumoured at nne stage to be in line to be ambassador in the country of her birth. She always denied this, expressing a preference to stay in Washington now that it had a Democratic president.

It is now widely believed that Mr Raymond Seitz, the first pro-fessional diplomat ever to be US ambassador to the Court of St James, has been asked to stay on in his present post for at least another year. This would satisfy tha UK govarnment, which regards him highly.

Another important embassy, that in Tokyo, also seems to have been earmarked for Mr Richard Holbrooke, the Asian expert who served in President Jimmy Carthowever a crucial point at issue. | er's State Department.

THE LEX COLUMN

Getting in on the ACT

A 30-point fall in the London equity market and a 1/2-point rise in long gilts seems a proportionate response to the chancellor's advance corporation tax surprise. For tax-exempt institutions the reduction in ACT rate from 25 to 20 per cent marginally improves the attraction of gilts over equities. But that is unlikely to provoke much widespread switching. A fall in equities of around 2.5 per cent would restore gross yields to the level before the chancellor stood up. Yet given a number of offsetting factors, that would be received for the chancellor stood up. excessive. Companies will receive a cash flow boost. Some may even increase dividends to compensate institutions for their lost income.

Such institutional pressure for higher payments would be rather rum. They would be unlikely to respond sympathetically if their employees demanded higher pay to offset per-sonal tax rises. The chancellor has transferred resources from institutions to companies, and he has effectively encouraged retained earnings over dis-tributions to pension funds. Such a hias towards corporate investment may even have been deliberate.

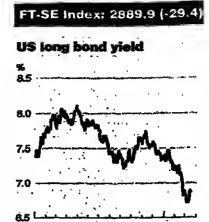

These changes will produce some mixed results among high-yielding shares. Those such as ICI with low or no - dividend cover may suffer, since they clearly cannot increase payments to compensate for the sharp drop in gross yield. Others, such as Redland, which will benefit from improved cash flow, might do well if their dividends become more secure. And high yielding shares with good cover may be bought to replace lost yield – hence the demand for utility

stocks yesterday.

Proposals for foreign income dividends are further away and more opaque, although there is a clear conflict between companies wishing to cut their unrelieved ACT by issuing such dividends and institutions demanding UK payments with tax credits. Perhaps the chancellor will permit pension funds to take the UK dividend and taxpayers to take the overseas one. Such tax efficiency, though, was probably not what he had in mind.

Pension funds

The reduction of pension funds' tax credit on UK dividends could hardly come at a worse time for the industry. The credit was sliced from 35 per cent to 25 per cent in the 1980s, hut dividends were then growing faster than liabilities. Yesterday's cut to 20 per

cent comes in a period of anaemic dividend growth. It may be the final hlow for pension fund surpluses that are already shrinking.

Domestic equities remain the best match for most pension liabilities. But actuaries rolling a reduced yield on equities forward through the life of a fund might conclude that uncovered liabilities have increased substantially. Perhaps £20bn may have to be found over time to make np for lost investment returns. Higher contributions from employers - and an early end to contribution holidays - are the obvious places to look. That will drain company profits once the gap shows up in pension funds valuations.

Whether this is only the thin end of the wedge remains an open question. For the first time the chancellor has uncoupled the tax credit from the basic rate of tax, which remains at 25 per cent. The innocent interpretation that he is simply looking forward to the day when the basic rate is set at 20 per cent. But with the fiscal position so tight, he may be tempted to come back for more. Taking the credit away altogether would yield a further £4bn

US economy

After Friday's disappointing US producer price figures, yesterday's underlying rise of 0.5 per cent in February consumer prices is somewhat unnerving. But it would be premature to conclude that inflation is gathering strength again. The consumer price figure was boosted by an unusually large hut prohably one-off rise in clothing prices. Producer prices reflected the higher cost of lumber as sawing restrictions were imposed to protect the spotted owl.

mits bre

That could be a sign that regulatory actions hy an interventionist Clinton administration could push up the overall price level in the US. Otherwise there is little obvious inflationary pressure huilding up in the system. Broad money growth and credit demand remain weak. Productivity gains should restrain prices, and though capacity use is at its highest for 18 months, it is still not stretched. There may be room for long bond yields to plumh new lows around 6.5 per cent in the next few months. That would ha all the more likely if, as some expect, the rapid recovery established around the turn of the year

slows in the second quarter. For the time being the global bond market environment should thus not hinder the UK chancellor's efforts to finance the £50bn public sector deficit announced on Tuesday. Disinflation-ary pressures still seem strong enough to offset growing calls hy governments on bond markets around the world. That feeling could grow when continental European interest rates turn decisively and inverted yield curves become positive again.

Spring Ram

The suspension of Spring Ram's shares, for an unspecified reason, five days before its annual results raises some frightening spectres. The most benign possibility is it is having lively discussions about its ACT position after the Budget changes. The alternatives scarcely bear thinking about, coming just four months after revelations about "serious misrepresentation and false accounting at one of its subsidiaries. Spring Ram's directors did a good loh in reassuring institu-tional investors that the problem at Balterley Bathrooms was a one-off lapse. The share price showed surprising resilience after the initial fall. But any further misfortune, whatever its nature, would send infuriated investors scurrying for the door.

There have long been niggles about Spring Ram's depreciation policy and the accounting treatment of stocks and government grants. The fast-growing company's highly-charged culture and continued failure to appoint con-executive directors only heighten the sense of unease. At the same time Spring Ram has raised expectations to inordinate heights. If It is now about to disappoint, the recriminations will prove hitter.

HOW TO BE UP HEN THE MA IS DOWN

Most speculators invest in the market on the expectation of a rise. But more money can often be made when it falls.

IG Index is Britain's leading financial bookmaker. We take bets on the Footsie, Wall Street and Nikkei. plus over eighty futures and options.

With us you can speculate on rises or falls. You place 'up bets' and 'down bets'. The more the market moves your way, the more you win. And by making a 'controlled risk bet' you can put a guaranteed limit on any losses, even overnight. More good news, profits are absolutely tax free.*

All bets are welcome, large or small. So whether you're a bull or a bear, discover a more exciting and easier way of speculating. Winning when the market is down has its moments.

For more information call us on 071 828 7233.

NB: Prices of futures and options move up and down very rapidly indeed. Never speculate with money you cannot afford to lose, *Under current legislation which is subject to change.

Deutsche Bank rethinks stake in Daimler-Benz

By David Watter in Düsseldorf

OTHE FINANCIAL TIMES LIMITED 1993

MR RONALDO Schmitz, a Deutsche Bank director responsihle for corporate finance, yesterday said that Daimler-Benz and Deutsche Bank had decided it was inappropriate for the bank's stake in the industrial group to stay at 28 per cent.

However, Mr Schmitz told a conference of international investment managers in Düsseldorf there were no immediate plans to reduce the holding. "There are those in the bank

[Deutsche Bank] who may feei sorry not to have got out [of Datmler-Benz] when the price was better," said Mr Schmitz. The Deutsche Bank, as Germany's biggest bank, is at the centre of the German system of corporate governance. Its board directors have more than 100 seats on supervisory boards and

Its influence is consolidated by a network of industrial holdings. While making one of the most ontspoken contributions to the debate over German corporate governance to have come from a senior member of the German corporate establishment, Mr Schmitz said German companies should transform their approach to shareholders.

If they did not take greater account of shareholders' interests, German industry could face dire consequences in the 1990s as it stood on the brink of "the most

tion since the second world war". This restructuring can only be achieved with the belp of foreign capital, he warned.

Mr Schmitz, a former finance director of BASF, the large German chemicals company, said German companies traditionally put the interests of shareholders low on the list of management priorities. This was perhaps understandable in the 1980s, when German companies gener ated so much cash that they could finance all their investments from internal resources. But the era of "over-capitalised" companies was over and

German companies would now have to compete more aggressively on international capital markets to finance the recon-struction ahead. Mr Schmitz said companies should not pay lip service to the idea of shareholder value, they should take a more hard-nosed attitude to the way they managed their assets. He made a call for foreign insti-

sentation on supervisory boards - at present Anglo-American investors are not represented. Mr Schmitz said Deutsche Bank was in principle prepared to cut its industrial holdings to a

ceuticals marketing.

US bankers licked their wounds and looked south, writes Stephen Fidler

decade after they began a retreat from the region, A retreat from the region, the New York banks are again marching into Latin Amer-ica. This time, they insist, things will be different.

The banks say they are out of the business of making medium-term dollar loans to Latin governments. If Latin America's economic renaissance goes wroog again, the New York banks will face disappointment hut not

A region-wide shift in economic policy has brought the banks back. Governments have opened economies to outside competi tion, hrought budget deficits more in check and placed more reliance on the market. Lower inflation and a resumption of economic growth have followed in most countries. Deht hurdens have eased following sharp falls in US interest rates and the Brady initiative launched by the US government in March 1989.

The Brady debt reduction plan marked the psychological turning point for banks in Latin America. Until this point, says Mr David Berry, director of research et bank analysts Keefe Bruyette and Woods in New York, "the correct approach was to continue to reduce exposure to Latin Amer-ica". After five years of almost unremitting decline, the secondary market price of the old debt

began to rise. In the end, says Mr Berry, the banks prohably took excessive write-downs on their old debt. Citicorp, the bank with biggest exposure, has moved \$400m out of its third world debt reserve into its commercial reserves in the last five quarters.

For Citicorp, "Latin America is the largest single contributor as a regioo to this bank's earnings", says vice-chairman Mr William Rhodes. Last year, pre-tax profits from Latin America reached \$1.35hn, compared with \$475m from Europe, Middle East and Africa. \$805m from Asia-Pacific and a loss of \$1.01bn for North America.

This has vindicated, he says, the decision not to sell its Latin American loans into the second ary market, instead, the bank sought to "work out" the loans, for example, convert them into

Citicorp is unusual in having a large retail hanking and local currency lending husiness in the region. In some countries, it is the only foreign bank with such a franchise. Only one other east French market for drugs supplies coast bank - Bank of Boston has a traditional local currency business in the region, and that is much smaller. According to Citibank officials.

its proximity to potential clients in the region gives the bank a competitive edge in other areas: corporate finance, capital market activities and project finance. The hank has, for example, a mandate to raise \$1.8bn in project

Ethical aim helps UK bank return to profit

By John Gapper, Banking Correspondent

THE Co-operative Bank's marketing campaign to hrand itself as an "ethical" bank helped raise its retail deposits by 13 per cent last year, and return a profit

after two years of losses.

The UK bank, which has 2.3m customers, made a pre-tax profit of £9.8m (\$14m) in the year ending January 1993 against a £5.9m loss the previous year. The value of customer deposits rose above the value of loans for the first time in 20 years. The bank announced in May

that it would not become involved with tobacco companies or those that pollute the environ-ment. It has also taken a stand against blood sports, factory farming and the testing of cos metics on animals.

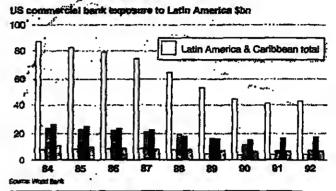

Mr Terry Thomas, managing director, said it had appealed to some of the most potentially profitable bank customers. These were white-collar and managerial employees aged between 25 and 40. We are aiming for those people because we think they are the market place of the future. We know the question of ethics has a ring to them because they are concerned about issues like protecting the environment." he

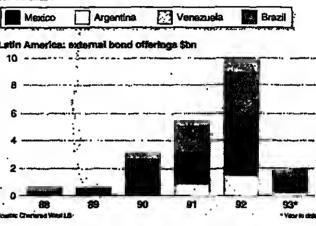

Half of the Co-op's new custom ers since May mentioned the ethical stance as a motive for opening an account.

The hank, which is wholly owned by the Co-operative Wholesale Society, said the month hefore sterling left the exchange rate mechanism last October that it would not speculate against sterling. Mr Thomas said foreign exchange profits of £450,000 reflected this policy.

Exposure to markets. It owns a hrokerage house in Argentina and has plans to own one in Chie; it has Latin America already underwritten domestic comes full circle

Back in favour with US banks

THE rediscovered enthusiasm of New York banks for Latin America is not yet shared by most other banks that suffered at their side during the 1980s debt crisis, Non-US banks, in particular the Germans and Japanese, for tax reasons were slower to sell off had loans and will be slower to return, if they ever do.

In 1992, German bank and US commercial bank exposure to Latin America was roughly equal at about \$37bn; seven years earlier, US commercial bank exposure at more than \$80bn was five times that of the German banks. Others, such as the UK clearing banks heve, by and large, become more domestic in focus during the 1980s.

Custana development in Colom-

In delivering these services, the bank is hampered by a low debt rating: its A minus senior debt rating from Standard & Poor's compares with JP Morgan's AAA and Bankers Trust's AA. The ambitions of these two banks lie explicitly with "investment banking", which means they have no interest in lending money from

their own balance sheets. Morgan has about 100 professionals involved in corporate finance and mergers and acquisitions lo Latin America, not including those working in trading and sales. Another 20 work on research. In the 1980s, "we decided that the new husiness

finance for British Petroieum's would not be to loan money but to help our government and privete sector clients in other ways." says one Morgan official.

The strategy lays emphasis on industry specialisation of its bankers. Observers reckon it has heen successful in cultivating contacts among investment institutions, which commercial banks traditionally lack. At Bankers Trust, Mr Neil

Allen, menaging director in charge of global emerging markets, ontlines some similar objec-tives. "Our focus is on capital markets, mergers and acquisitions, local trading, special situations and we'll also look at equity investment for our own account." The bank is positioning itself for growth in domestic capital equity issues. It is willing to make equity investments itself, in publiciy-traded or private companies and it is offering risk man-agement advisory services and mergers and acquisitions advice. However, bankers admit that offering advice is often labour-intensive and expensive; the real advantage it gives is often a priv-

ileged position in the underwriting of securities.

The banks have moved into the underwriting husiness as a natural extension of the secondary-market trading sctivity in old bank loans. Chase Manhattan's renewed interest in Latin America has been based on a strong deht trading operation: Chemical, having taken over Manufecturers Hanover, is also s

strong trading house.
There have been questions over the longer-term sustainability of an approach that relies on trading and underwriting Latin bonds. Mr Stephen Dizard, managing director at Salomon Brothers, calculates that total underwriting fees on \$20hn of new Latin hond issues a yesr amounts to \$200m-\$300m. With no house having more than a 10 per cent market share, this suggests gross underwriting revenues for the market leader of \$25m. As a series of poorly-received Latin bond issues last year showed, underwriters can lose money as well as gain.

Some believe the market is in transformation. Mr Larry Brainard, an economist at Goldman Sachs, says: "The husiness is changing in a fairly fundamental way and it's moving away from trading and commercial bank structured finance deals and more to a market oriented towards institutional investors." This would give Wall Street firms an advantage over the banks, most of which lack strong links with investment institutions.

Others disagree. Ms Kathy Cal-bralth, a senior vice-president at Chase, believes debt trading will continue as an important source of income for banks: "I don't see it as a market beginning to decline. Volume will continue to increase." Ma Galbraith admits though that Chase, a prominent underwriter of Latin bonds, and others with no broad equity business face an uphill fight in underwriting share issues.

Ms Diane Glossman, a hank analyst at Salomon Brothers, believes the balance of power lies for now with the commercial hanks "Commercial hanks have the relationships with issuers and relationships matters a lot, more perhaps than price. When issuers get more confident, companies can afford to he much pickier about price and then that picture could change."

GERMANY

If your corporation is looking for a foothold in Germany or intends to broaden its existing base by an acquisition, we can assist in search, approach and negotiation.

As our domestic clients are usually entrepreneurs, proprietors or shareholders of privately-owned German companies, we are well acquainted with their mentality. We are sensitive to this when making approaches and during negotiation and

Marley profits decline by 67% to £8m for year

By Andrew Taylor,

Construction Correspondent

THE REVIVAL in the UK bousing market is starting to boost sales of some building materials, according to Marley, the UK construction products group wblch yesterday announced a 67 per cent fall last year in pre-tax profits.

Profits after exceptional provisions of £10.4m slumped from £25m to £8.1m (\$11.5m), reflecting the deep recession in the UK construction industry

UK profits fell from £10.3m to just £1.2m, after a £2.3m second half loss. Up to a third of group sales are generated from

the UK housing market, according to Mr David Trapnell, chief executive.

US profits by comparison almost doubled from £3.9m to £7.7m. The German residential market showed little sign of flagging as far as Marley's products were concerned, said Mr Trapnell. The DIY market in eastern Germany remained particularly strong and profits in western Europe rose from £12.4m to £12.9m last year.

Net horrowings as a percentage of shareholders funds, following write-downs and currency movements, rose from 41 per cent to 57 per cent. Marley generated a positive operational cash-flow last year.

Uni fined NKr3.2m for rule breaches

By Karen Fossil

UNI STOREBRAND, Norway's biggest insurer, has been ordered by the Oslo bourse to pay a record NKr3.2m (\$450,000) fine for breaching information reporting rules seven times during the company's raid on Swedish rival Skandia Forşakrings.

A 155-page report condemns Uni's actions during the failed raid on Skandia in the period Angust 15 1991 to Angust 25

Uni, during 1991 and 1992, bullt a 28.3 per cent stake in Skandia in spite of a law forbidding Norwegian financial institutions from owning more than 10 per cent of foreign financial concerns without a special concession.

Uni borrowed heavily to finance the acquisition in an attempt to force the Swedish Insurer into a Nordic

Uni last year collapsed into the hands of public administrators after suspending pay-ments to creditors. The Uni affair has become

known as Norway's biggest corporate scandal. The finance minister is due to issue a report to parliament on the affair later this year, and a public commission is soon to be named to launch another investigation into the

The company's board bas two weeks in which to appeal the ruling.

Separately, despite Uni sbareholders' complaints, the bonrse decided to uphold its earlier decision to de-list the company Indefinitely.

Correction

Deutsche Babcock

The Financial Times last Tuesday Incorrectly reported the forecast dividend of Dentsche Babcock. The company expects to pay a dividend of DM5 (\$3) on common stock for the fiscal year ending September 30 1994.

Removing catastrophe from crisis

Paul Abrahams examines attempts to stave off the gloom at Bayer

AYER, the first of the Bayen, the most specials giants to report full-year westerday German chemicals results for 1992, yesterday painted a gloomy picture of the European economy's outlook.

Mr Manfred Schneider, the

chairman said: "The start of the year has been anything but satisfactory. Crisis is a productive state. We just have to remove the sense of catastrophe that goes with it."

Preliminary figures for the first half of March suggested that month-on-month sales figures had stabilised, bowever. Over the year, Bayer expected a fall of German sales of between 5 per cent and 7 per

working schedule for 3,000 employees following a collapse

the early 1980s.

Worldwide sales for the year would improve on the 11 per cent fall during the first two months, he said. But he cautioned that only last autumn Bayer had expected 3 per cent growth in group sales for 1993. Bayer announced a reduced

in demand for dyes, coating raw materials and polyurethanes. Chemicals plant operating rates fell below 70 per cent during February, the first time they had done so since

the first time at possible swaps or joint ventures with other companies, said Mr Schneider. Candidates included polyurethanes, polymers, titanium dioxide, chromium, dyestuffs and organic chemicals. "This is a change of mentality. In the past, we have been

reserved about such options, but we are now open to this type of deal - they are a good method for dealing with struc-tural problems," said Mr

At the same time, he said. the group intends to increase its capital investment in Asia,

The company is looking for particularly China, Taiwan and Indonesia.

The company's position had been exacerbated by the German health reforms, introduced in January. Their effects had been far worse than expec-

He warned: "If Germany really does become a country of generic drugs and cut-price medicines, there is no real future for research based healthcare companies in this

country." Deteriorating conditions in Germany could force Bayer to concentrate abroad, he said, primarily the US and Japan.

Grolsch climbs 3.6% over year

GROLSCH, the Dutch brewery group, posted a 3.6 per cent rise in net profit in 1992, with the recession in the UK and the economic slowdown in Germany oversbadowing more buoyant results in the Netherlands and on other export mar-

Net profit increased to Fl 43.4m (\$23.2m) from Fl 41.9m in 1991, when the rate of profit growth had totalled 10.6 per cent. Volume sales expanded domestically, in the US and in other export markets.

CBR holds

CBR, the Belgian cement group, proposed an unchanged

net dividend of BFr270 (\$7.88) a

share after a sharp drop in 1992

earnings, Reuter reports from

Brussels. The company said

earlier its consolidated net

profit per share fell to BFr606 from BFr797 in 1991.

CBR said the 1992 profit fall

was mainly due to the reces-

sion in the US and to a lesser

extent to a slump in the Dutch

graft.

Europei

THE EAST Asiatic Company. the shipping and international trading group, faces an urgent need to cut debt and restructure its capital this year. according to Mr Michael Fior-ini, chief executive, writes Hilary Barnes in Copenhagen.

The company fell into the red last year with a loss of DKr1.18bn (\$184m), compared with a profit of DKr245m in the previous 12 months. The loss cuts EAC's equity capital to DKr1.75bn last year, from DKr3.14bn in 1991. EAC will not pay a dividend this year after a 9 per cent pay-out in 1991.

The group made a primary operating loss of DKr55m, compared with a profit of DKr506m in 1991, although sales increased to DKr17.30bn from DKr15.63bn. After net financial expenditure, which increased to DKr615m from DKr99m, a profit of DKr281m in 1991 was turned into a loss of DKr613m.

The final net loss figure was arrived atreached after income from disposals and write-offs, and loss provisions for businesses that have been or will be discontinued.

The group's result in the current year would remain unsatisfactory, said the annual report, "but the plans which bave been made ... should ensure that EAC will strengthen its financial position in the course of 1993"

In the light of the recent hostile tokeover hid for Owners Abroad, the second-higgest tour operator, Thomson Travel affirmed its policy of remaining the leader "wbether mea-sured hy size, quality or profitability" in all markets in which it operates. "We will not allow our competitive position to be

eroded," the company said. Owners Abroad this week succeeded in ataving off the protracted £290m (\$412m) bid by Airtours. The travel industry had predicted that Thom-son would launch a ferocious price war had the Airtours hid remains "as competitive as succeeded.

pays \$225m for Chicago options firm

By Atan Friedman in New York and Lauria Morse

NATIONSBANK, the large US regional banking group formed in 1991 by the merger of C & S Sovran and NCNB, yesterday announced a move into the booming financial derivatives market. the

NationsBank, fourth-largest US banking group, said it had acquired for \$225m in cash - Chicago Research & Trading Group, one of the biggest proprietary options market-making and trading firms.

Mr Hugh McColl, chairman of NationsBank, said the deal would significantly enhance the bank's ability to serve its corporate and institutional customers.

The bank said the acquisition would enable it to offer a broad array of

risk-management products. CRT, founded in 1977, has 750 employees and \$250m in capital. It owns more than 150 memberships on 19 futures and options exchanges around the world and trades about 75 different options and fntures contracts, and needs to bolster

its capital base. The purchase allows CRT to compete directly with the investments banks that dominate over-the-counter trading of derivative products such as interest rate and currency swaps. CRT will also benefit from NetionsBank's client list.

Mr Philip Hubbard, who runs CRT, said an increasing portion of derivatives trading was now taking place away from exchange trading

In 1992 NationsBank recorded \$1.15bn of net earnings, more than five times the previous year's level. The bank's earnings had heen held beck in 1991 by beavy merger-related restructuring charges and provisions for bad and

Aga ahead 3% and sees further improvement

By Christopher Brown-Humes In Stockholm

AGA, the Swedish industrial gas group, saw profits after financial items rise 3 per cent in 1992 to SKrl.48bn (\$189m),z and it predicted a further improvement in its performance this year.

The dividend is being increased to SKr9 per share from SKr8.50.

Turnover fell to SKr11.9bn from SKr12.7hn, despita improved sales from both its core gas operations and Frigo-scandia, its cold storage and food processing business. The drop reflected the

group's 1992 merger of its rose 5 per cent to SKr8.97bn Uddeholm energy unit, which contributed SKrl.37bn to 1991 sales, with Swedish power group Gullspangs Kraft. Aga has 34 per cant of the capital of the merged group, which it reports as an associate com-

pany. Group operating income fell to SKr1.29bn from SKr1.46bn in 1991 when the group's energy operations made a SKr118m contribution. However, financial income amounted to SKri88m. compared with SKr27m in costs last year.

Despite recession in many

markets, and particularly in

the Nordic countries, gas sales

3 per cent to SKr2.91bn, but operating income dropped 35 per cent to SKr130m. This reflected fierce competition and reduced margins within

per cent at SKr1 16hn

the group's food process Aga's share of Gullspangs Kraft's profits amounted to SKr145m.

and operating income was up 2

Prigoscandia saw sales climb

The group's confidence for 1993 is based on its rationalisation programme, the weakness of the Swedish krona, and the development of new areas of application for its products.

US cruise ship operator in European move

By Nikki Tait in New York

CARNIVAL Cruise Lines; the Miami-based company which claims to be the world's largest cruise ship nperator in terms of passengers carried, said yesterday that it was considering a "strategic alliance" with Epirotiki Lines and Dol-phin Cruise Line.

Epirotiki operates 11 ships, primarily in the Mediterranean and around the Aegean. Dolphin is a smaller, Floridabased operator, with three ves-

The three businesses have already agreed to form a new company, in which each will bold a one-third interest. Carulval will sell its Mardi Gras cruise ship to the venture. The ship, renamed the Olympic, will be deployed in the eastern Mediterranean and operated hy Epirotiki.

Carnival, quoted on the New Ynrk Stock Exchange, operates 19 ships, and is blased towards the Caribbean, although it also offers packages to Alaska and other parts of the world. It has been a leading force in the trend towards "mega-ships," capable of carrying more than 2,000 passengers.

Companies seek unity on Unix

By Louise Kehoe In San Francisco

A GROUP of leading computer companies yesterday announced plans to develop a "unified" version of Unix, the computer operating system software that has iong been touted as a standard for "open systems" - computers that can ehare software and data. The move follows years of

industry in-fighting. The group includes iBM, Hewlett-Packard end Sun Microsystems as well as software companies The Santa Cruz Operation, Novell and Unix System Laboratories, a

It said that it would work to establish software standards. There are numerons incompatible versions of Unix, and the fragmentation has caused confusion, stunting the growth of open systems.

By establishing a standard version of Unix, the group aims to encourage aoftware developers to write new applications programs for Unix. thus making their computer and software products more attractive.

An operating system is the software that controls the basic functions of a computer. Applications software, such as accounting systems or wordprocessing programs, are generally designed to run on a single operating system and must be rewritten if they are to run on a different one. Over the past few years

establish a single standard version of Unix. This latest group may be more snccessful, however, hecause it includes former

there has been a series of failed

efforts by industry groups to

antagonists, analysts said. The group may also be more highly motivated to work together because Unix faces a new challenger in Microsoft's Windows NT, a powerful computer operating system that is expected to be launched in

date," said Mr Richard Flem-

ing, USG vice-president and

USG reaches agreement with creditors

USG, the parent company of US Gypsum, North America'a largest gypsum producer, filed a pre-packaged Chapter 11 bankruptcy reorganisation plan yesterday which it said would cut its debt obligations by about \$1.4bn and reduce annual interest requirements by about \$200m, Reuter reports from Wilmington.

It said the ownership interests of current stockboiders would be diluted significantly.

The plan also calls for a restructuring of bank debt. Under a pre-packaged scheme, a company reaches agreement on a restructuring

under the authority of the "USG bas sollcited and received sufficient acceptances to confirm the pre-packaged plan, one of the largest pre-

He added that "USG's primary goal is to emerge from with its creditors before filing for bankruptcy, minimising the time it spends

Chapter 11 as quickly as possible and to minimise the impact on our employees, our unimpaired creditors and our operating subsidiaries."
USG listed assets of \$1.8bn

and liabilities of \$3.1bn, including \$1.7bn in unsecured debt.

Iceland mounts | Effjohn sinks to bank rescue

By Christopher Brown-Humes

ICELAND'S government Is rescuing Landsbanki, the country's largest bank, through a IKr4.25bn (\$68m) support package in the face of the bank's soaring credit iosses.
State-owned Landsbanki has suffered badly

from the Icelandic recession and in particular from the sharp downturn in the fishing and fish processing industries. It has set aside IKr5.8bn provisions for credit

losses, and its international capital adequacy ratio has fallen below 8 per cent. Results due out in the next two weeks are expected to show a substantial loss.

Half of the IKr4.25bn injection will be in the form of subordinated debt while the other half will be equity.

FM261m loss

By Christopher Brown-Humes

INTENSE competition on its key Baltic sailing routes sent Effiohn, the Helsinki-based shipping group, plunging to a FM261m (\$43.21m) loss after financial items in 1992.

The result was also blighted by floating exchange rates, a Finnish travel tax, and heavy interest payments following extensive investments in new tonnage.

The group is scrapping its dividend, after paying FM1.20 a share in 1991 when it made FM4m profit after financial items. Turnover rose 10 per cent to FM3.73bn, due to

increased passenger traffic. The group's main operation, Silja Line, suffered a loss because of severe competition on its passenger routes between Finland and Sweden.

Brazilian pulp group back in the black

INTERNATIONAL COMPANIES AND FINANCE

as another chief resigns

By Kenneth Gooding, Mining Correspondent

ANOTHER SENIOR executive has suddenly quit Minorco, the Luxembourg-based overseas investment arm of the Anglo American Corporation of South

Mr Geoff Mortimer, 49, was recruited two years ago as managing director of Minorco's industrial minerals division after the company paid \$108m for the Elbekies sand and gravel business near Berlin in

former east Germany. His departure follows Minorco's top-level shake-up in December. Then, Mr Roger Phillimore, a joint managing director, left, having lost a contest for the chief executive's role to Mr Hank Slack.

Minorco made no mention of the departure of Mr Mortimer, formerly managing director of ARC's UK aggregates operations, when it released its half-year results yesterday. These revealed a sharp jump in operating earnings from the industrial minerals husiness from \$0.3m to \$23m in the six

months to December 31. Minorco said Mr Mortimer had "gone back to consulting. We are very sad to see him go." He will be replaced hy another former ARC executive, Mr John Draper. Minorco reported that its

financial income, plus earnings from equity-accounted investments, more than offset its operating losses in the half-year to December 31.

Earnings before extraordinary items were US\$101.4m, or 60 cents a share, 3 per cent ahead of the \$98m, or 58 cents, in the first-half. This was in line with many analysts' expec-

The interim dividend ls boosted by 6 per cent, from 18 cents to 19 cents a share. After spendiog more than

\$1bn in the past five years, Minorco still has net cash and short-term iovestments of just over \$1bn. interest from this, less corporate and exploration expenses, contributed \$59.6m in the half-year, down from \$85.5m. and Minorco's share of equity-accounted investments brought in \$52.6m, up from

Minorco's gold operations. mainly Independence Mining in Nevada, suffered an operating loss of \$13.1m, compared with a profit of \$4.2m, and the operating loss at the Terra fer-tiliser business in the US rose to \$23.2m, from \$11.5m. The Hudson Bay Mining and Smelting base metals subsidiary increased operating profits from \$3.1m to \$10.4m. During the half-year.

Minorco apent \$104m to take an interest in the Collahausi copper project in Chile, and \$127m went to develop existing

KIO executive quits paper unit

By Tom Burns in Madrid

MR MAHMOUD al-Nouri, chief executive of Grupo Torras, the Kuwait Investment Office's troubled bolding company in Spain, has resigned as chairman of the group's paper unit, Torras Papel. His surprise move underlines the increasing uncertainty that surrounds the KIO's Spanish business

operations Torras Papel, the leading domestic newsprint and writing paper producer, is under severe pressure from two of its main creditors, Lloyds Bank and Bank of America, the UK and US banks. It is also facing legal proceedings by Sarrio,

the Italian-owned cardboard producer, over outstanding debts totalling Pta8.6bn

Quelling rumours that Torras Papel might be forced into receivership, Mr al-Nouri said that the paper producer was "on the right track" to financial recovery and that he had left the company in order to "concentrate on the overall strategy of Grupo Torras."

However, Lloyds and Bank of America are insisting on the rapid payment of overdue interest and Lloyds, which is owed Pta250m on a Pta2.5bn loan, has already obtained a court order in Spain embargoing Torras Papel assets.

Payment of the interest is understood to be dependent on the sale of Grupo Torras' insurance unit, Amaya, but this unit has, in turn, been embargued hy the regional government of Catalonia, which is claiming unpaid back taxes.

Lloyds and Bank of America have part of their loans to Torras Papel secured by ahares in the Kuwaiti group's food company Ebro Agricolas, but plans for the latter's sale appear to have stalled.

Sarrto's lawsuit centres on two outstanding instalments owed by the Kuwaiti group following the purchase by Torras Papel of Sarrio's paper assets in February 1991.

Jardine motor subsidiary ahead 145%

By Simon Holberton in Hong Kong

JARDINE International Motor, the car distribution arm of the Jardine group, yesterday surprised the Hong Kong market with a 145.5 per cent rise in net 1992 earnings to US\$59.4m.

from US\$24.2m in 1991. Turnover advanced 44 per cent to US\$910.9m.

The directors recommended a final dividend of 4.95 cents per share, making 6.01 cents for the year - nearly 52 per cent up on 1991.

Mr Simon Keswick, chair-

man, said the record profits resulted from "excellent sales"

of Mercedes-Benz passenger cars in Hong Kong and China. The results for these markets reached record levels, led by outstanding sales of the new Mercedes-Benz "S" class mod-

Minorco shake-up continues | NEC heads for red on poor microchip sales

Michiyo Nakamoto analyses problems facing Japan's leading semiconductor producer

OR a husinessman who cuits fell by nearly 12 per cent has just struggled in 1992. In contrast, the US and tbrough one of the worst years for Japan's microchip industry. Mr Hajime Sasaki, NEC's vice-president in charge of semiconductors, appears aurprisingly relaxed about the company's prospects.

Earlier this month, NEC forecast it would plunge into the red in the year to March 3L Due to a downturn in demand for its products, including semiconductora, NEC said it would incur consolidated pretax losses of Y40bn (\$338m). As recently as last November, it forecast profits of Y10bn.

During the year, NEC lost its ranking as the company with the largest share of the world semiconductor market to intel, the US company, according to Dataquest, the market research

and consultancy group.
In fact, NEC's plight contrasts sharply with the improving fortunes of Intel, which last year increased sales by more than \$1bn to \$5.84bn and pretax profits by 31 per cent to \$1.07bn. Motorola, another US company, also had a strong year, increasing semiconductor revenue by 22 per cent to The main reason for the

hardship faced by Japanese semiconductor companies is as the steep fall in demand from the domestic market. The Japaneae market for

semiconductor integrated cir-

Asla-Pacific semiconductor markets grew hy about 20 per cent. "There has never before been such a regional gap in consumption growth," Mr Sasaki says. NEC depends nn its home

market for 75 per cent of its sales. "So, even if exports grow, their impact is limited." Mr Sasaki says.

Demand for semiconductors in Japan plunged as the main purchasers - the consumer electronics, vehicle and personal computer (PC) industries saw sales evaporate with the local economic slowdown.

PC sales fell by 10 per cent in 1992, while television and video tape recorder sales shrank hy 8 per cent and 12 per cent respectively, according to the Electronics Industries Association of Japan. Demand for cars has been so weak that Nissan. Japan's second-largest car producer, has been forced to close one of its main plants.

Moreover, the US is expected to increase pressure on Japan to ensure foreign semiconductor manufacturers get a larger share of the Japanese market when market share figures for the fourth quarter of 1992 are announced this month.

The outlook for Japanese semiconductors remains bleak. due to the continuing slump in the consumer electronics industry and in capital investment by domestic corporations. However, Mr Sasaki is optimistic about NEC's prospects. We expect a 10 per cent increase in worldwide demand for semiconductors." Demand has picked up strongly for dynamic random access memory chips (D-Rams), in particular, where NEC has an advan-

tage over other companies. As research and development costs are large, it pays to be in the D-Ram market only if a company can produce in large volumes. NEC is one of perhaps five Japanese compa-

r Sasaki is also optimistic that the US will not impose sanctions, even if foreign manufacturers fail to attain the 20 per cent market share targeted by The US and Japanese semi-

conductor industries bave

become so closely intertwined that imposing sanctions on Japan would impact on US companies as well, he says.

For example, NEC has a design and manufacturing agreement with MIPS, the US company, on reduced instruction set computing (Risc) chips, a deal with Micron Semiconductor to sell each others' memory products, and is talking to American Telephone & Telegraph about developing quarter-micron technology for future genera-

Hajime Sasaki: snrprisingty relaxed about NEC's prospects

tion 256-megabit memory

chips.
NEC announced this month it would drastically reduce production of its own IMbit D-Ram and compensate for this by increasing imports from Micron Technology of the US. The move not only belps NEC open up plant space for 4Mbit D-Ram production, which is expected to peak next year, but is also aimed at defusing trade friction with the US. Meanwhile, further alliances

are likely between Japanese semiconductor makers as a way of sharing research and development costs.

NEC is also carrying out a programme to halve costs in its semiconductor operations by 1994. This includes designing products requiring fewer steps in the manufacturing process, to allow a reduction in

e Gilts

factory space and equipment, However, analysts are asking whether these steps are sufficient. Mr Shigeru Yoshinaka semiconductor analyst at BZW points out that NEC has invested heavily in D-Ram production but, ironically, its relatively lower dependence on D.Ram revenue means it is unable to benefit from demand for memory chips to the same

extent as its competitors, NEC, meanwhile, depends for about one-third of its semi-conductor business on the audio-visual market, which is unlikely to pick up in the near

While NEC's large size may give it advantages in good times, it also means that, in an economic slowdown, the impact is larger. "Being a giant, it needs very big customer bases" to use up its capacity, says Mr Mike Jeremy. analyst at Baring Securities in

It is not easy for a generalist company like NEC merely to withdraw from semiconductor products that do not bring high rewards and to focus on where the profits are. Mr Jeremy points out. If the Japanese economy fails to pick up, NEC may find that darker days are

Comptoirs Modernes up 9.6% against retail trend

By Alice Rawsthorn in Paris

COMPTOIRS Modernes, one of France's larger food retailing groups, last year bucked the frend in the French retail sector to increase net consolidated profits hy 9.6 per cent to FFr335m in 1992, from FFr306m

The group, which owns the Stoc supermarket chain and Commod food stores, saw sales rise by 6.8 per cent to FFr22.6bn in 1992, from FFr21.2bn in 1991, and operating profits increase hy 20.6 per cent to FFr623m, from FFr516m over the same period.

Mr Jean-Claude Plassart.

chairman, said he was confident about the group's prospects for 1993, despite the difficult economic environment. Comptoirs Modernes plans to continue its strategy of opening new stores and modernising old ontlets. It plans to invest in its distribution sys-

It is also developing the Merca Plus hypermarket chain in Spain, where it opened three new stores last year. The latest candidate in

French retailing for acquisition is Prisunic, a large chain of supermarkets owned by the Pinault-Printemps retail has indicated a net profit in 1992 of Rp60hn, down from

Mixed year for Indonesian pulp Rp81.7hn in 1991 and below

By William Keeling in Jakarta

INDONESIA'S pulp and paper companies had a mixed 1992. with two of the top three reporting sharply lower-thananticipated net profits as they finalised plans to raise new finance.

Although no figures have

officially been released, executives of Indah Klat, the largest integrated pulp and paper pro-ducer in south-east Asia, say the company made a net profit last year of Rp121hn (\$58.6m), down from Rp159.9hn in 1991. Tjiwi Kimia, the country's leading paper manufacturer.

NE NEC merels

and Karen Zagor in New York UK GOVERNMENT bond prices bounced back yesterday from Tuesday's losses as inves-tors reassessed the impact of the UK Budget, Longer-dated gilts, which had lost more than a point the day before, gained wer dependence in ecuse means in broself: from den in chaps to the same of the competitory. most, leading to a further flattening of the UK yield curve.

By Richard Waters and

Antonia Sharpe in London

GOVERNMENT BONDS

Helped by a firmer pound, the market sbrugged off the unexpectedly large public sector borrowing requirement of £50bn for next year, content that at least the full-funding rule had been relaxed in order to allow purchases of gilts by banks and huilding societies to count towards the PSBR.

In addition, the Budget did not fuel fears of rising UK inflation, which belped to keep a firm tone to the gilt market Longer-dated gilta gained most, with the yield on the 9 per cent stock due 2011 falling

for trading reform Currency, the Office of Thrift Supervision, the Federal Deposit Insurance Corporation.

By Laurie Morse in Chicago

MR JACK Sandner, head of the Chicago Mercantile Exchange, yesterday proposed that the maze of ageocies that oversee US securities trading be cahinet-level status.

"Regulatory reform is neces-sary if the US is going to stay competitive in the global market," Mr Sandner said. Financial regulation costs the US \$80bn a year, including the cost of insuring bank deposits. He claimed his plan could save \$300m a year in administrative costs alone.

Mr Sandner's proposal, outlined at the annual Futures Industry Association conference in Boca Raton, Florida, would create a new "super" department for financial services regulation.

The Commodity Futures Trading Commission oversees exchange-traded derivatives, the Securities and Exchange Commission governs equities and other securities, while bank regulators account for over-the-counter swaps and

significant proposal," said Mr Marc Lackritz, president of the Securities Industry Associatioo, the group that led the SEC attack on the CFTC a few

Mr Sandner proposed to consolidate seven Washington agencies into a cabinet-level department. The ageocies include the CFTC, the SEC, the

the Securities Investor Protection Corporation (which insures brokerage house investors) and the Pensioo Benefit Guaranty Corporation.

He suggested the department be governed by a nine-member hoard and operate in eight functional divisions. The divisions would address banking and insurance, risk management securities markets, and operational aspects such as customer protection, customer insurance, disclosure and reporting and prudential and

systemic risk management. The divisions would ahare legal, accounting and other administrative staffs and would have a separate administrative court to hear enforcement cases.

The plan will be presented to vice-president Al Gore, wbo heads the "National Performance Review" that has been charged with reducing duplication and waste in federal requ-

The Clinton administration has not yet made appointments to head either the CFTC or the SEC. The former CFTC chairwoman, Ms Wendy Gramm. stepped down in January, and SEC chairman Mr Ricbard Breeden plans to leave his post next month.

By April, both agencies, which usually have a four-persoo board plus a commissioner. will be down to just three board members, with one act-Office of the Comptroller of the ing as commissioner.

rise in the price of the bonds reflected a lack of supply of this sort of instrument which is geared to the Japanese equity market. The Nikkei average closed at the year's high of 18,173.37 yesterday, up 205.07 on the day.

BAT Capital Corp., the US financing arm of BAT Industries, raised \$400m through an issue of five-year Eurobonds which were priced at 99.57 to yield 75 basis points over the comparable US Treasury. Lead-manager CSFB said

bonds were freed to trade. issue to date in the Eurosterl-Mr Richard Desmond, BAT's ing sector. HSBC Holdings, which group treasurer, said that yesterday's transaction was part of the company's strategy of issuing looger-term debt and retiring commercial paper.

Mr Desmond added that the proceeds would be kept in dollars and that there was no Interest-rate swap associated with the bonds. Elsewhere, HSBC Holdings raised £200m worth of subordi-

nated Eurobonds due 2018.

which the lead manager, Sam-

announced its 1992 results earlier this week, weot ahead with its issue yesterday, encouraged

by strong investor demand for high-yielding, long-dated paper and the UK government bond market's recovery from its initial nervous reaction to Tuesday's Budget. The boods, which are callable in 2013, were priced at 98.692 to yield 150 basis points above the 9 per cent UK gilt due 2012. When the bonds were freed to trade,

the spread tightened slightly.

FT-A World Indices

THE Financial Times. Goldman, Sachs and NatWest Securities, and the Institute of Actuaries and Faculty of Actuaries, bave signed new commercial agreements regarding the FT-Actuaries World Indices.

A statement vesterday said: "By laying a firm contractual foundation for the long-term future of the Indices, the new arrangements demonstrate an increased commitment by all the parties to the further development of the FT-AWI as the most rigorous measure of international investment.

FT-AWI will contioue to be represented on the World Index Panel, but the panel will be enlarged and its independence from the commercial parties will be enhanced by the adoption of a formal constitutioo. The new relationship between the parties also means that NatWest Securities and Goldman, Sachs will take on the cotire responsibility for the licensing and distribution of data underlying the indices." The FT-AWI will continue to

be published in the Financial Times every business day.

Ex-Harland chief charged

By Angus Foster

THE DEPARTMENT of Trade and Industry has issued a summons against Mr Roy Ashman, former chairman of Harland Simon, the control systems company which went into

receivership last year. Mr Ashman is due to appear at Milton Keynes Magistrates Court on April 2 to face one charge of acting contrary to section 47(1)h of the Financial Services Act 1986.

The charge alleges that on February 10 last year Mr Ashman made a statement or forecast to Mr Nigel Stephen Savage, an employee of John Govett, which was "misleading, false or deceptive" and designed to induce him or any other person to enter into an

investment agreement.
it is understood that Mr Ashman met with Mr Savage on the day before Harland issued a profits warning. After the meeting, Govert bought 170,000 Hariand shares for more than

The DTI has also appointed inspectors under section 447 of the Companies Act to look into the collapse of Harland Simon.

The inspectors, from accountancy firm Robson Rhodes, are thought to be looking into a number of questions, first raised by the Financial Times, concerning the way Harland was run. Harland's relationship with its one-time subsidiary. Perfect Information

A team of accountants from Robson Rhodes has been interviewing individuals involved in the collapse, and has taken

says signs of pick-up

By Paul Taylor

Portals

PORTALS Group, the specialist paper and environmental protection and control products company, reported a per cent rise in 1992 operatng profits from continuing operations and said the pick-up in activity seen in the fourth quarter "has generally been sustained into 1993."

continuing

Pre-tax profits, after excep-tional items, were little changed at £25.5m from a restated £25.2m in 1991. The 1991 figure was originally reported as £27.6m, hat has been restated to comply with the recent FRS 3 reporting standard.

Exceptional items under FRS 3 amounted to a net £1.7m (£885,000) charge in 1992. The mainly item related to the group's loss-making Airoil-

Flaregas subsidiary which was sold in January. Fully diluted earnings per share slipped to 26.74p (28.04p). But an increased final dividend of 9.5p (8.8p) raised the total for the year to 14.5p

(13.8p). Despite tough trading conditions operating profits from continuing operations Increased to £28.5m (£26.3m). Mr Michael Morley, chief execntive, sald the results were somewhat better than expected hecaose of "distinct pick-up in the final quarter." The core security and specialist papermaking division hoosted operating profit to £20.1m (£19.3m) on sales of

£101m (£98.2m). The protection and control division increased operating profit hy almost 22 per cent to £8.43m (£6.83m) on flat turn-

The sale of the loss-making

the Atroil-Flaregas disposal.

The sale of Airoil-Plaregas means the protection and control division's new management can now focus on huildcontrast, growth in the papermaking division ts likely to come through acquisition sometime this year. The management has looked at three possibilities in the last 6 months and is sizing-up another two. The key requirements are that the target should be a speciality, high quality niche papermaker in a husiness where Portals can add value. With no deht a price tag of up to £50m would not strain the balance sheet unduly. Pre-tax profits this year could reach £30m, prodncing earnings of about 31.5p. The prospective p/e of 16.2

Surprise and relief follows failed bid

Michael Skapinker on reaction to Airtours' unsuccessful offer for Owners Abroad

Aing with upneavais canes to corporate collapse, the holiday husiness should have learned in shrug off surprises. Many in the industry have.

however, observed Airtours' proposed takeover of Owners Ahroad, which finally failed last Tuesday, with a mixture of wonder and dread. The wonder was that Mr Michael Heseltine. trade and industry secretary, last month casually shrugger aside the Office of Fair Trading's recommendation that the hid be referred to the Monopolies and Mergers Commission. Many were surprised, too, at the market's rejection of a bid that was widely expected to

The dread was that Airtours' success might lead to a price war with Thomson, the market leader, which could have ruined smaller companies. Many were apprehensive, too, that Thomson and the enlarged Airtours would have used their own travel agents, Lunn Poly

ing with upheavals exclude small operators and agencies from the market Some believe Airtours' fail-

ure means that life will return to what it was before. Mr Paul Brett, chairman of the Thomson Travel Group, the parent company of Thomson Tour Operations, Lunn Poly and Britannia Airways, said: "They tried something, they failed, it's back to square one." Mr Noel Josephides, chair-

man of the Association of Inde-pendent Tour Operators and an outspoken opponent of the takeover, said: "Hopefully, this will now mean stability for all Others argue that factors ranging from high unemployment to a devalued pound

medium-sized and smaller com-panies will find it difficult to The three leading companies have all made it clear that they will not be loosening their grip on the industry. Mr David

mean that the travel busines

has changed anyway and that

examining other options. He would not be drawn on what they were, but competitors believe they could include a rapid expansion of Pickfords or the purchase of a medium-sized tour operator. Either option would give Airtours greater control of the market and increase the pressure on

smaller competitors. Mr Roger Allard, Owners Ahroad managing director, accepted that his group was now under greater pressure than before. He said: "We'll take on board what the City and institutions have said to us. We have to deliver the right profits for our sharehold-

r Brett reaffirmed Thomsan's determination to continue to be the higgest tour operator, travel agent and charter airline operator. He said Lunn Poly opened 68 new outlets last

Few expect the market to grow significantly this year, spite widespread discounting and television advertising earlier in the year.

Mr Richard Bowden Doyle, Lunn Poly's marketing director, said sales of summer 1993 holidays rose 10 per cent in January compared with last year, but then fell 5 per cent in February. "On the most optimistic view, the summer market is flat," he said. Although lower interest

rates usually result in a rise in bookings, Mr Chris Parker, chairman of Unijet Travel, a medium-sized tour operator. said customers were postponing their holiday decisions because of fear of nnemploy. ment. Late booking, a growing trend even before the rise in unemployment, is particularly damaging to small companies with less cash to cushion them.

The drop in the value of the pound has also been easier for the large companies to hear

FTER YEARS of deal- and Pickfords Travel, to Crossland, Airtours' chairman, and would add another 100 this because they huy all of their something many smaller companies cannot do.

> r Tim Cocking, presi dent of the National Association of Independent Travel Agents, says that while he heaved a sigh of relief at Airtours' failure, the towards vertical integration in the travel husiness. The Thomas Cook travel agency chain's decisive backing of Owners Ahroad has convinced the industry of the gennine nature of the two companies previously announced inten-

tion to establish closer links. Although there are still 5,000 independent travel agents, the large chains are able to com-mand a market share out of all proportion to the number of outlets they control. Although Lunn Poly accounts for only 7 per cent of the total number of UK retail outlets, it has a 22 per cent share of the market for summer package holidays.

A change of heart on the way to the party '

Gartmore's controversial decision was crucial to the bid. Richard Gourlay reports

VER 30 years, Mr David Cross-land, chairman of Airtours, has probably forgotten more about the holiday business than many travel executives would ever hope

But the City was new ground and in three hruising months pursuing rival Owners Ahroad in a fiercely contested takeover battle, he had a crash course on how it works. It has been an altogether less rewarding experience and

One he will not forget.

Not only was the £290m hid notable for the close finish; when Airtours lapsed its offer on Tuesday, it had the support of investors representing 43 per cent of Owners' shareholders and was only one institutional investor away

from victory. Airtours also found itself in a rare three-cornered contest with Thomas Cook, the German-controlled travel agency which was proposing a commercial tie-up with Owners Abroad. When Thomas Cook last week offered to tender for 12.5 per cent of the Owners shares if the bid failed, Airtours faced a competing proposal that was not a com-peting hid.

in the end, Airtours returned empty handed to its Lancashire base hecause of one controversial institutional decision and hecause Thomas Cook became a substantial huyer in the mar-

The crucial decision was that of Gartmore, a 7.8 per cent shareholder in Owners Ahroad which eventually sold a third of its stake to Thomas Cook and then refused to assent the rest.

By the end of last week, with the largest shareholder, Mercury Asset Management, sopporting Airtours and the second largest, Philips & Drew Fund Management, supporting Owners Ahroad, this decision proved crucial and a significant blow

David Crossland: takeover battle an experience he will not forget

in Airtours. What was surprising to all sides was that when Thomas Cook first announced its decision to tie-up with Owners Abroad, Cartmore was vehemently opposed.

The institution did not like the fact

that Owners would issue new shares to Thomas Cook or that it would, in turn, be investing in low yielding fixed rate Thomas Cook paper.

The institution was thought to be lukewarm about the henefits of the transaction and wary about the proba-

Nor was Gartmore believed to be a great fan of the entire Owners Ahroad board, following the share price performance and various share period of such rapid organic growth.

Howard Klein: Owners has a tough task to live up to expectations

sales - totally legitimate though they were - hy Mr Howard Klein, the Owners chairman.

Such was the disenchantment that a Cartmore fund manager left Airtours with a strong impression that if it should bid for Owners Ahroad, Gart-

more would lend its support. Something clearly changed on the way to the party. Late in the day, Gartmore is believed to have been impressed by Owners' presentations of the benefits that the Thomas Cook deal would bring. And in common with a number of other Institutions, there were doubts whether Airtours could handle nearly doubling its share of holiday market through acquisition after a

The outcome is a salutary reminder to potential hidders who think they have institutional support hut have not received irravocable

Ultimately the institutions dance to their own tune, acting in the interests of their clients. Support at one price and in one set of circumstances is no guarantee of support throughout.

The other issue was Thomas Cook's purchase of Owners shares early this week, the final blow that toppled Airtours' hid. When Thomas Cook bought its 8.9 per cent stake in Owners Ahroad. it attempted to buy from shareholders who were expected to accept the Air-tours offer. Such directed purchases are totally within Takeover Panel guide-lines which say anyone can huy shares from anyone at any time.

So where does the outcome leave the protagonists? Owners Abroad has set itself a tough task to live up to the expectations it created throughout the hid. And having made a serious invest-ment, Thomas Cook now has an even greater incentive to make the commercial tie-up work.

Iso it would be surprising if Owners Ahroad does not appoint new non-executive directors in addition to Mr Christopher Rodrigues, chief executive of Thomas Cook · to look after the interests of minority shareholders.

And Airtours? It is likely it will sell Its stake in Owners - the stake is a relatively low yielding asset in an industry that has high returns on capital. This could mean more losses to add to the £8m, or so, cost of the hid.

Mr Crossland could well see his next

challenge as trying to prove to the City that they had backed the wrong borse. Owners Ahroad might expect a rather focused attack on its market share.

Dutch problems cut Expamet Intl by 40%

By Catherine Milton,

EXPAMET International, the building products and security group, yesterday announced pre-tax profits down almost 40 per cent from £7.3m to £4.4m for the year ended December

The group has been hit hy problems at what was its Dutch duct making subsidiary. Last June a profit warning followed the discovery of inflated profit figures at Brema-Air.

The group took an extraordinary charge of £23.5m (£1.3m) consisting of losses on disposal or closure of husinesses and the elimination of £17.7m relatad purchased

More than £10m related to

the disposal of the Dutch ducting husiness and APT Con-

The balance relates to three further anticipated disposals. Borrowings at the year end were £16.4m (£9.8m). Again, the increase was caused mainly hy the Dutch losses hut were also boosted about 13m by currency fluctuations.

Borrowings in the middle of 1992 were £22.9m. Net assets at the year and

were £15.4m (£21.6m). The tax charge dropped to £1.2m, compared with £2m. The figure includes an overseas element of £202,000 (£884,000). The final dividend is 1.16p giving a total of 3.25p (10.38p) payable from earnings per share down from 9.06p to 5.08p.

Plantsbrook improves to £9m after halved interest charges

PLANTSBROOK Group, the funeral services provider, raised pre-tax profits by 38 per cent from £6.55m to £9.05m in the year to December 31.

Gearing fell from 75 per cent at the half year to 54 per cent, mainly hecause of a £10.5m rights issue and a private placing of more than £2m in December. Borrowings were £11.1m (£29m) giving halved interest payments of £1.9m

A maintained final dividend of 2p gives a same-again total of 3p, payable from basic earnings of 6.78p (5.51p). Plants-

hrook disposed of a memorial maker and six memorial retailers. It closed 52 small hranches and reduced staff by 17 per cent. The group is looking for

suitable acquisitions. Group turnover declined to £49.8m (£53.5m), operating profits rose to £11m (£10.2m) and margins rose to 22 per cent (19

The previously loss-making Dignity pre-paid funerals division hroke even. The group's corpse rescue and repatriation huainess, Kenyon Emergency Services and Kenyon Air Transportation, contributed £1.5m to turnover and £500,000

included two air crashes in Katmandu and a helicopter crash in Scotland Mr Peter Hindley, Plantshrook's chief executive, said:

Two years ago gearing was 400 per cent and market share was declining. We have reduced gearing and our market share is stable at about 9 per cent). per cent."

Mr Geoff Douglas, analyst at Barciays de Zoete Wedd, said: "Mortality rates for 1993 are so far down 6 per cent hut hopefully the abortfall will be clawed back." He expects profits to reach £10m next time mainly from reduced interest to pre-tax profits. Its work

McDonnell Douglas Information shows 23% advance to £19.4m

McDDNNELL Douglas Information Systems, the UKownad computing services company formed earlier this year through a huy-out from the US aerospace group, lifted operating profits 23 per cent in the year to December 31 despite a 9 per cent fall in share in a tough year and

Dperating profits were £19.4m compared with £15.8m. Turnover fell from £175.2m to £159.7m. Net assets, however,

rose by 31 per cent to £77.9m compared with £59.4m. Mr Jeremy Causlay, chief executive, said the outcome resulted from retaining market Software and services now accounted for 58 per cent of revenues and the company intended to invest further in the development of application software in 1993.

Overseas accounted for almost 30 per cent of revenues, he

Utd Newspapers settles dispute

By Catherina Milton and Angus Foster

UNITED Newspapers, publisher of the Express and Star national newspapers, said it had settled its legal dispute over distribution with Northern and Shell, publisher of Penthouse and Forum maga-

The row was over the termination of magazine distribution agreements. Under the agreement, Northern and Shell will pay £17m it owes to United.

In return, United will pay £17m for 10 magazine titles serving the cycling and music The magazines have net

assets of £96,000 and are expected to make a gross contribution of £1.7m in the next 12 months The two sides have also

agreed to drop their competing litigation actions over distribu-

United said its annual results to be published later this month would ahow an exceptional provision of up to £12m to reflect the costs of dissolving the "uneconomic" distribution agreements and a "more conservative" valuation of the magazines acquired. The provision will, however

be offset hy an exceptional gain of about £23m following a controversial decision to dispose of some shares in Reuters

BOWTHORPE, the inter-national electronic and electrical components group, increased pre-tax profits hy 5.8 per cent last year, helped by acquisitions and strong operating profits from its UK and USbased operations.

The group lifted pre-tax profits from £40.3m to £42.7m over 1992 on turnover ahead 20 per cent to £265.4m (£220.5m). Mr Colin McCarthy, finance director, said that about 9 percentage points of the turnover advance came from acquisitions, ebout the same proportion wes attributable to organic growth and 2 percent-

ege points reflected foreign exchange translation gains. Overall, he said, translation gains resulting from sterling's devaluatinn added ahout £900,000 to trading profits and would add about £5m in 1993 if

currencies remain at current

Operating profits rose to £42.3m (£38.5m) while interest receipts fell to £381,000 (£1.8m). Operating profits jumped 36 per cent in the UK, were up 22 per cent in the US hut fell 4 per cent in continental Europe mainly due to the German

Earnings per share increased to 15.36p (14.04p); a final divi-dend of 4.57p brings the total to 6.36p (6.04p).

Commenting on the results. Mr Anthnny Vice, chairman, said performance improved in the UK as a result of acquisitions and internal reorganisation, while in the US, higher profits reflected the beginnings of economic recovery.

However, he noted that in Germany the growing impact of recession led to a slowing

down of sales growth and

lower margins in the second

BB&EA in the black at £1.4m

By Gary Evans

BRITISH Building and Engineering Appliances, the enlarged hullding related equipment and services group, returned to the black and to the dividend list in the six months to December 31.

With turnover np from £1.68m to £21m, reflecting the acquisitions that took place after new management took over in June 1992, the group turned in pre-tax profits of £1.41m for the period compared with £397,000 losses last

Mr Graham Brealey, chairman, announced that in difficult trading conditions the group achieved all its targets in the period - accordingly, it is paying an interim dividend

of 2.5p (nil). Earnings per share were

8.4p (22p losses). Mr Brealey said that enquiry levels for the second quarter showed a considerable upturn and if the rate of conversion to orders remained at present levels, then the second six months should see an upturn in the level of work achiev-

Interim results were after a bad debt write-off of £234,000 which arose from one of the group's enstomers being forced into receivership.

Net assets at end-December were £26m with cash balances of £500,000. Total borrowings were £2.9m - including finance leases - giving gearing of 11 per cent.

Support for Control refinancing

SHAREHOLDERS in Control Securities. the property and leisure group in refinance ing talks with its banks, creditors and bondholders, yesterday gave the hoard unanimous support to continue negotia-

At a special meeting called to consider what steps to take to rectify a fall in net assets, Mr Sydney Robin, chairman, told shareholders that if they did not support the board the company's creditors and lenders were unlikely to continue to do so.

Asked what the group's chances of survival were, Mr Robin said thet a few weeks ago he had thought them to be 80:40 egainst hut now felt they had swung to 60:40 in favour. Mr John Kerslake, finance director, said "it is evenly balanced but we

remain cautiously optimistic".

Mr Robin told shareholders that the group was looking carefully at its public house estate and planned to sell those which were "not relevant to the company's future". The Belhaven Brewery could also be sold if an offer in the best interests of shareholders was received. Mr Kerslake

said that sale memoranda were being prepared on a number of the assets.

The timetable for completion of the refinancing was still unclear. However, Mr Rohin said that the property valuation carried out as at December 31 1992 had been prepared for the purposes of producing listing particulars for a relisting of the shares, which have been suspended since

This valuation would only be good for that purpose until June 30, so the company aimed to complete the restructuring before then.

Abbey National chairman's pay up 33%

By John Gapper, **Banking Correspondent**

THE salary and benefits of the chairman of Ahbey National

rose 33 per cent last year, it was disclosed yesterday. The annual accounts said that Sir Christopher Tugendhat received £211,575 last year after being paid £95,156 in 1991.

Abbey this month announced a 9 per cent fall in pre-tax profits to £564m for 1992 after doubling bad debt provisions.

Sir Christopher was paid only part of the 1991 total of £159,525 after becoming chairman in July that year. Mr Peter Birch, chief executive, received £257,568 in pay and benefits, but no performance bonus. In 1991, he was paid £216,756 in salary and benetits, and a further £45,150 in performance bonuses.

Abbey paid £266,000 compensation to Mr Richard Baglin, former managing director for new husiness, who retired early in August. It paid £1.5bn in directors' fees, salaries and

year, increasing from £30.7m to £34.6m. Sales of Gerber computerised signmaking systems declined bowever, from £16.6m to £15m.

Gestetner gives profit warning

The cost of reducing its work-force and difficulty in letting surplus property would have a.. negativa effect on short-term profits at Gestetner Holdings, Mr Basil Sellers, chairman told

the annual meeting.
He added that in the first quarter of the current year there had been increased pres-sure on machine sales in Europe, which accounted for 55 per cent of the total.

Trading had been particularly disappointing in France, Italy and Spain.

Textiles behind fall at British Mohair

A setback in its textile activities was behind a 20 per cent annuel profits contraction at British Mohair Holdings.

On turnover ahead from £36.5m to £39.2m, pre-tax profits in 1992 amounted to £2.1m,

Mr Charles Fenton, chairman, said that both British Mohair Spinners and Geo Ackroyd had suffered from reduced activity. Any improvement in profit was unlikely until trading levels increased.

in contrast, profits in specialist engineering showed an increase over 1991. The final dividend is held at 7.1p, maintaining the total et 8.5p, covered 1.3 times by earnings of 10.8p (13.71p) per

S Daniels improves in second half

Improved trading in the second six months at S Daniels, an importer and distributor for the food industry, resulted in a reduced pre-tax loss of £64,000 for 1992, compared with £105,000 in the first six months and £158,000 in 1991.

The results have been pre-pared under the FRS 3 accounting principles.
Turnover of continuing

operations increased from £29.8m to £32.3m. The loss was struck after a £101,000 deficit on disposal of discontinued operations, less a

1991 provision of £110,000. The dividend is held at 0.25p. Losses per share were halved to lp.

Avonside declines to £4.56m

Avonside Group, the building services and housebuilding group which operates in Scotland, northern England and Wales yesterday reported a pre-tax outcome of £4.56m in 1992 on almost static sales of

£51.5m. In its first full set of results since flotation last March the group saw a 42 per cent decline from £7.88m but paid a final dividend of 2.2p for a total of 4p. Earnings per share fell to 7.08p (12.4p).

Mr Christopher Glynn, chairman, said base rate fluctua-

By Deborah Hargraaves

PREMIER Consolidated Oilfields lifted pre-tax profits for the 12 months to December 31 to \$16.8m.

The outcome fell at the top end of analysts' expectations and the share price firmed lp to 30 % p. The result compared with

59.64m for the previous nine months period. The company's oil producion reached a peak of 13,888 barrels a day as increased out-

put at the Wytch Farm onshore oilfield and the Angus field in the North Sea came on Turnover amounted to £56m. including £53.2m from the UK;

the comparative figure was £32m, of which £29.9m was In

Earnings per share were 2.9p egainst 1.72p. There is again no dividend but a 1-for-20 scrip issue is proposed

"Our cash flow is quite rohust," said Mr Charles Jamieson, chief executive, but he added that the company had decided not to pay a cash dividend for two reasons: the penalty it could incur on advance corporation tax, which it doesn't pay, and the need to fuod future

exploration. He pointed to three developments that will add 45m barrels of oil equivalent (which includes gas) to the company's reserves over the next three years: the development of offshore drilliog at Wytch Farm, the Fife oilfield in the North Sea and the Qadirpur field in Pakistan.

Hi-Tec shares near low point after resignations

SHARES IN Hi-Tec Sports, the sports and leisure wear com-pany, yesterday headed heck towards their all time low touched in January - as the market reflected on Tuesday's resignation of the company's two newly appointed non-exec-

Sir Michael Edwardes, former chairman of British Leyland, and Mr Richard Fenhalls, chief executive of Henry Ansbacher, joined the Hi-Tec board in January and their sudden departure was largely overlooked hy the stock merket, which was concentrating oo the Budget.

Yesterday the shares fell 5p to 40p, after touching 35p, just 5p above their all time low of 30p. Analysts said the departure of the two non-executives had raised worries about how Hi-Tec was managed and Its trading outlook.

"When non-executives of this

calibre resign simultaneously,

one obviously draws a negative

conclusion." one analyst said.

Hi-Tec's position was not

helped by the refusal of both sides to comment on the resig-

Sir Michael and Mr Fenhalls were appointed by Hi-Tec chairman end 54 per cent shareholder Mr Frank van Wezel. Mr van Wezel last year came under pressure from institutional shareholders who feared he had too much control

over the company. But his choice of such high profile non-executives looks strange, as does their agreement to work under a man with a reputation for getting his own way, "Both sides could be accused of naivety," one observer said. "It seems they were unable to work together from the start and had different opinions of each others'

roles," another said. Hi-Tec's advisers stressed the company's trading situation had not declined in recent months. The company's broker Hoare Covett expects a pre-tax loss of £3m for the year just ended, but said the US market has started to improve aod 1994 is forecast to see Hi-Tec return to a profit of about £4m.

Anglo American Industrial Corporation Limited

Incorporated in the Republic of South Africa - Company Registration No. 63/05282/06

("Amic")

Terms of Offer of capitalisation shares in lieu of the final dividend on 50 per cent of shares held, and basis on which

shareholders may tender to receive additional capitalisation shares Further to the dividend announcement published on 5 March 1993, the directors of Amic have determined both the terms of the offer to shareholders to elect to receive new capitalisation shares of

R1.00 each in Amic and also the basis on which shareholders may tender to receive additional

capitalisation shares, in lieu of the final dividend. 1. Terms of Offer Shareholders registered in the books of Arnic at the close of business on Friday, 19 March 1993 ("the record date") may, in respect of up to but not more than 50 per cent of their shareholding, elect to receive fully petid capitalisation shares at an issue price of 6,000 cents each in lieu of the final dividend of 240 cents per strare which would otherwise be payable thereon. The number of capitalisation shares to which shareholders will become entitled, if they so elect, will be calculated on the following basis:

Capitalisation share = dividend per ordinary share x number of ordinary shares held at the record date x 0.5 ramitalisation share the share is the share in the share is the share is the share is the share is the share in the share is the share is the share is the share is the share in the share is the share is the share is the share is the share in the share is the share is the share is the share is the share in the share is the share is the share is the share is the share in the share is the s Thus in respect of every 100 shares held by them at the record date, shareholders will be entitled to elect to receive 2 carditalisation shares and will be entitled to tender for additional capitalisation shares or to a dividend of 240 cents per share on 50 shares.

2. Invitation to tender Shareholders who wish to receive additional capitalisation shares to those which they may elect to receive may tender for additional capitalisation shares issued at a price of 6,000 cents each, in lieu of the dividend of 240 cents per share on the remaining shareholding as defined below.

The maximum number of additional capitalisation shares for which shareholders may tender will be calculated on the following basis:

Meximum tender = dividend per ordinary share x remaining shareholding (Note) capitalisation share issue price

Note: remaining shareholding = number of ordinary shares held at the record date, less number of shares in respect of which the election is exercised and which results in the Issue of capitalisation shares. Arnic reserves the right to accept such tenders in whole or in part and will only accept such tenders to the extent that certain shareholders may not have exercised their rights of election to receive

3. Fractions

No fraction of a share will be allotted. In those instances where entitlements to capitalisation shares would have resulted in fractions of shares being issued, the Amic ordinary shares giving rise to these fractions will rank for the dividend of 240 cents per share, which will be payable in cash.

Subject to the approval of The Johannesburg Stock Exchange, a listing for the capitalisation shares to be issued pursuant to the elections and/or tenders will commence on Friday, 30 April 1993. Application will also be made to The London Stock Exchange for a listing of the capitalisation shares.

Documentation dealing with the election and tender will be posted to shareholders on Friday, 26 March 1993, in order to be valid, completed election and tender forms will need to be received by

the company's transfer secretaries by no later than 12:00 on Friday, 16 April 1993. The capitalisation shares to be issued will not be registered with the Securities and Exchange Commission, Washington D.C., or with the Canadian Provincial Securities Commissions and, accordingly, the share election offer and the invitation to tender are not made to, and are not open for acceptance by, shareholders with registered addresses in the United States of America, or any of its

territories, and Canada. 6. Posting of dividend cheques and share certificates

It is expected that dividend cheques and share certificates will be posted to shareholders on or about Thursday, 29 April 1993.

A further announcement will be made on or about Wednesday, 21 April 1993 reporting on the result of the elections and tenders and confirming the posting date of dividend cheques and share certificates. Johannesburg

GGG

and David Gardner In

FRANCE WILL today ask the European Commission's fisheries council meeting in Brussels for a 30 per cent increase in the minimum prices imposed on fisb imports and for the suspension of imports of Russian cod.

Mr Charles Josselin, the French secretary of state for fish, announced these proposals at yesterday morning's cabinet meeting in Paris. He said be also planned to press the fisheries council to extend the minimum pricing system to

cover more types of fish.
However, Mr David Curry, UK fisberies minister, said that what was needed was to ensure that the current minimum import price regime was enforced properly.

Meanwhile French fishermen, who have for the past few

in imports, stepped up the pressure on the government on the eve of the Brussels meeting with a series of violent protests throughout France.

More than 10,000 fishermen and their families marched in silence through the streets of Quimper in Brittany carrying banners emblazoned with the slogans "Do something. We're dying" and "Fish in Distress". The march ended with a rowdy demonstration outside police headquarters when fishermen pelted the huilding with missiles and rotting fish.

Riot police fired tear gas pellets at more than 800 militant fishermen in Nantes following a violent scuffle, in which protesters hombarded the police with stones, bottles and other makeshift missiles. Seven policemen were injured in the

There were also clashes in southern France. Riot police

demonstrating in the old port of Marseilles. A policemen was seriously injured in a clash with fishermen at Bayonne when he was hit on the head by a missile.

Protest marches in Nimes and Montpellier ended with fishermen unleashing cargoes of fish outside the town halls. In Bourdeaux fishermen handed out free fish to passers-by during a peaceful dem-

Tha import problem is imposing intense financial pressure on the French fishing Industry. Crédit Maritime Mutuel, the bank specialising in the fish trade, yeoterdsy called on the government to take action to alleviate the financial problems now hitting

many businesses. Mr Curry, who met fishermen from Humberside in Brussels yesterday, said Russian coming into the Community via Denmark and Germany. He ruled out the possibility of a total ban on Russian fish. We've got to be realistic," he said. "There's not going to be a majority in the Council to impose s flat import ban."

Instead he proposed: • Effective policing of the minimum import prices set last month by the European Commission:

Enforcement of hygiene

 A re-examination of the tariffs and quotas agreed with the contries like Norway and Iceland, members of the European Free Trade Association;

 And a unilateral UK ban on British fishermen landing haddock and ungutted white fish, to discourage the current glut of small fish that is pulling down market prices.

Last October the UK set min-

imum landing sizes for whiting above EC sizes, and is shortly expected to do the same with

CAP-Gatt compatibility 'totally illusory'

By Devid Gardner in Brussels

EUROPEAN THE Commission's claims that the European Community-US of the Uruguay Round world trade liberalisation negotiations is compatible with last May's reform of the common agricultural policy are "totally illusory", France claimed yes-

The new French attack on tbe accord, reached last November in Washington, came as EC farm ministers examined the report prepared hy senior officials of the 12, aimed at measuring its "com-patibility" with the new CAP which all member states have agreed needs to he established before it can go ahead.

overwhelming defeat in Sun-

day's parliamentary elections. Mr Jean Plerre Soisson, French agriculture minister, said the commission's claims that the reformed CAP fits into the undertakings Brussels has negotiated with the US under the Uruguay Round was based on "chancy techniques, optimistic interpretations, and

arguable assertions". "I don't believe in miracles," Mr Soisson said. The current French government has threatened to veto

the Washington agreement, even though it is not clear whether it can do so under EC law - unless it gets sufficient support from other member states. Leading members of the centre-right opposition, who look poised for a landslide in the elections, have spoken It also comes as France's while on the stump of renego-socialist government faces tiating both the Washington agreement and CAP reform,

and even of hoycotting the EC if the accord goes through. Mr John Gummer, UK agriculture minister, sald last

night that the "compatibility" discussion was none the less "very muted". "It was left in a very general haze. . . as is suitable for the next two weeks." By then the French elections will be over, and on April 5 EC foreign ministers are expected to endorse the oilseeds part of the Washington agreement. This is separate from the Uruguay Round proper. But Mr Rene Steichen, EC agriculture commissioner. believes a US on the trade offensive against the EC might seek further concessions from the European agriculture

Mr Ray MacSharry, the agriculture commissioner who negotiated ths Washington accord, secured a deal allowing

unless it is quickly "banked".

the EC to plant the same area of oilseeds as envisaged under CAP reform, an outcome better than the "bottom line" France drew at the time.

France's main disagreement is on the commission's projections for cereals, and in particular permitted levels of subsidised grains exports under the Uruguay Round arrangements. It claims increases in productivity will push EC output over the allowed limits hy 1999.

But as one senior UK official put it, "the instruments are there under the reformed CAP to allow for further adjustments. It's a little hit bogus to sit down now and discuss cereals yields in 1999."

Mr Gummer summarised that "everybody accepted that if you accepted the [commission's assumptions, then it was compatible; if you didn't,

LME pre-market trading prosposal raises storm

By Kenneth Gooding, Mining Correspondent

A STORM of protest has been raised by the London Metal Exchange Board's decision to bave a pre-market trading session on the market floor to mop up the early morning business at present conducted via telephone links between traders' offices.

One prominent LME trader, who asked not to be identified, described the suggested move as "a pointless exercise, I don't think there is any LME ringdealing member who sees any sense in it at all". He said it was "astounding" that the Board could have reached such a decision without first fully ing before the end of this year. returns.

consulting all members.

Mr Hans Murmann, managing director of Metallgesellschaft's London metals trading subsidiary, said his company had previously studied the concept and "we are not at all sure it is a good idea".

He said it would take the LME closer to becoming a floor market or a computerised market, both unsuitable ways for the exchange to operate. It exchange for most of the day so that they would miss the essential rapport with colleagues responsible for customer liaison.

The LME Board said it hoped non-ring dealing members, but to have the new system operation of getting commensurate

It would bring more business to the exchange and would better serve Far Eastern and Aus-

Mr Murmann said it would be better for the LME to keep to two trading sessions a day hut to have the first earlier in the morning make life easier for Far Eastern clients.

The Board acted after seeing a study by an LME external director into the membership might also keep traders at the structure. This study followed complaints by ring-dealing members that they were carrying a greater share of the hurden of running the exchange and facing more risks than

Mr Raj Bagri, the LME's chairman, said yesterday that moving pre-market trading to the floor of the exchange would switch business hack from non-ring to ring traders. Also, "It will bring more transparency and openness, which will be to the benefit of users of the exchange".

He pointed out that more than half the LME ring-dealing organisations were represented on the Board which had reached a unanimous decision

to make the change. Mr Bagri said LME members would be consulted about the details of the change, "It is the very strong wish of the Board to implement this proposal,"

Guttman

By Laurie Morse in Chicago

Mr Z. Lon Gnttman, chairman of the New York Mercantile Exchange since 1988, lost his bid for re-election on Tuesday to Mr Daniel Rappaport, a 39year-old independent floor trader who is also an attorney. The defeat came after a stormy year in which Mr Gnttman was accused by the Commodity Futures Trading Commission of violating trading rules.

Known for his brash style and his ability to get things done, Mr Gnttman helped build the Nymex into one of the most successful futures markets in the world. The exchange had pre-tax earnings of \$27m last year, and about \$100m cash in reserve.

Unlike some of its New York neighbours Nymex's volume is booming and seat prices have doubled during Mr Guttman'o term in office. The exchange has the largest crude oil market in the world and has successfully diversified Its energy lineo into natural gas and other products. Despite the successes Mr

Guttman's legal problems were feared to reflect unfavourably on the exchange and its customers. The CFTC deliv-ered its civil charges against Mr. Guttman less than a month ago, after warning him in July that a case was pending. The Nymex Board immediately asked Mr Guttman to step down, but, true to his style, be refused, saying he would defend himself against the charges, and that the membership should have the right

to choose its leadership. Some Nymex memhars thought Mr Guttman's efforts to keep New York's futures exchanges in hasiness after the Fehruary 26 bomb blast at the World Trade Center would help his re-election effort. He is credited with convincing police and fire officials that the markets should open, despite impaired ventilation and fire protection systems at the WTC trading facility.

Mr Rappaport defeated Mr Gnttman hy 386 votes to 213. The new chairman strongly supports the Nymex's move to a new trading facility in mid-1994 and he sees potential in the exchange's Access electronic trading system, which is to be introduced this year.

Mr Rappaport also would like to see more co-operation between New York exchanges. His election could pave the way for another Nymex hid for the ailing New York Commod-ity Exchange. The Comex is currently entertaining takeover offers from the Chicago Board of Trade and a smaller New York market, the Coffee, Sngar and Cocoa Exchange.

Nymex vote goes against Guttman PNG gold mine dispute settled

By Kevin Brown in Sydney

A DISPUTE over shareholdings in the Porgers gold mine in Papua New Guinea ended yesterday when the government sgreed to pay Kina 138.75m (£98m) to increase its stake from 10 per cent to 25 per cent. The deal will reduce the equity of the three Australian-

controlled joint venture part-ners - Placer Pacific, Renison Goldfields and Highlands Gold, a subsidiary of MIM Holdings - from 30 per cent each to 25 per cent each. However, the government dropped claims that it had

been misled by the joint ven-turers about the potential profitability of Porgera, the higgest gold mine outside Sonth

Mr Masket Iangalio, mining minister, said the government accepted that the joint venture partners did not withhold technical information before the granting of mining approval in 1989. He said the government's decision to seek further equity was taken to meet national priorities and ensure the long-term stability of the project. "No-one could argue that this is not e good deal for PNG, he said."

The government will pay for the additional 15 per cent stake from its share of profits from the mine, probably over about 15 years.

The transaction will be free of tax, and the joint venture partners will be allowed depreciation henefits until the shares are fully paid for. The government will pay interest on the outstanding halance at 5 per cent a year.

It has also agreed to resolve separate disputes about town site development, access to the mine and security from attacks by local landowners.

The joint venture companies said they had agreed to pay for 75 per cent of a K50m spending package over 10 years to improve infrastructure in Enga province, the isolated region which surrounds the mine.

Joint venture officials said that the deal was "pretty good, under the circumstances". The sale price of tha shares is believed to be close to book value after including the beneficial taxation effects.

Porgera, which began production in 1990, is expected to produce 1.4m troy ounces of gold this year, and at least 900,000 ounces a year in the

Debts force closure of Dominican unit

By Canute James In Kingston,

ROSARIO DOMINICANA, the Dominican Republic's stateowned gold miner, has been forced to close hecause of increasing debts and mounting production costs. The company says its operations, centred on the Pueblo Viejo mine near the city of Cotui, have been adversely affected by falling prices for gold since 1985, and by steadily falling production.

The closure has angered the company's workers and their unions, and paramilitary units have been posted at the mines as sacked employees plan pro-

tests against the closure. Rosario Dominicana says its best years were between 1980 and 1985. In 1980 it produced 370.94 troy ounces of gold and sold it at \$612 an ounce. In that year it also produced 1.6m ounces of silver, which was

sold at \$19.59 an ounce. its gold production rose to 412 99 ounces in 1981, but that the price had fallen to \$460 an ounce. A significant decline in the company's fortunes began duction of only 246.39 ounces year the average price it tors could be met.

High/Low AM Official Kerb class Open Interest

received for gold was down to \$343 an ounce and on March 10 this year it averaged \$326.3 an

The company says the fall in prices coincided with an accumulation of debts that could not be serviced. The deht to foreign and local banks is \$52.8m, while it owes the equivalent of \$2.88m in production incentive payments and bonuses to its workers for 1991 and 1992, and \$36m to its foreign and local contractors.

Operations have also heen affected by increasing production costs. In the past two years it cost the company an average of \$535 to produce an ounce of gold, with the average selling price being \$352.

In closing its mines at Puehlo Vlejo, the company is suspending 70 per cent of its workforce and reducing the wages of those being kept on for routine maintenance. Senior government officials

said yesterday that they were uncertain about the duration of the closure of the company's mining operations. They said the first priority would he after 1985 and in 1987 gold pro- studying the company's financial situation to determine how fetched \$384 per ounce. Last Its ohligations to all its credi-

Placer 'to pull out of Chile deal'

By Kanneth Gooding, Mining Correspondent

PLACER DOME, Cnnada's higgest gold producer, will almost certainly withdraw from the Leonor copper project in Chile, according to Mr Peter McAleer, chief executive of Equatorial Gold, the small Australian company that owns the project.

Placer has until April 2 to decide whether to take up an option to earn 70 per cent of Leonor by spending US\$80m to hring the project into production. Leonor, which is midway between Chuquicamata. the biggest copper mine in the world, and Escondida, the third largest, is scheduled to produce about 30,000 tonnes of copper in cathodes annually

Mr McAleer says he is "very unbappy" with the lack of progress Placer has made in assessing the project. "Placer has not done the ground work necessary to make a decision in April. In any case, I do not believe Placer will want to focus on what for them is a relatively small operation."

Since taking up its option on Leonor, Mr McAleer points out, Placer has acquired a 50 per cent interest in the nearby Zaldivar copper project for \$100m and has committed itself to finding another \$400m of project finance to bring a mine into production, Zaldivar, in which Placer's partner is Outokumpu of Finland, is forecast to produce more than 100,000 tonnes of copper a year at about 50 cents a lh for at least 20 years.

Vaulin

hr dru

A Placer official vesterday denied that his company had not done enough work to assess Leonor. However, he said that, while he could not anticipate Placer's final decision, the future of Leonor depended on it being developed with an adjoining property. "Leonor on its own is not so attractive."

Mr McAleer says talks have heen held in the past with Antofagasta, the mining, rail-ways and water group, which owns the neighbouring Sorpresa copper deposit. Both parties agreed that it made sense to combine Leonor and Sorpresa into an operation that would produce 50,000 tonnes of copper a year for 13 years. However, Antofagasta has withdrawn from negotiations and no longer seems interested in the proposition.

for another year, which would probably be necessary if Equatorial sought another hig partner, his company will raise equity and deht finance for the project in Chile and possibly from potential Japanese customers.

The project for say

Tomitted liself

MR LAMONT'S Budget proved no favourite of the UK stock market yesterday and, although selling pressure was not heavy, share prices gave ground steadily. Uncertainty over the implications of some corporate tax changes was reflected in "the guletest post-Budget trading session recorded", said a senior trader at one of the largest integrated

The chief objections were the chancellor's apparent coolness towards hopes for another base rate cut and his changes to ACT (Advance Corporation Tax), and to foreign income dividends by UK companies. NatWest Securities warned that the new levels of ACT implied a drop on the gross yield on the equity market on

April 6. The stock market was saved from the worst by a steadier performance hy government honds and hy stock index futures. But the FT-SE 100 Index closed 29.4 down at 2,889.9. Although generally negative on the Budget, most London securities houses kept year-end Footsie forecasts unchanged - at 2,850 at Strauss Turnbull and 3,000 at Nikko: Hoare Govett trimmed lts 1993 forecast to 3,150

While there were sharp falls

panies, which could be affected by the foreign income dividend proposals, few recorded significant trading volume. Analysts struggled to comprehend and assess the new proposals, at least one leading house promising clients a "consultative doc. ument". The dividend tax change has significant implications for UK pension funds.

nervously lower following a Footsie future late on Tuesday round of generally bearish morning meetings at most trading firms. There was little selling, however, and the loss on the Footsle was beld to around 16 points until stock index futures opened lower and at a discount, when the loss on the index was extended to 36.2. But this level of 2,883.1

proved to be the low of the

day. Two US sellers of the

TRADING VOLUME IN MAJOR STOCKS

Volume Claying Day's

stood on the sidelines yesterday and both the future contract and the FT-SE 100 Index itself steadied. For the rest of the session, the market traded quietly, with both buyers and sellers evident, hut not on any great scale.

Not all market strategists were prepared to abandon expectations of a base rate cut because of the chancellor's

apparently negativo stance. Attention now focuses on today's meeting of the Bundesbank policy council, where the chances of a reduction in the Lombard rate appear high.

mance from store and retail shares was ascribed not to base rate optimism but to the latest UK retail sales figures, showing a modest gain for last month but an upward revision

of the January data. Oil issues provided the firmest spots in the market as investors continued to respond to the Budget news of lower Petroleum Revenue Tax on existing oil fields. US buyers were active here hut their efforts were counterhalanced by US selling of the pharmacentical stocks.

The activity in these two prominent market sectors boosted Seaq volume to 671.7m shares from the 492m of the previous day, when retail business was worth £1,30bn, Non-Footsie trade fell back to a more normal 57 per cent of the

Mauling for drug shares

A BEARISH story on the drug stocks in the US press, together with profits warnings from two leading US groups, brought renewed pressure on a thoroughly depressed pharma-

ceuticals sector. Marion Merrell Dow shocked Wall Street by announcing that its first-quarter numbers would be substantially lower than those of the same period last year, while Eli Lilley plunged more than 5 per cent after a

similar warning. A story in the Washington Post, warning of a possible freeze on drug prices, set the seal on what was always going to be a difficult day for one of the UK market's biggest sectors and an area that has endured unpleasant shocks in

Glaxo, badly mauled by the market after criticisms from the US Food and Drug Administration (FDA) recently over claims for its Zautic antiulcer drug, and still reeling from the resignation of Mr Ernest Mario, its former chief executive and deputy chairman, dropped 14 to 633p on a

large turnover of 5.6m shares. SmithKline Beecham shares, heavily sold in London after the FDA rejected approval of its much-vaunted anti-nausea drug Kytril, ran back 141/2 to 447 %p with 2m shares changing hands. Wellcome finished

23 down at 902p and ICI 14

BP 16-month high

The oil sector remained very much in the front line as the market reassessed the implications of changes in petroleum revenue tax and the proposed changes in advance corporation tax.

The market quickly made up its mind that the biggest winner from the Budget moves was British Petroleum, whose shares followed Tuesday's 9 gain with a further rise of 91/4 to 304 %p, the stock's highest closing level since November 1991. Turnover was a befty 22m shares. Shell Transport, how-ever, settled 2 off at 578p. Enterprise Oil jumped 13 to 505p and Lasmo edged up 3 to

One sector specialist said: "The simple conclusion has to be that the moves favour the big companies at the expense of the so-called tiddlers; the companies paying high levels of petroleum revenue tax, for example BP and Enterprise Oil, as well as Lasmo, are the major beneficiaries. The small companies who have organised their assets in a tax efficient manner are having the rug pulled from beneath them."

The smaller stocks edged higher at the outset but quickly came under severe pressure. Clyde Petroleum settled 71/2 down at 521/2p, Goal dropped 41/2 to 61p and Aran dipped 21/4 to 251/4 p.

Utilities rally

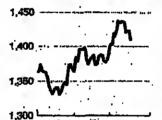

The utilities areas of the market were given a thorough mauling by marketmakers at the outset of trading, with share prices commonly marked down hy around 2 per cent after the Budget moves to introduce VAT on domestic fuel and power from April 1994. The reduction in advance corporation tax was seen as a small plus for the water stocks.

But early losses in the utilities were quickly regained and replaced by large-scale rises as dealers reported a sudden burst of buying interest, apparently from institutions seeking high yields and top quality dividend potential.

Sonthern Electric, the only regional electricity stock in the FT-SE 100, fell to 471p but rebounded to end a net 7 up at 487p. The power generators were virtually unchanged on balance but water shares ended a busy day with good gains. Of the Footsie stocks, Anglian gained a net 7 at 529p, after 518p, as did North West,

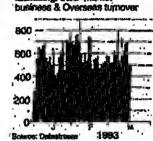

at 517p, after 507p. the few areas of the market to attract any sustained haying interest. Barciays was the pick of the banks, closing a net 5 higher at 405p, after heavy turnover of 8m shares, with US tovestors said to bave been keen supporters of the stock, in spite of the recent halved dividend and the £2.5bn worth of provisions against bad dehts. A round of visits to UK institutions by Mr Andrew Buxton, Barclays' chairman is also said

FT-A All-Share Index

Equity Shares Traded Tumover by volume (million)

1993

to have gone down well. Details of the January retail sales, which accompanied the February headline figure, belped several stores stocks. The statistics showed footwear sales up 23 per cent and womenswear ahead 22 per cent. Among those benefiting, Stylo was steady at 126p, Storehouse up a penny at 198p, as was Sears at 96p. Burton rose 11/2 at

78p in husy turnover of 9.4m. Talk that Dixons had hit a patch of dull trading, together with a downgrade, knocked the shares, which tumbled 10 to 223p. Analysts who bad recently met the high street electrical retailer said that its US husiness was thought to be continuing flat and that the UK recovery had slowed. Morgan Stanley was said to have downgraded its current year

forecast by around 15 per cent. Higher costs at Boots were said to be behind a downgrade from Nomura, but the bouse stressed they were one-off and did not affect the fundamentals. The shares fell 11 to 506p. Relief that VAT had not been levied on books and newspapers lifted the tightly-beld J Menzies 20 to 471p and WH Smith 3 to 450p. EMAP, up 16 at 348p, Telegraph, ahead 7 at 337p, Trinity International, forward 9 at 323p and United Newspapers, 12 to the good at 547p, were also beneficiaries. VAT relief was short-lived

among the food retail stocks. where an initial rise was quickly wiped out as sellers moved into the market. Argyll Group tumbled 9 to 375p with

5.1m traded. J Sainshurv declined a penny to 518p and Tesco lost 8 to 252p in turnover of 10m. Asda, which is reportedly giving out hullish sales talk in meetings with analysts. added 14 to 73%p. Takeover talk was again heard around Nurdin and Peacock as the shares surged 16 to 218p.

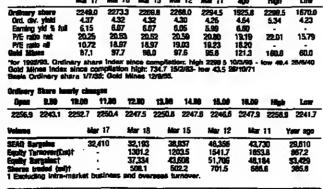

Firm sugar prices and a determined buyer were said to be hehind the rise in Tate & Lyle, 3 ahead at 432p. United Biscuits was strong ahead of results today where a confident statement is heing predicted. The shares put on 2

to 388p. A gloomy leisure sector was enlivened by talk of possible advanced corporation tax benefits to selected leisure stocks although analysts remained both frustrated by lack of detailed information and

for yield attractions in the property sector. Frogmore Estates jumped 20 to 391p, Greycoat added 11/2 to 151/2p, Hammerson 'A', where hid speculation continues, gained 9 to 375p and Land Securities rose a penny to 506p on 5.2m

Bargain hunters in Gestetner, together with suggestions that the full year's dividend may be maintained, helped the stock brush aside a warning from the chairman at the annual meeting that profits will be hit in the short term by falling sales, redundancy and property letting costs. Having retreated over the last two ses sions following a sell recommendation from NatWest Securities, they closed 7 np at 123p. However, the securities house maintained that it still expec-

EQUITY FUTURES AND OPTIONS TRADING

UNCERTAINTY over the full effects of changes in advance corporation tax following the Budget, along with fading hopes of a cut in interest rates in both the UK and Germany, led to a nervous trading session in the derivatives market, writes Joel Kibazo.

In the futures, initial seiling FT-SE 100 Index, which strong two-way business was

to 2,874 by 9am. This turned ont to be the low of the day, for good healthy buying soon brought about a recovery in the contract, sending it forward to trade at 2,887

March then drifted back to the 2,885 level, where it hovof the March contract on the ered for the next few hours as The Euro FT-SE 100 option

conducted. With a dull Wall leading securities house was Street having no significant effect during the afternoon, March closed at 2,886, a 3-point discount to the underlying cash market. Turnover was good and it had reached

14,214 lots by the close. In traded options, volume improved to 35,367 contracts. was particularly busy after a

reported to have sold the April 2,875 straddle. It saw a total of 6,890 lots, while 11,506 contracts were dealt in the FT-SE 100 option.

Lasmo was the most active stock option, with 2,001 trades registered, followed hy J. Sainsbury with 1,956 lots and Barclays with 1,082 conted a "hard landing" for the stock due to continued weakness in its European markets. News of the appointment a

new finance director at TI Group cheered the market sending the shares forward. They hardened 6 to 325p, after trade of 3m. Yield huyers for APV ahead of figures next week helped the shares add 514 to 120 ½p.

Among transport stocks, the UK chancellor's commitment to a high speed rail link between London and the Channel tunnel boosted tunnel operator Eurotunnel and the shares improved 4 to 489p.

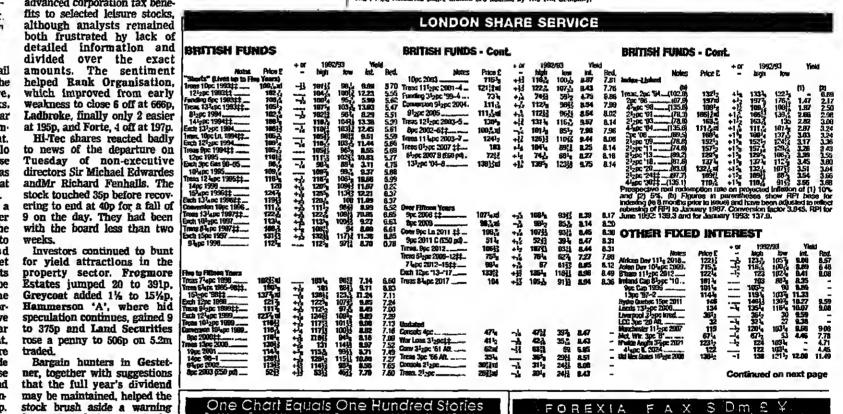

MARKET REPORTERS: Christopher Price, Joel Kibazo,

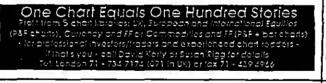

Steve Thompson. Other market statistics.

Market expects rate cut

THE DOLLAR failed to break ity Pact between the German ing a press conference after its through the DM1.6670 barrier against the D-Mark yesterday, even though dealers continued to assume that the Bundesbank would cut its officially posted interest rates at its council meeting today, writes

The dollar operated in a tight raoge between DM1.6615 and DM1.6670 throughout European trading, continuing the pattern of recent days. The currency later closed at DM1.6640 virtually unchanged on the day.

Ecocomic indicators in the US continued to emerge in the dollar's favour. US consumer prices rose 0.3 per ceot in Fehruary, raising suggestions that the Federal Reserve might contemplate tightening policy as the country climbs out of

Perceptions about the Bundesbank's monetary policy also continued to he "dollar-posi-tive." The Germao money market is clearly expecting a 50 basis point cut in the German discount rate when the Bundesbank's policy-making central council meets today. A cut in short-term German rates would further narrow the gains that investors receive for holding

the weekend was seen as one reason why the Bundesbank might ease policy today.

One dealer also suggested that the Bundesbank would be under strong pressure to widen the difference between the discount rate floor and the rate at which funds are offered to commercial banks on a weekly hasis. That differential is currently only 25 basis points, and this provides the central banks with insufficient flexibility in its weekly operations.

There are reasons, too, to be cautious about a cut today. The terms of the Solidarity pact do not legislate for a reduction in the German hudget deficit over the next two years, and come dealers suggested yesterday that the Bundesbank had been trying to play down the implications of

the agreement.
The Bundesbank's announcement that it would not be hold-

government and opposition at meeting also caused a few jitters, as this is thought to indicate that nothing of significance will be fortbcoming. However, the timetable and decisions of recent meetings have had a highly flexible air.

Perceptions of an easing in German rates helped sterling to make new gains against the D-Mark, although the main impetus here was Tuesday's hudget statement. Mr Norman Lamoot'e claim that the current level of interest rates was compatible with the government's objectives for inflation and growth has given a firm underpinning to the pound, which closed at DM2.4150, up

1% pfennigs on the day. The pound hriefly traded above the DM2.42 level at one stage. However, a Londoobased analyst claimed that the pound was being hought in short-term speculative trading rather than longer-term insti-

Solution to Puzzle No.8,103

MONEY MARKETS

German futures fall

futures fell back sharply yesterday after a Bundeshank council member was reported to have said that the time was not ripe for cuts in official German interest rates, writes

James Blitz Money market dealers were clearly expecting today's Bundesbank council meeting to cut the Lomberd and discount rates, which currently stand at 9.00 and 8.00 per cent respectively, hy 50 basis points.

UK clearing bank base lending rate 6 per cent from January 26, 1993

Three-month German cash continued to hover at around 7.75 per cent. a good % percentage point below the level at which the Bundesbank offers cash to commercial banks in its weekly securities

repurchase tender.

However, Mr Reimut
Jochimsen, a Buodeshank council member, was reported to have told a financial news ageocy that the Bundeshank should not cut rates while inflation remains stubbornly

His comment spoiled the generally optimistic mood in Germany, and the June Euromark contract fell back 6 basis points to close at 93.18.

SHORT-DATED D-Mark today's council meeting has certainly not been promising. Money market conditions remain tight because of the introduction of minimum reserve requirements.

German call money yesterday came down to 8.50 per cent from 8.60 per cent earlier in the day after the Bundeshank injected a net DM16.4bn into the market.

The allocation was described by some dealers as generous. hut others pointed out that it was rather meagre when other factors were taken into account. The recent issue of 6hort term bills -- or Bulis and the tax collection season have removed a lot of liquidity from the market.

in sterling markets, the June futures contract remained under strong pressure following the UK chancellor's indication in the UK budget that the level of UK base rates was consistent with economic recovery.

The June contract closed at 91.29, some 6 basis points down from its previous finish. At this level it is pricing 3-month mocey in the summer at 5.71 per cent. Three-month cash closed yesterday at 5# per cent,

unchanged on the day. Tight liquidity conditions in the discount market pushed The mood in the German the overnight rate as high as money market in the run up to 30 per cent at one stage.

IS THIS YOUR OWN COPY OF THE FINANCIAL TIMES?

Or do you rely on seeing someone else's? Every day the FT reports on the topics that matter to people doing business every day, in and from Europe. We cover the latest European, U.S. and international news, and analyse the impli-

cations from a European perspective. In fact you'll find far more than finance in the FT. No surprise then, that the Financial Times is read by over four times as many senior European businessmen and women as any other international newspaper.*

Make sure you're one of them by getting your own copy of the newspaper delivered daily to your office.

spite of inflation data

Wall Street

US equities marked time yesterday morning, with prices barely moving in splte of reports of surprisingly high inflation data for February. writes Karen Zagor in New

At 1 pm, the Dow Jones Industrial Average was down 4.59 at 3,438.36. The more broadly bazed Standard & Poor's 500 was 1.57 lower at 449.80, while the Amex composite eased 1.72 to 421.36, and the Nasdaq composite fell 5.79 to 689.68. Trading volume on the NYSE was nearly 141m shares by 1 pm, and declines outnumbered rises by 1,058 to

Although the Dow fell by more than 9 points shortly after trading started, it quickly recovered most of its losses and moved in a narrow range through the morning.

There was some concern about inflation, following reports that the core consumer price index rose by 0.5 per cent in February, above the anticipated 0.3 per cent. Including the mercurial food and energy components, the index was 0.3 per cent higher for February. Shares in Micron Technologies plunged \$3% to \$24% after

the commerce department said that it would subject South Korean competitors to surprislngly light tariffs. Dynamic random access memory chips, known as D-RAMs, made by South Korean companies, will be subject to duties of 0.74 per cant to 7.19 per cent. The industry had expected duties of at least 10 per cent.

The ruling also burt shares in Texas Instruments, which dropped \$2 1/2 to \$59%.

The drug sector continued to reflect investor concern about government controls on pbarmaceuticals prices, and drug company stocks were among the most active in morning NYSE trading. Merck fell \$1% to \$36%, Glaxo Holdings lost \$% to \$18, Johnson & Johnson tumbled \$1% to \$40% and Pfizer fell \$1% to \$58%.

Marion Merrill Dow, which pluoged \$4 oo Tuesday after the company warned of a substantial drop in first quarter sales, regained \$1/4 to \$19.

Among active blue chip issues, Philip Morris slipped \$% to \$64% and Chrysler held Merrry-Go-Round, a specialty

fashion stores group, climbed \$1% to \$16 after signing an agreement to buy Metville's Chess King division

A bout of profit-taking hit

casino and gambling-related issues after strong gains in recent weeks. Promus dropped \$2% to \$69% and Prealdent Riverboat Casinos lost \$2% to

Carnival Cruise firmed \$% to \$381/2 after it said that it had agreed to sell one of its cruise ships to a new company to be formed by three companies, including Carnival. Each of the three cruise lines, which include Miami-Based Dolphin Cruise Line and Epirotiki Lines, will have an equal stake

in the new company. In Nasdaq trading, technology stocks saw heavy trading. Sun Microsystems slid \$% to \$30%, Oracle Systems was unchanged at \$35% and intel

Canada

TORONTO saw limited activity at midsession with the TSE-300 index 9.87 lower at 3,546.90 in volume of 24.6m shares valued at C\$211m.

Among active stocks, Ranger Oil was C\$% weaker at C\$6 after announcing that it would not receive some \$33m in petroleum revenue tax repayments under proposed changes to the UK's oil revenue tax. In the metals sector. Lac Minerals fell

Nikkei climbs to year's high on economic hopes

THE NIKKEI average closed at the year's bigh after senior Liberal Democratic party members called for a stimulus package larger than last August's emergency measures, writes Emiko Terazono in Tokyo.

The 225-issue average gained 205.07 at 18,173.37, helped by a rise in the futures market. The index fell to the day's low of 17,953.45 in the morning and hit the day's peak of 18,242.70 just before the close.

Volume was almost unchanged at 350m sbares, against 345m, and advancing stocks led losers by 757 to 257, with 137 issues unchanged. The Topix index of all first section stocks climbed 20.94 to 1,365.65, reflecting broad-based buying, and in London the ISE/

Institutional ln vestors bought large-capital shares which had lost ground on prof-it-taking on Tuesday. Traders said the yen's rise against the dollar had also encouraged huying in shipbuilding issues, steels and power utilities. An improvement in the futures market also brought in arbitrage buying, while individual investors traded speculative

stocks. Nippon Steel was the day's most active issue, rising Y7 to Y320, while Tokyo Electric Power moved ahead Y70 to Y2.800.

Reports that leading brokers will see better profits for the current year to March, boosted by the recent market rally, left securities houses up 4.3 per cent on the day. Nomura Securities was the second most active stock, appreciating Y90 to Y1,740, while Nikko Securities advanced Y76 to Y790 and

Equities mark time in Buba still keeps the Continent guessing

BOURSES esemed slightly a galn of 11 per cent this worried about the absence of a Rundeshank news conference today, writes Our Markets

FRANKFURT approached the interest rate prospect with something less than enthusiasm, the DAX index falling 12.75 to 1,685.08, its fourth con-

secutive decline. Turnover fell slightly from DM6.1bn to DM6.0bn.

Carmakers fell after a bearisb review of the industry from Merck Finck In Düsseldorf, BMW leading the rout with a fall of DM8 to DM478. Otherwise, shares which moved appreciably on the day were mostly speculative.

Asko, the retailer, up from DM604 at the end of February, apparently on hopes that the Christmas quarter will produce good figures, fell DM50, or 6.8 per cent to DM685; and Deutache Babcock, the engineer which indicated good orders, but poor profits prospects earlier this week, dropped another DM9.20, or 5.9 per cent to

Among utilities, VEW put on another DM3.50 to DM245.50 for

month. Mr Patrick Shields at NatWest Securities sald that there had been a story that VEW, which has the greatest dependence in the industry on gas for the production of electricity, could be in the market for Hoesch's 8 per cent stake in Ruhrgas, Germany's largest

gas supplier. PARIS lost its way late in the day after the CAC-40 index had risen to a high of 1,980, falling back to close 7.97 lower at 1,967.28. Turnover was a modest FFr2.4bn. The decline was partly attributed to a feeling that the Bundesbank might not cut interest rates at its reg-

ular meeting today. LVMH advanced FFr76 to FFr3,369 abead of today's results. Analysts are particularly interested in the group's expectations of 1993 performance, given the depressed state of some of its interests, such as champagne. However, since the shares having underperformed the market by some 16 per cent over the last three months, some analysts believe that there is room for a techni-

between the share price on the

Bombay stock exchange and

the market price of its Euro-

MILAN saw some heavy selling by foreign institutions in early trading but there was 8 slight recovery in the after market. The Comit index finished down 9.68 at 492.74. The market was not moved by Tuesday'a good results from

Banco Ambrosiano Vaneto. The shares fell L50 to L4.190 although the bank announced a 31 per cent increase in net profit, this in spite of doubling its reserves for bad debts. Olivetti continued to be the

focus of investors' attention. hut the shares managed a modupturn: after fixing down L44 to L1,781 they rose to L1,845 on the kerb. Doubts over the future of the country's privatisation pro-

gramme increased after Monday's announcement that Iri, the state bolding group, was to take a loan from Stet in exchange for granting the lat-ter the dividend rights in Banco Commerciale, Stet fixed down L62 at L2,083 while Commerciale was L49 weaker at

AMSTERDAM moved higher on better than expected results from the steel group, Hoogovens. The CBS Tendency index

loss of Fl 595m but forecast a turnround in the first half of 1993 on improved demand for its products. The shares picked

up Fl 2.30 to Fl 27.30. In contrast, Grolsch, the brewer, lost Fl 5.40 to Fl 204.50 on slightly disappointing results and plans for a five for one share split. Elsevier was Fl 1.30 down at Pl 126.50 ahead

of today's results. ZURICH looked apprehensively at the Bundesbank, at other equity markets and, again, at plans for US health-care reform. The SMI index fell 11.3 to 2.138.5 with chemicals particularly weak, Roche certifys bul

icates falling SFr60 to SFr4,020 HELSINKI rallied on strong demand for industrial shares, local hopes of a German interest rate cut and by a rebound from recent losses. The Hex index rose 2.4 per cent to 985.0 in turnover of FM72.1m. IST-ANBUL dropped 1.7 per cent for an aggregate fall of 3 per cent over the past two days. cautious ahead of a six-day holiday starting next Tnesday. The market index closed 96.45 lower 8t 5,620.37.

Bombs rock Bombay in budget aftermath

₹be 29-storey Jijobhoy Towers, home of the Bombay Stock Exchange, was rocked by two powerful bombs last Friday, leaving 60 dead and 200 injured. The market reopened on Monday in an attempt to return to normal.

It has had to compromise trading has been restricted to an hour a day, and dealing has moved back to the traditional ring, where it stopped a year ago. Dealers seemed to like this, the BSE index rising by 5.6 per cent on Monday and Tuesday. But another bomb blast in Calcutta triggered nervous selling yesterday, and the index came back by 50.62, or 2.1 per cent, to 2.409.23.

All this has taken place against a volatile background; of disappointment.
Dr Manmohan Singh, the

Indian finance minister, disappointed traders in the budget at the end of last month. He postponed corporate tax reforms by a year, denying mended by an expert group. He did reduce excise and import duties on a broad front, but left out the cement and steel sectors, where share prices had heen boosted by pre-budget speculation.

Taking the tax concessions

the Index gained 3 at 4,448. The overall index shed 2 to 3,451 and golds 9 to 1,068. De Beers lost 40 cents to R66.25 but was off the day's low.

R.C. Murthy on a market which has seen speculation, and savage disappointment

for granted, traders had driven up share prices in February to make a kill later, Instead, the budget turned ont to be a nightmare. While Industry and business welcomed the statement which, for once, did not propose any new tax, Professor Rusi Taraporewala, the stock market theorist and academic, said a reduction in import

duties would leave corporate profits ex-growth this year. The relative lack of financial concessions meant that disappointed traders sold with a vengeance and, until the weekend, the market seemed bottomless as equity prices plummeted to a 13-month low. Overseas investors fuelled the downtrend as they sold some half a million shares of Reliance Industries, arhitraging

the Bombay equity market, over the past six weeks or so. has had to contend first with unusually bullish speculation, before the national budget on February 27, and subsequently with some savage expressions

To top it all, Dr Singb refused to equate domestic investors with their overseas counterparts in sbort-term capital gains. He lowered the tax to 30 per cent from 65 per cent for expatriate Indians and foreign investors bnt for local investors it nained at 44.5 per cent.

SOUTH AFRICA

India · Bombey National Index 1,350 1,200 1,150 1,100 issue of global depository

receipts (GDRs).

The opportunity arose after a change in Indian regulations which allows international investors to convert GDRs into the underlying stock. At the current conversion rate of Rs31 per US dollar, the Relisoce GDR fetched Rs170 per share against the BSE quotation of Rs210. The BSE 30-share index

plunged by more than one-fifth to 2,287 on March 10, from 2,893 at the post-budget trading session on February 27. Share prices rebounded last week, taking the index to 2,361 and the uptrend, on balance, has continued this week In spite of the bomb blast on Friday. Whether or not the surge

will turn into a strong rally will depend on the ability of bulls to maintain their momentum. They are hoping that foreign portfolio Investment will pick up with the restoration of trading after "Black Friday", and the successful sale of Reliance stock on the BSE by international investors.

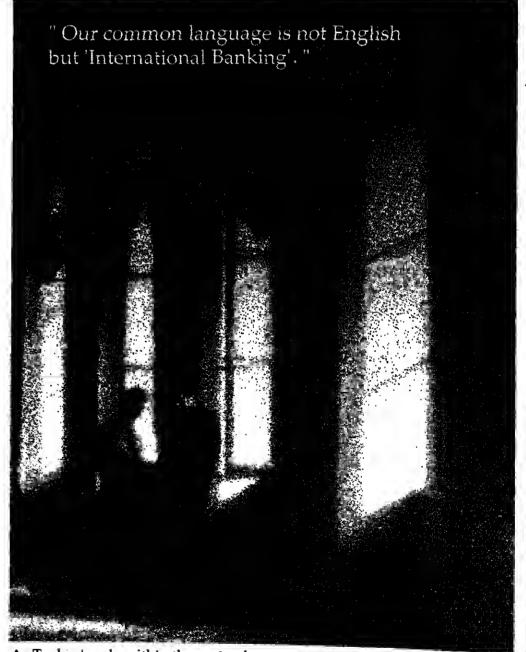

The Indian stock markets have been passing through a series of crises since December. when activists of the Bhartiya Janta party pulled down the Babri mosque at Ayodhya, sparking off communal riots.

Mr Mark Bulloch of Jardine Fleming takes the domestic political situation in his stride Nothing dramatic has happened as far as foreign investors are concerned," he says. They are appraising the political situation.

In the meantime, there is no compulsion for local investors to sell. In this, they are more fortunate than they were in previous years, when they were under pressure to take advantage of a long-term capital gains tax exemption before the financial year ended in March. The exemption has been replaced by a flat 20 per cent tax this year which, according to dealers, puts bulls and bears on an even footing.
